PREFACE.

THIS Catalogue is intended to serve as an Index to the Titles and Dates of Scientific Papers contained in the Transactions of Societies, Journals, and other Periodical Works which have been published from the beginning of the present century to the end of the year 1863.

The need of some serviceable key to the vast body of scientific matter contained in Periodical Publications has been keenly felt by the cultivators of Science; and the utility of various Catalogues, Indexes, and works of like purpose which have at different times been produced has been thankfully acknowledged. For the most part, however, these works differ in scope and plan from the present, or apply to a different epoch. The most notable is the *Index Commentationum* of REUSS, which extends to sixteen quarto volumes, and took twenty years in publication. That great work is not limited, like the present Catalogue, to Scientific Papers; but, on the other hand, it applies only to Transactions of Societies, and while it comprehends the contents of those Transactions from their commencement, it reaches but a short way into the present century. Other Catalogues are devoted to special branches of knowledge; such are the *Bibliographia Zoologiæ et Geologiæ* of AGASSIZ published by the Ray Society, and the admirable *Bibliotheca Zoologica* of CARUS and ENGELMANN.

The present undertaking may be said to have originated in a communication from Dr. Joseph HENRY, Secretary of the Smithsonian Institution, to the Meeting of the British Association at Glasgow in 1855, suggesting the formation of a Catalogue of Philosophical Memoirs: this suggestion was favourably reported on by a Committee of the Association in the following year. The Committee recommended that the contemplated Catalogue should embrace the Mathematical and

Physical Sciences, but should not include Natural History, Physiology, Geology, Mineralogy, or Chemistry, which, it was suggested, would properly form the subject-matter of one or more distinct Catalogues; further, that the Catalogue should not be restricted to Memoirs in the Transactions of Societies, but should comprise also Papers in other Periodical Publications, and that it should begin with the year 1800.

In March 1857, General SABINE, then Treasurer and Vice-President of the Royal Society, brought the matter before the President and Council of that body, and requested, on the part of the British Association, the co-operation of the Royal Society in the project; whereupon a Committee * was appointed, "to take into "further consideration the formation of such a Catalogue, and to report to the "Council on the precise mode of preparing and dealing with the manuscript, and "on the probable cost of getting it ready for the Press."

In June of the same year that Committee presented a preliminary Report, in which, besides entering into various particulars, they recommended that the main publication should be a "Serial Index," that is, a list of the Papers in each Series of Transactions, Journals, or other Periodical Works, put down in the order in which they occur in the several Volumes; and that to this, other Indexes should be attached,—an Index of Authors' names certainly, and a classified Index of Subjects, if it could be done. In regard to the matter to be included, the Report agreed substantially with that presented to the British Association.

No further step was taken by the British Association, or by the Royal Society in co-operation with that body; but the President and Council of the Royal Society, acting on the recommendations contained in a Report of the Library Committee, dated 7th January 1858, resolved that the preparation of a Catalogue of Scientific Memoirs should be undertaken by the Royal Society independently, and at the Society's own charge. It was then also determined not to limit the scope of the Catalogue to Physics and Mathematics, as had been contemplated, but to extend it to all the branches of Natural Knowledge for the promotion of which the Royal Society was instituted, excluding matter of a purely technical or professional character.

* The Committee consisted of Mr. Cayley, Professor De Morgan, Mr. Graham, Mr. R. Grant, Professor W. H. Miller, and Professor Stokes.

In resolving on this undertaking the Council did not propose to task the Society with more than the preparation of a Manuscript Catalogue for use in their own Library; but it was hoped that eventually the Catalogue might be printed for general use at the public expense, or by means of funds contributed from other sources.

The work was accordingly begun without delay, and has been carried on under the superintendence of the Library Committee. Four copies were made of the titles of the Papers to be catalogued; one set of these has been bound up to form a manuscript "Serial Index," now deposited in the Society's Library, others were reserved to be arranged for printing.

A large proportion of the Periodical Works containing Titles to be extracted was at hand in the Royal Society's Library, and to these very extensive additions have been made during the progress of the work. Another rich store of materials existed in the Library of the British Museum. Valuable contributions were also supplied by the Libraries of the Chemical, the Entomological, the Geological, the Linnean, the Pharmaceutical, the Royal Geographical, the Royal Medical and Chirurgical, and the Zoological Societies, the London Institution, the Office of Patents, the Royal College of Surgeons, the Royal Institution, the School of Mines, and the University of Cambridge; and the President and Council gratefully acknowledge their obligations to the Governing Bodies and Librarians of these Institutions for the facilities thus afforded.

With a further view to completeness, printed lists of the Periodical Publications already included were from time to time transmitted to Foreign Academies and Scientific Institutions, with a Circular letter from the Foreign Secretary requesting to be informed of deficiencies which might be supplied by the Libraries of the Institutions addressed. In response to this application a valuable contribution was obtained, through the obliging intervention of W. Ritter von Haidinger, of nearly 2,000 Titles from the Library of the Imperial and Royal Geological Institute of Vienna, carefully extracted by the Librarian, M. Senoner. Valuable aid was also afforded from Prague through the good offices of Professor John Czermak.

As the preparation of the manuscript approached completion, it became expedient

to endeavour to make arrangements for the printing of the work. After due consideration it was decided that the publication should consist of, first, the Titles of Papers printed in full and arranged alphabetically according to the Authors' names; and, secondly, an Alphabetical Index of the subjects of the Papers so far as they appear in the Titles.

As the Royal Society had already expended a large sum in compiling the Catalogue, and were prepared to undertake the further expense of arranging it for printing and of correcting the press, and as the publication of the work was calculated to be of public advantage, it was resolved to propose to Her Majesty's Government that it should be printed at the cost of the nation; and that, after the presentation of a certain number of copies to Scientific Institutions at home and abroad, the remainder should be offered for sale at the price of the paper and printing only, and the proceeds applied in reduction of the outlay on the part of the Government.

A communication was accordingly made to Viscount PALMERSTON, First Lord of the Treasury; and the proposal of the President and Council, having been favourably received by his Lordship and by Mr. GLADSTONE the Chancellor of the Exchequer, was approved by the Lords Commissioners of the Treasury. The Minute of their Lordships, dated 28th November 1864, adopting the proposal, concludes in the following terms:—

"Having regard to the importance of the work, with reference to the promotion "of scientific knowledge generally, to the high authority of the source from which "it comes, and to the labour gratuitously given by Members of the Royal Society "to its production, my Lords consider themselves justified in having the work "printed at the cost of the public, with the understanding that, reserving such a "number of copies for presentation as my Lords, in communication with the "President of the Royal Society, may hereafter determine, the work shall be sold "at such a price as it may be calculated will repay the cost of printing.

"Their Lordships, however, desire it to be understood that the work shall go "forth to the public under the authority of the Royal Society, by the exertions of "whose Members this important aid to the study of Science has been produced."

INTRODUCTION.

a. Subject-matter of the Catalogue.

THE following Catalogue is intended to contain the Title of every Scientific Memoir which appears in the various Transactions and Proceedings of Scientific Societies, and in the Scientific Journals published within the time which it comprehends; with the Reference, the Date, the Author's name, and the number of pages in the Memoir.

As the Transactions of many learned Societies contain both scientific and non-scientific matter, it was necessary to make a selection, and to exclude such Papers as were merely literary, technical, or professional; and a similar course has been pursued with regard to Scientific Journals. It has not always, however, been possible, or even advisable, to adhere strictly to this rule, which has been construed so as to admit rather than exclude any matter as to which there might be a doubt. Thus many Medical and Surgical Papers have been included on account of their containing Anatomical or Physiological matter. In like manner accounts of voyages and travels occurring in Serial Works have been admitted when they contained matter touching upon Natural History, Geology, or Terrestrial Physics. Records of Meteorological Observations have been omitted, unless they contained scientific calculations, important generalizations, or new theories: but the Appendices to volumes of Astronomical Observations and to Astronomical Almanacs have been treated like Scientific Journals. Reports from Committees are included, but mere notices and extracts are omitted. Papers which were published only in the form of separate pamphlets are excluded; but it has been thought advisable to relax the rule in some cases, especially with regard to certain Academical Programmes to which scientific dissertations are appended.

A list of the Works indexed, nearly fourteen hundred in number, arranged alphabetically according to the contractions employed in the Catalogue, will be found at the end of this Introduction; and in it those volumes which could not be procured, and the absence of which breaks the continuity of a series, have been carefully marked as deficient. The Royal Society hope that the publication of these deficiencies may lead to copies of the Titles contained in the missing volumes being forwarded to them for insertion as the Catalogue proceeds.

When possible, both the Volume and the Year have been given, one reference acting as a check upon the other; and this avoids the necessity of marking the various Series. In the case of Transactions of Societies, Ephemerides, and Astronomical Almanacs, the year to which the volume belongs, and not the year of publication, has been given. Thus the Nautical Almanac for 1863 was published in 1860, but the former year is adopted in the Catalogue as that by which this particular volume is known.

A date enclosed in brackets marks the time when a paper was read, which occasionally precedes by some years the date of the volume in which it is printed.

b. Period of Time embraced.

The Catalogue is intended to comprise Transactions and Journals published in the period between 1800 and 1863 inclusive.

A few important series, beginning towards the end of the last century, which it seemed undesirable to break, are indexed from their commencement. The point at which any serial work was taken up may at once be seen by turning to the list at p. xiii. It has also been necessary to exceed the limit in the other direction, so as to include Memoirs which were read in 1863, though not printed until a year or more after.

c. General Arrangement of the Catalogue.

The Titles are arranged alphabetically according to Authors' names, the arrangement under the head of any one Author being chronological. Memoirs, which are the work of two or more Authors, are entered under the name of each; Reports of Committees under the name of the Reporter.

In arranging the alphabetical order of Authors' names, the practice of the respective countries has been followed as far as possible, and hence the following rules have been adopted :—

1. The prefixes, *D'*, *Da*, *Dal*, *De*, *Del*, *Della*, *Van*, *Von*, are not considered as part of the name, thus De Cagnoli will be found under Cagnoli, Da Costa under Costa, Van Beneden under Beneden, etc. To avoid confusion the Flemish article *De* is treated in like manner. English names, such as De Morgan, De la Beche, Van Mildert, are to be excepted, the prefixes having no signification in our language.

2. Names preceded by *Du*, *Des*, *Mac*, and *O'* will be found under the letters D, M, and O.

3. Names preceded by *Le*, *La*, or *Les*, will be found under the letter L.

Where a rigorous adherence to these rules would have caused confusion, a cross reference directs the reader to the place where the Author's papers are to be found : thus the papers of D'Arcet, De Candolle, and De la Rive, are placed under D, and cross references are given under A, C, and L.

4. In English and Dutch compound names, the last name is preferred ; in French, Spanish, and Portuguese, the first.

No pains have been spared to assign the Memoirs to their respective Authors ; but it is possible there may be some confusion, when there are two persons of the same name, arising from the absence, in many cases, of Christian names, or even the initials of Christian names, or other distinctive marks, to guide the Compilers of the Catalogue.*

5. When writers have been known by more than one name, as in the case of persons who have changed their names, who have been ennobled, or who have been raised in the peerage, their Papers will be found all together under their last name or title, cross references alone being given after their earlier names or titles.

6. Pseudonyms will be found under their proper letter; but the Papers have been indexed under the Author's real name, when it could be discovered.

---

* None but those who have been engaged in a task of this kind can form any idea of the difficulty occasioned by such omissions. It is hoped that this notice may have some effect in inducing contributors to Scientific Journals to give their names in full.

7. With respect to Papers signed with initials, there were two methods: to arrange them by the first or by the last letter. The latter course has been adopted, on the presumption that the last letter was the initial of the Author's family name, as the others were of his Christian names. By this means it has been found possible to identify the Authors in several cases.

8. The Titles of Anonymous Papers will be printed under a separate head at the end of the first part of the present work.

9. The chronological arrangement of the Papers written by any one Author is determined by the date of the volume in which each is printed, and not by that of the reading.

When a Memoir is found in more than one Serial Work, the additional references are placed alphabetically.

d. Abbreviation, Supply, or Translation of Titles in certain cases.

In the few instances in which very long Titles have been curtailed, the first words of the Title are given at such length as to make identification easy, and the abbreviated Title, if any, employed in the work itself has been adopted.

When communications appear without a Title, or are merely described as a note or letter from the Author, a Title has been supplied by the Compiler. Such Titles are distinguished by being enclosed within brackets.

In general, Titles are entered in the Catalogue in the languages in which they were written. An exception occurs in the case of Russian, Polish, and Hungarian Titles, the first few words of which are given (so as to identify the paper), followed by a translation into English enclosed within brackets.

e. Mode of dealing with Reprints, Translations, Abstracts, and Reports.

It was at first intended to index original Memoirs only, to the exclusion of Reprints and Translations, but it was soon perceived that the value of the Work would be greatly increased if the original reference were supplemented by references to other sources where Reprints and Translations might be found. It will sometimes happen that scientific students may have access to Journals containing reprints of

Memoirs, and not to the work in which they originally appeared; or they may be unacquainted with the language in which the Memoirs were written; in either of which cases they will find the additional references very useful. The language of the Translation may generally be inferred from the nationality of the work in which it appears, unless otherwise specified.

Whenever the Royal Society has not been able to procure the original Memoir, or a Reprint, the abbreviation [*Transl.*] is placed after the Title.

Abstracts of Memoirs have been indexed as well as the Memoirs themselves. As the first and last page are given in each reference, the reader will generally have little difficulty in distinguishing Abstracts from entire Memoirs.

Reports on Papers are usually omitted; but as there are some which have an independent value, they have in certain cases been indexed under the name of the Reporter. In like manner many of the Éloges of scientific men read before the Institute of France have been given.

In this work no Title has been inserted at second hand. With the exception of those from works indexed abroad in whole or in part (marked respectively by a star (*) or an obelus (†) in the List of Abbreviations), all the Titles have been extracted under the immediate superintendence of the Royal Society.

—— **16.** A monograph of Phos, a genus of Gasteropodous Mollusca. Zool. Soc. Proc. pt. XVIII., 1850, pp. 152–155.

—— **17.** A monograph of Macrochisma, a genus of Gasteropodous Mollusca belonging to the family Fissurellidæ. Zool. Soc. Proc. pt. XVIII., 1850, pp. 202–203; Ann. Nat. Hist. VIII., 1851, pp. 350–351.

—— **18.** A monograph of Modulus, a genus of Gasteropodous Mollusca, of the family Littorinidæ. Zool. Soc. Proc. pt. XVIII., 1850, pp. 203–204.

—— **19.** A monograph of Cyllene, a genus of Gasteropodous Mollusca. Zool. Soc. Proc. pt. XVIII., 1850, pp. 204–206.

—— **20.** A Catalogue of the species of Emarginula, a genus of Gasteropodous Mollusca belonging to the family Fissurellidæ, in the Collection of Mr. Cuming. Zool. Soc. Proc. pt. XIX., 1851, pp. 82–92.

—— **21.** Catalogue of the species of Nassa, a genus of Gasteropodous Mollusca belonging to the family Buccinidæ, in the Collection of Mr. Cuming, with the descriptions of the new species. Zool. Soc. Proc. pt. XIX., 1851, pp. 94–114.

—— **22.** Descriptions of fifty-two new species of the genus Mitra, from the Cumingian Collection. Zool. Soc. Proc. pt. XIX., 1851, pp. 132–141.

—— **23.** Contributions towards a monograph of the Trochidæ, a family of Gasteropodous Mollusca. Zool Soc. Proc. pt. XIX., 1851, pp. 150–192.

—— **24.** A monograph of Scutus, a genus of Gasteropodous Mollusca belonging to the family Fissurellidæ. Zool. Soc. Proc. pt. XIX., 1851, pp. 221–222.

—— **25.** A monograph of the genus Monoptygma of Lea. Zool. Soc. Proc. pt. XIX., 1851, pp. 222–224.

—— **26.** Descriptions of new shells from the Collection of Mr. Cuming; with a note of the genus Nematura. Zool. Soc. Proc. pt. XIX., 1851, pp. 224–225.

—— **27.** A monograph of the recent species of Rimula, a genus of Mollusca belonging to the family Fissurellidæ. Zool. Soc. Proc. pt. XIX., 1851, pp. 226–227.

—— **28.** A monograph of Puncturella, a genus of Gasteropodous Mollusca belonging to the family Fissurellidæ. Zool. Soc. Proc. pt. XIX., 1851, pp. 227–228.

Adams, *Arthur.* **29.** Descriptions of sixteen new species of Rissoina, a genus of marine Gasteropodous Mollusks from the Cumingian Collection. Zool. Soc. Proc. pt. XIX., 1851, pp. 264–267.

—— **30.** Descriptions of several new species of Murex, Rissoina, Planaxis, and Eulima, from the Cumingian Collection. Zool. Soc. Proc. pt. XIX., 1851, pp. 267–272.

—— **31.** Descriptions of new species of Eulima, Triphoris, &c., from the Cumingian Collection. Zool. Soc. Proc. pt. XIX., 1851, pp. 276–279.

—— **32.** Descriptions of new species of Semele, Rhizochilus, Plotia, and Tiara, in the Cumingian Collection. Zool. Soc. Proc. pt. XXI., 1851, pp. 94–99.

—— **33.** Descriptions of new species of the genus Conus, from the Collection of Mr. Cuming. Zool. Soc. Proc. pt. XXI., 1851, pp. 116–119.

—— **34.** Description of a new species of Macgillivrayia. Ann. Nat. Hist. IX., 1852, p. 242.

—— **35.** Descriptions of new Shells from the Cumingian Collection. Zool. Soc. Proc. pt. XX., 1852, pp. 90–92; XXI., 69–74, 173–176.

—— **36.** Descriptions of a new genus and of several new species of Mollusca, from the Collection of H. Cuming. Zool. Soc. Proc. pt. XX., 1852, pp. 92–95.

—— **37.** A monograph of Pyramidella, a genus of Gasteropodous Mollusca belonging to the family Pyramidellidæ. Zool. Soc. Proc. pt. XXI., 1853, pp. 176–178.

—— **38.** Contributions towards a monograph of the genus Chemnitzia. Zool. Soc. Proc. pt. XXI., 1853, pp. 178–182.

—— **39.** Descriptions of new genera and species of Gasteropodous Mollusca. Zool. Soc. Proc. pt. XXI., 1853, pp. 182–186.

—— **40.** A Monograph of Fossar, a genus of Gasteropodous Mollusca. Zool. Soc. Proc. pt. XXI., 1853, pp. 186–187.

—— **41.** A monograph of Umbonium (Rotella), a genus of Trochidæ. Zool. Soc. Proc. pt. XXI., 1853, pp. 187–189.

—— **42.** A monograph of Isander, a new genus of Trochidæ, allied to Umbonium. Zool. Soc. Proc. pt. XXI., 1853, pp. 189–190.

—— **43.** Further contributions towards the natural history of the Trochidæ, with the description of a new genus and of several new species from the Collection of H. Cuming. Zool. Soc. Proc. pt. XXII., 1854, pp. 37–41.

—— **44.** Description of a new genus and of several new species of Gasteropodous Mollusca, from the Collection of H. Cuming. Zool. Soc. Proc. pt. XXII., 1854, pp. 41–42.

Adams, *Arthur.* **45.** Monographs of Actæon and Solidula, two genera of Gasteropodous Mollusca, with descriptions of several new species from the Cumingian Collection. Zool. Soc. Proc. pt. XXII., 1854, pp. 58–62.

—— **46.** A monograph of Cerithidea, a genus of Mollusca, with descriptions of several new species from the Cumingian Collection; to which are added Descriptions of two new Species of Colina, and one of Donax. Zool. Soc. Proc. pt. XXII., 1854, pp. 83–87.

—— **47.** Descriptions of some new species of Lophocercidæ and Philinidæ, from the Cumingian Collection. Zool. Soc. Proc. pt. XXII., 1854, pp. 94–95.

—— **48.** Descriptions of thirty-nine new species of Shells, from the Collection of Mr. Cuming. Zool. Soc. Proc. pt. XXII., 1854, pp. 130–138.

—— **49.** Descriptions of twenty-seven new species of Shells, from the Collection of Mr. Cuming. Zool. Soc. Proc. pt. XXII., 1854, pp. 311–317.

—— **50.** Descriptions of two new genera and of several new species of Mollusca, from the Cumingian Collection. Zool. Soc. Proc. pt. XXIII., 1855, pp. 119–124.

—— **51.** Descriptions of twenty-five new species of Shells, from the Collection of Mr. Cuming. Zool. Soc. Proc. pt. XXIII., 1855, pp. 221–226.

—— **52.** Description of two new species of Shells discovered by R. MacAndrew on the coast of Norway. Zool. Soc. Proc. pt. XXIV., 1856, pp. 1–2.

—— **53.** Descriptions of thirty-four new species of Bivalve Mollusca (Leda, Nucula, and Pythina), from the Cumingian Collection. Zool. Soc. Proc. pt. XXIV., 1856, pp. 47–53.

—— **54.** Description of a new species of Trichotropis, from the Cumingian Collection. Zool. Soc. Proc. pt. XXIV., 1856, p. 369.

—— **55.** On a new species of Macgillivrayia. Ann. Nat. Hist. XIX., 1857, pp. 373–374.

—— **56.** Descriptions of two new species of Heteropodous Mollusca. Ann. Nat. Hist. XIX., 1857, pp. 461–463.

—— **57.** Notice of the animal of Turbo Sarmaticus and other Mollusca from the Cape. Ann. Nat. Hist. XX., 1857, pp. 41–42.

—— **58.** Notice of two new species of Brownia, a genus of oceanic Mollusca. Ann. Nat. Hist. I., 1858, pp. 28–29.

—— **59.** Notice of three new species of Sinusigera, a genus of Brachiocephalous Mollusks. Ann. Nat. Hist. I., 1858, pp. 125–126.

—— **60.** On the synonyms and habitats of Cavolina, Diacria, and Pleuropus. Ann. Nat. Hist. III., 1859, pp. 44–46.

—— **61.** Notes on the Scaly Ant Eater (Manis Javanica), taken during life and after death. Zool. Soc. Proc. pt. XXVII., 1859, pp. 133–135.

Adams, *Arthur.* **62.** Description of a new conchiferous Mollusc of the genus Pandora. Zool. Soc. Proc. pt. XXVII., 1859, p. 487.

—— **63.** On some new genera and species of Mollusca from Japan. Ann. Nat. Hist. V., 1860, pp. 299–303, 331–337, 405–422.

—— **64.** Mollusca Japonica: new species of Chrysallida and Parthenia. Ann. Nat. Hist. V., 1860, pp. 477–479.

—— **65.** Mollusca Japonica: new species of Odostomia. Ann. Nat. Hist. VI., 1860, pp. 20–22.

—— **66.** Notes on the animals of certain genera of Mollusca. Ann. Nat. Hist. VI., 1860, pp. 109–113.

—— **67.** Mollusca Japonica: new species of Aclis, Ebala, Dunkeria, &c. Ann. Nat. Hist. VI., 1860, pp. 118–121.

—— **68.** On the animal of Umbonium vestiarium. Ann. Nat. Hist. VI., 1860, pp. 288–289.

—— **69.** Note on the Fox of Japan. Zool. Soc. Proc. pt. XXVIII., 1860, p. 195.

—— **70.** On some additional new species of Pyramidellidæ from the islands of Japan. Ann. Nat. Hist. VII., 1861, pp. 41–47.

—— **71.** On some new species of Eulima, Leiostraca, and Cerithiopsis from Japan. Ann. Nat. Hist. VII., 1861, pp. 125–131.

—— **72.** On the animal of Alycæus and some other cyclophoroid genera. Ann. Nat. Hist. VII., 1861, pp. 196–197.

—— **73.** On a new genus and some new species of Pyramidellidæ from the north of China. Ann. Nat. Hist. VII., 1861, pp. 295–299.

—— **74.** Notice of a new species of Damaster from Japan. Ann. Nat. Hist. VIII., 1861, p. 59.

—— **75.** On some new species of Mollusca from the north of China and Japan. Ann. Nat. Hist. VIII., 1861, pp. 135–142, 239–246, 299–309.

—— **76.** On a supposed new genus, and on some new species of pelagic Mollusca. Ann. Nat. Hist. VIII., 1861, pp. 401–404.

—— **77.** On the Scalidæ or "Wentletraps" of the Sea of Japan; with descriptions of some new species. Ann. Nat. Hist. VIII., 1861, pp. 479–484.

—— **78.** Notes on certain Crustacea observed abroad. Newman, Zoologist, XIX., 1861, pp. 7319–7322.

—— **79.** On the habits of a Chinese Myriapod. Newman, Zoologist, XIX., 1861, pp. 7660–7662.

—— **80.** On some new species of Cylichnidæ, Bullidæ, and Philinidæ, from the seas of China and Japan. Ann. Nat. Hist. IX., 1862, pp. 150–161.

—— **81.** On some new species of Acephalous Mollusca from the Sea of Japan. Ann. Nat. Hist. IX., 1862, pp. 223–230.

Adams, *Arthur.* **82.** On some new species of Mollusca from Japan. Ann. Nat. Hist. IX., 1862, pp. 295–298.

—— **83.** Note on the Molluscan Fauna of Japan. Ann. Nat. Hist. IX., 1862, pp. 298–299.

—— **84.** On the animal and affinities of the genus Alaba, with a review of the known species, and descriptions of some new species. Ann. Nat. Hist. X., 1862, pp. 293–299.

—— **85.** On some new species of Scissurellidæ from the seas of China and Japan. Ann. Nat. Hist. X., 1862, pp. 346–348.

—— **86.** On the animal and float of Ianthina. Ann. Nat. Hist. X., 1862, pp. 417–420.

—— **87.** On the animal and affinities of Scaliola, a genus of Mollusca from Japan. Ann. Nat. Hist. X., 1862, pp. 420–421.

—— **88.** Among the Ainos. Newman, Zoologist, XX., 1862, pp. 8230–8233.

—— **89.** On the species of Obeliscinæ found in Japan. Zool. Soc. Proc. 1862, pp. 231–238.

—— **90.** On the species of Muricinæ found in Japan. Zool. Soc. Proc. 1862, pp. 370–376.

—— **91.** On the genera and species of recent Brachiopods found in the seas of Japan. Ann. Nat. Hist. XI., 1863, pp. 98–101.

—— **92.** On the Japanese species of Siphonalia, a proposed new genus of Gasteropodous Mollusca. Ann. Nat. Hist. XI., 1863, pp. 202–206.

—— **93.** On some new genera and species of Umboniidæ from the seas of Japan. Ann. Nat. Hist. XI., 1863, pp. 264–268.

—— **94.** On Microstelma and Onoba, two forms of Rissoid Gasteropods, with notices of new species of the latter from Japan. Ann. Nat. Hist. XI., 1863, pp. 347–349.

—— **95.** On the structure of the valves of Pleurosigma and other Diatoms. Ann. Nat. Hist. XI., 1863, pp. 350–351.

—— **96.** On a new genus of terrestrial Mollusks from Japan. Ann. Nat. Hist. XII., 1863, pp. 424–425.

—— **97.** On the genera and species of Liotiinæ found in Japan. Zool. Soc. Proc. 1863, pp. 71–76.

—— **98.** On the genera and species of Fossaridæ found in Japan. Zool. Soc. Proc. 1863, pp. 110–113.

—— **99.** Description of a new genus and of twelve new species of Mollusca (Eutrochus). Zool. Soc. Proc. 1863, pp. 506–509.

—— **100.** On the species of Pyramidellinæ found in Japan. [1862.] Linn. Soc. Journ. VII., 1864 (*Zool.*), pp. 1–6.

—— **101.** On the Japanese species of Leiostraca. Linn. Soc. Journ. VII., 1864 (*Zool.*), pp. 84–96.

Adams, *Arthur*. **102.** On the species of Fusidæ, which inhabit the seas of Japan. Linn. Soc. Journ. VII., 1864 (*Zool.*), pp. 105–108.

Adams, *Arthur*, and *Henry* **Adams.** On two new genera of Mollusca. Ann. Nat. Hist. VII., 1851, pp. 63–64.

—— —— **2.** On a new genus of Chitonidæ. Ann. Nat. Hist. IX., 1852, p. 355.

—— —— **3.** On a new arrangement of British Rissoæ. Ann. Nat. Hist. X., 1852, pp. 358–359.

—— —— **4.** Monograph of Plecotrema, a new genus of Gasteropodous Mollusks belonging to the family Auriculidæ, from specimens in the Collection of Mr. Cuming. Zool. Soc. Proc. pt. XXI., 1853, pp. 120–122.

—— —— **5.** Description of a new genus of bivalve Mollusca. Ann. Nat. Hist. XIV., 1854, p. 418.

—— —— **6.** Monographs of Ellobium and Melampus, two genera of Pulmoniferous Mollusca. Zool. Soc. Proc. pt. XXII., 1854, pp. 7–13.

—— —— **7.** Contributions towards the natural history of the Auriculidæ, a family of Pulmoniferous Mollusca, with descriptions of many new species from the Collection of H. Cuming. Zool. Soc. Proc. pt. XXII., 1854, pp. 30–37.

—— —— **8.** Descriptions of Five new genera of Mollusca. Ann. Nat. Hist. XI., 1863, pp. 18–20.

—— —— **9.** Descriptions of new species of shells, chiefly from the Cumingian collection. Zool. Soc. Proc. 1863, pp. 428–435.

Adams, *Arthur*, and *George French* **Angas.** Descriptions of new species of fresh-water shells collected during Stuart's Overland Journey from Adelaide to the north-west coast of Australia. Zool. Soc. Proc. 1863, pp. 414–418.

—— —— **2.** Descriptions of new species of shells from the Australian Seas, in the collection of George French Angas. Zool. Soc. Proc. 1863, pp. 418–428.

Adams, *Arthur*, and *Wm. B.* **Baikie.** A systematic list of Coleoptera found in the vicinity of Alverstoke, South Hants. Newman, Zoologist, XIV., 1856, pp. 5296–5302; XV., 5438–5447, 5546–5555, 5815–5823, 5843–5850; XVI., 5966–5972.

Adams, *Arthur*, and *Lovell* **Reeve.** Description of a new genus of Acephalous Mollusca, of the family Pectinacea, collected by Capt. Sir E. Belcher during the Voyage of H.M.S. Samarang. Zool. Soc. Proc. pt. XVI., 1848, pp. 133–134.

Adams, *Benjamin*. Account of a great and extraordinary cave in Indiana. Edinb. Phil. Journ. VI., 1822, pp. 29–32.

Adams, *C. B.* Observations on some species of the marine Shells of Massachusetts, with descriptions of five new species. Boston, Journ. Nat. Hist. II., 1838–9, pp. 262–288.

Adams, *C. B.* **2.** Descriptions of eleven new species of New England shells. Boston, Journ. Nat. Hist. III., 1840–1, pp. 318–331.

—— **3.** Descriptions of Tillina tenta, *Say*, and of Helix serpuloides, *Montagu*, with remarks on other marine shells of Massachusetts. Boston, Journ. Nat. Hist. III., 1840–1, pp. 332–337.

—— **4.** Catalogue of the Mollusca of Middlebury Vt. and vicinity, with observations. Silliman, Journ. XL., 1841, pp. 266–277.

—— **5.** Description of a new species of Thracia. Silliman, Journ. XLIII., 1842, p. 145.

—— **6.** Specierum novarum Conchyliorum, in Jamaica repertorum, synopsis. Boston, Proc. Nat. Hist. Soc. II., 1845–8, pp. 1–17.

—— **7.** Notice of a small Ornithichnite. Silliman, Journ. II., 1846, pp. 215–216.

—— **8.** Notice of an example of apparent Drift Furrows dependent on Structure. Silliman, Journ. III., 1847, pp. 433–434.

—— **9.** On the Taconic Rocks. Silliman, Journ. V., 1848, pp. 108–110.

—— **10.** Notice of a fractured and repaired Argonauta Argo. Silliman, Journ. VI., 1848 pp. 137–138; Ann. Nat. Hist. II., 1848, pp. 217–218.

—— **11.** Description of a species of Haliotis, supposed to be new. Silliman, Journ. VI., 1848, pp. 138–139; Ann. Nat. Hist. II. 1848, p. 221.

—— **12.** Remarks on the distribution of the testaceous Mollusca of Jamaica. Amer. Assoc. Proc., 1849, pp. 147–148.

—— **13.** On the nature and origin of the species of terrestrial Mollusca in the island of Jamaica. Amer. Assoc. Proc., 1850, pp. 29–32.

—— **14.** Suggestions on changes of level in North America during the Drift period. Amer. Assoc. Proc., 1850, pp. 60–64.

—— **15.** On the value of the shells of Mollusca for the purpose of distinguishing species and higher groups. Amer. Assoc. Proc., 1850, pp. 180–188; Edinb. New Phil. Journ. LI., 1851, pp. 259–267.

—— **16.** Contributions to Conchology, Nos. 1–4, and Monograph of Stoastoma, a new genus of new operculated land shells. Silliman, Journ. IX., 1850, pp. 133–137; Paris, Journ. Conchyl. I., 1850, pp. 179–181.

—— **17.** Descriptions of new species of Partula and Achatinella. [1850.] New York Lyc. Annal. V., 1852, pp. 41–44.

—— **18.** Descriptions of new species and varieties of shells which inhabit Jamaica. [1850.] New York Lyc. Annal. V., 1852, pp. 45–56.

—— **19.** Descriptions of new species and varieties of the Land Shells of Jamaica, with notes on some previously described species. [1851.] New York Lyc. Annal. V., 1852, pp. 77–98.

Adams, *C. B.* **20.** Descriptions of new fresh-water Shells which inhabit Jamaica. [1851.] New York Lyc. Annal. V., 1852, pp. 98–99.

—— **21.** Catalogue of the Land Shells which inhabit Jamaica. [1851.] New York Lyc. Annal. V., 1852, pp. 103–111.

—— **22.** Catalogue of Shells collected at Panama. New York Lyc. Annal. V., 1852, pp. 229–548.

Adams, *C. B.*, and *Edward* **Chitty.** Remarks on the habitats of certain species of Land Shells. [1851.] New York Lyc. Annal. V., 1852, pp. 100–101.

Adams, *C. B.*, and *J. W.* **Mighels.** Descriptions of twenty-five new species of New England shells. Boston, Proc. Nat. Hist. Soc. I., 1841-4, pp. 48-51.

—— —— **2.** Descriptions of twenty-four species of the Shells of New England. [1841.] Boston, Journ. Nat. Hist. IV. (1843–4), pp. 37–53.

Adams, *C. G.* A case of organic disease of the Uterus, and a case of imperforated Hymen. New England Journ. Med. XIII., 1824, pp. 49-51.

Adams, *Carl.* Zur Theorie der Kegelschnitte. Grunert, Archiv, V., 1844, pp. 323–326.

—— **8.** Journey from Angora by Kaïsaríyah, Malátiyah, and Gergen Kal'eh-sí, to Bír or Bírehjik. Geogr. Soc. Journ. X., 1841, pp. 275–310.

—— **9.** Notes on a journey from Kaïsaríyah, by Malátiyah to Bir or Bírehjik, in May and June 1839. Geogr. Soc. Journ. X., 1841, pp. 311–340.

—— **10.** Notes taken on a journey from Constantinople to Mósul in 1839–40. Geogr. Soc. Journ. X., 1841, pp. 489–529.

—— **11.** Notes of an excursion to Kal'ah Sherkát, U'r of the Persians, and to the ruins of Al Ḥaḍhr of the Chaldees, and Hatra of Romans. Geogr. Soc. Journ. XI., 1841, pp. 1–20.

—— **12.** An account of a visit to the Chaldeans inhabiting Central Kurdistan; and of an ascent of the Peak of Rowándiz (Tur Skeïrhíwá) in 1840. Geogr. Soc. Journ. XI., 1841, pp. 21–75.

Ainsworth, *William,* and *C.* **Johnson.** Journey through the Himma-leh Mountains to the sources of the River Jumna, and thence to the confines of Chinese Tartary, performed in April—October 1827. Geogr. Soc. Journ. IV., 1834, pp. 41–71.

Ainsworth, *William T.* Meteoric appearance on Ben-Lomond; ascent of vapour. Edinb. Phil. Journ. XIII., 1825, pp. 185–186; Quart. Journ. Sci. XX., 1826, pp. 182–183.

Ainsworth, *William T.,* and *Henry H.* **Cheek.** Notes on the caverns in the north-eastern district of the High Peak of Derbyshire, with an account of a descent into Eldon Hole. Edinb. Journ. Nat. and Geogr. Sci. II., 1830, pp. 168–173.

Airy, *George Biddell.* On the figure of the earth. Phil. Trans. 1826, pp. 548–578.

—— **2.** On the use of silvered glass for the mirrors of Reflecting Telescopes. [1822.] Camb. Phil. Soc. Trans. II., 1827, pp. 105–118.

—— **3.** On the figure assumed by a Fluid Homogeneous mass, whose particles are acted on by their mutual attraction and by small extraneous forces. [1824.] Camb. Phil. Soc. Trans. II., 1827, pp. 203–217.

—— **4.** On the principles and construction of the achromatic eye-pieces of Telescopes, and on the achromatism of Microscopes. [1824.] Camb. Phil. Soc. Trans. II., 1827, pp. 227–252.

—— **5.** On a peculiar defect in the Eye, and a mode of correcting it. [1825.] Camb. Phil. Soc. Trans. II., 1827, pp. 267–273 ; Edinb. Journ. Sci. VII., 1827, pp. 322–325.

—— **6.** On the forms of the Teeth of Wheels. [1825.] Camb. Phil. Soc. Trans. II., 1827, pp. 277–286.

—— **7.** On Laplace's investigation of the Attraction of Spheroids differing little from a Sphere. [1826.] Camb. Phil. Soc. Trans. II., 1827, pp. 379–390.

—— **8.** On some passages in Mr. Ivory's remarks on a memoir by M. Poisson. Phil. Mag. I., 1827, pp. 442–448.

—— **9.** Remarks on a correction of the Solar Tables required by Mr. South's observations. Phil. Trans. 1827, pp. 65–70.

—— **10.** On a method of determining the mass of the moon, from transit observations of Venus near her inferior conjunction. Astron. Soc. Month. Not. I., 1827–30, p. 140; Astron. Soc. Mem. IV., 1831, pp. 234–238.

—— **11.** On the corrections in the elements of Delambre's Solar Tables required by the observations made at the Royal Observatory, Greenwich. [1827.] Phil. Trans. 1828, pp. 23-34.

—— **12.** On the spherical aberration of the eye-pieces of Telescopes. [1827.] Camb. Phil. Soc. Trans. III., 1830, pp. 1–64.

—— **13.** On the disturbances of Pendulums and Balances, and on the theory of Escapements. [1826.] Camb. Phil. Soc. Trans. III., 1830, pp. 105–128.

—— **14.** On the longitude of the Cambridge Observatory. [1828.] Camb. Phil. Soc. Trans. III., 1830, pp. 129–140.

—— **15.** On a correction requisite to be applied to the length of a Pendulum, consisting of a ball suspended by a fine wire. [1829.] Camb. Phil. Soc. Trans. III., 1830, pp. 355–360.

Airy, *George Biddell.* **16.** On certain conditions under which a Perpetual Motion is possible. [1829.] Camb. Phil. Soc. Trans. III., 1830, pp. 369–372.

—— **17.** On the nature of the rings formed by the Double Refraction of Quartz. [1830.] Edinb. Journ. Sci. IV., 1831, pp. 362–364.

—— **18.** Report on the Progress of Astronomy during the Present Century. Brit. Assoc. Rep. 1831–32, pp. 125–188.

—— **19.** Observations of occultations and of stars observed with the Moon, at the Cambridge Observatory, during the year 1831. Astron. Soc. Month. Not. II., 1831–33, pp. 56–59.

—— **20.** On the mass of Jupiter, as determined from the observation of elongations of the fourth Satellite. Astron. Soc. Month. Not. II., 1831–33, pp. 171–178; III., 1833–6, pp. 36–113; IV., 1836–9, pp. 25–27; Astron. Soc. Mem. IV., 1833, pp. 83–98; VIII., 1835, pp. 33–36; IX., 1836, pp. 7–10; X., 1838, pp. 43–48; Astr. Nachr. X., 1833, col. 404.

—— **21.** On the inequality of long periods in the motions of the Earth and Venus. [1831.] Phil. Trans. 1832, pp. 67–124; Edinb. Journ. Sci. VI., 1832, pp. 327–328.

—— **22.** Beobachtungen in Cambridge von Oppositionen der Vesta, Juno, Pallas, Ceres. Astr. Nachr. X., 1833, col. 113–118.

—— **23.** On the nature of the light in the two rays produced by the Double Refraction of Quartz. [1831.] Camb. Phil. Soc. Trans. IV., 1833, pp. 79–124, 199–208; Edinb. Journ. Sci. V., 1831, pp. 324–332; VI., 70–77; Poggend. Annal. XXIII., 1831, pp. 204–280.

—— **24.** On a new Analyzer, and its use in experiments of Polarization. [1832.] Camb. Phil. Soc. Trans. IV., 1833, pp. 313–322; Poggend. Annal. XXVI., 1832, pp. 140–149.

—— **25.** On a remarkable modification of Newton's Rings. Camb. Phil. Soc. Trans. IV., 1833, pp. 279–288; Edinb. Journ. Sci. VI., pp. 93–94; Quetelet, Corresp. Math. VII., 1832, pp. 258–262; Poggend. Annal. XXVI., 1832, pp. 123–139; XXVII., 554–556.

—— **26.** On the phænomena of Newton's Rings when formed between two transparent substances of different refractive powers. [1832.] Camb. Phil. Soc. Trans. IV., 1833, pp. 409–424; Phil. Mag. II., 1833, pp. 20–30; Poggend. Annal. XXVIII., 1833, pp. 75–90.

—— **27.** Remarks on Mr. Potter's experiment on Interference. Phil. Mag. II., 1833, pp. 161–167; Poggend. Annal. XXIX., 1833, pp. 304–316, 329–331.

—— **28.** Remarks on Sir David Brewster's paper "On the Absorption of specific Rays," &c. Phil. Mag. II., 1833, pp. 419–424; Poggend. Annal. XXIX., 1833, pp. 331–338.

Airy, *George Biddell.* **29.** Beschreibung eines am 13 Marz 1833 in Cambridge beobachteten Nordlichts. Poggend. Annal. XXIX., 1833, pp. 481–483.

—— **30.** Observations of the Solar Eclipse, July 16, 1833, at the Cambridge Observatory. Astron. Soc. Month. Not. III., 1833–36, pp. 53–55; Astron. Soc. Mem. VIII., 1835, pp. 115–136.

—— **31.** On the position of the Ecliptic, as inferred from transit and circle observations made at Cambridge Observatory in the years 1833–1835. Astron. Soc. Month. Not. III., 1833–36, pp. 55–56, 123–124; IV., 80–81; Astron. Soc. Mem. VIII., 1835, pp. 105–114; IX., 11–16; X., 235–238.

—— **32.** On the time of rotation of Jupiter. Astron. Soc. Month. Not. III., 1833–36, pp. 122–123; Astron. Soc. Mem. IX., 1836, pp. 1–6.

—— **33.** On the calculation of Newton's experiments on diffraction. [1833.] Camb. Phil. Soc. Trans. V., 1835, pp. 101–112; Poggend. Annal. XXXIII., 1834, pp. 389–403.

—— **34.** On the latitude of Cambridge Observatory. [1834.] Camb. Phil. Soc. Trans. V., 1835, pp. 271–282.

—— **35.** On the diffraction of an object-glass with circular aperture. [1834.] Camb. Phil. Soc. Trans. V., 1835, pp. 283–293; Poggend. Annal. 1838, pp. 86–94.

—— **36.** Results of the observations of the Sun, Moon, and Planets, made at Cambridge Observatory in the years 1833, 1834, and 1835. Astron. Soc. Month. Not. IV., 1836–39, pp. 61–64; Astron. Soc. Mem. X., 1838, pp. 239–264.

—— **37.** On the parallax of α Lyræ. Astron. Soc. Month. Not. IV., 1836–39, pp. 91–92; Astron. Soc. Mem. X., 1838, pp. 265–270.

—— **38.** Right ascensions and declinations of Halley's comet. Astr. Nachr. XIV., 1837, col. 125–126.

—— **39.** On the calculation of the perturbations of the small planets and the comets of short periods. Naut. Alm. 1837, *App.*, 149–171.

—— **40.** Theorie der Farben dünner Blättchen. (*Transl.*) Poggend. Annal. XLI., 1837, pp. 512–520.

—— **41.** Normal tabular errors of Uranus in heliocentric longitude. Astr. Nachr. XV., 1838, col. 217–220.

—— **42.** On the intensity of light in the neighbourhood of a Caustic. Camb. Phil. Soc. Trans. VI., 1838, pp. 379–402; VIII., 595–600; Poggend. Annal. LI., *Ergänzungsb.* 1842, pp. 232–249.

—— **43.** Account of experiments on Iron-built Ships, instituted for the purpose of discovering a correction for the Deviation of the Compass produced by the iron of the ships. Phil. Trans. 1839, pp. 167–214.

Airy, *George Biddell.* **44.** On the determination of the orbits of comets from observations. Astron. Soc. Month. Not. V., 1839–43, pp. 1–4; Astron. Soc. Mem. XI., 1840, pp. 181–204.

—— **45.** On the regulator of the clock-work for effecting uniform movement of equatoreals. Astron. Soc. Month. Not. V., 1839–43, pp. 41–43; Astron. Soc. Mem. XI., 1840, pp. 249–268; XX., 17–18.

—— **46.** Observations of the total Solar Eclipse of 1842, July 7 (July 8, civil reckoning). Astron. Soc. Month. Not. V., 1839–43, pp. 214–221; Astron. Soc. Mem XV., 1846, pp. 9–18.

—— **47.** On the principle of an escapement recently invented, and intended to be applied to a clock made for the Observatory of Pulkowa. Astron. Soc. Month. Not. V., 1839–43, pp. 221–222.

—— **48.** A catalogue of 726 stars deduced from the observations made at the Cambridge Observatory, from 1828 to 1835; reduced to January 1, 1830. [1838.] Astron. Soc. Mem. XI., 1840, pp. 21–46.

—— **49.** On a new apparent Polarity of light. Brit. Assoc. Rep. 1840 (*pt.* 2), pp. 3–5.

—— **50.** (Bakerian Lecture).—On the theoretical explanation of an apparent new Polarity in Light. Phil. Trans. 1840, pp. 225–244; 1841, pp. 1–10; Poggend. Annal. LIII., 1841, pp. 459–479, 572–589.

—— **51.** On the diffraction of an annular aperture. Phil. Mag. XVIII., 1841, pp. 1–10.

—— **52.** Reply to Prof. Challis on the investigation of the resistance of the air to an oscillating sphere. Phil. Mag. XIX., 1841, pp. 143–151, 321–328.

—— **53.** Supplement to a paper "On the theoretical explanation of an apparent new Polarity in Light." [1840.] Phil. Trans. 1841, pp. 1–10; Poggend. Annal. LVIII., 1843, pp. 535–549.

—— **54.** On a new construction of the going-fusee. [1840.] Camb. Phil. Soc. Trans. VII., 1842, pp. 217–276.

—— **55.** On the laws of the rise and fall of the tide in the Thames. [1841.] Phil. Trans. 1842, pp. 1–8.

—— **56.** Magnetic Phenomena. Sturgeon, Ann. Electr. VIII., 1842, pp. 112–118.

—— **57.** Observations of the star Groombridge, 1830. Astr. Nachr. XX., 1843, col. 279–282.

—— **58.** On the laws of individual tides at Southampton and Ipswich. Phil. Trans. 1843, pp. 45–54.

—— **59.** Right ascensions and north polar distances of the comet of Faye, from observations at the Royal Observatory, Greenwich. Astron. Soc. Month. Not. VI., 1843–45, pp. 54–55.

Airy, *George Biddell.* **60.** On the flexure of a uniform bar supported by a number of equal pressures applied at equi-distant points, and on the positions proper for the applications of these pressures, in order to prevent any sensible alteration of the length of the bar by small flexure. Astron. Soc. Month. Not. VI., 1843–45, pp. 143–146; Astron. Soc. Mem. XV., 1846, pp. 157–164.

—— **61.** An account of the results of the Tide Observations on the coast of Ireland. Brit. Assoc. Rep. 1844 (*pt.* 2), pp. 4–6.

—— **62.** On the Laws of the Tides on the coasts of Ireland, as inferred from an extensive series of observations made in connexion with the Ordnance Survey of Ireland. [1844.] Phil. Trans. 1845, pp. 1–124.

—— **63.** On a proposed alteration of Bessel's method for the computation of the corrections by which the apparent places of stars are derived from the mean place. Astron. Soc. Month. Not. VII., 1845–1847, p. 189; Astron. Soc. Mem. XVI., 1847, pp. 329–336.

—— **64.** Observations of Astræa. Astr. Nachr. XXIV., 1846, col. 27–30.

—— **65.** Elements of De Vico's fourth comet . . Gambart's comet. Astr. Nachr. XXIV., 1846, col. 181–182.

—— **66.** Elements of Brorsen's second comet. Astr. Nachr. XXIV., 1846, col. 383–384.

—— **67.** On a new construction of the divided Eye-glass Micrometer. [1845.] Astron. Soc. Mem. XV., 1846, pp. 199–210.

—— **68.** On the equations applying to light under the action of magnetism. Phil. Mag. XXVIII., 1846, pp. 469–477; Poggend. Annal. LXX., 1847, pp. 272–282.

—— **69.** Remarks on Dr. Faraday's paper on ray vibrations. Phil. Mag. XXVIII., 1846, pp. 532–537.

—— **70.** Account of some circumstances historically connected with the discovery of the planet exterior to Uranus. Phil. Mag. XXIX, 1846, pp. 511–537; Astr. Nachr. XXV., 1847, col. 133–160; Astron. Soc. Mem. XVI., 1847, pp. 385–414.

—— **71.** Account of the measurement of the Astronomical Difference of Longitude on the arc of parallel extending from Greenwich to the Island of Valentia in the south-west of Ireland, and comparison with the Geodetic Difference of Longitude. [1846.] Astron. Soc. Mem. XVI., 1847, pp. 55–290.

—— **72.** Reduction of the observations of Halley's comet made at the Cambridge Observatory in the years 1835 and 1836. Astron. Soc. Mem. XVI., 1847, pp. 337–378.

Airy, *George Biddell.* **73.** On Sir D. BREWSTER's new analysis of solar light. Phil. Mag. XXX., 1847, pp. 73–76; Poggend. Annal. LXXI., 1847, pp. 393–397.

—— **74.** Results deduced from the occultations of stars and planets by the Moon (1830–1835). Astron. Soc. Month. Not. VIII., 1847–48, pp 29–31; Astron. Soc. Mem. XVII., 1849, pp. 3–20.

—— **75.** A brief notice of the Imperial Observatory of Poulkova. Astron. Soc. Month. Not. VIII., 1847–48, pp. 50–52.

—— **76.** Corrections of the elements of the Moon's orbit, deduced from the lunar observations made at the Royal Observatory of Greenwich, from 1750 to 1830. Astron. Soc. Month. Not. VIII., 1847–48, pp. 181–187; Astron. Soc. Mem. XVII., 1849, pp. 21–58.

—— **77.** Elements of the orbit of Iris. Astr. Nachr. XXVI., 1848, col. 205–206.

—— **78.** Remarks on Prof. CHALLIS's "Theoretical determination of the velocity of sound." Phil. Mag. XXXII., 1848, pp. 339–343.

—— **79.** Substance of the lecture on the large reflecting telescopes of the Earl of ROSSE and Mr. LASSELL. Astron. Soc. Month. Not. IX., 1848–49, pp. 110–121.

—— **80.** On instruments adapted to the measure of small meridional Zenith distance. Astron. Soc. Month. Not. IX., 1848–49, pp. 175–189.

—— **81.** Observations of magnetic declination made at Greenwich. Astr. Nachr. XXVIII., 1849, col. 253–254.

—— **82.** On a change in the state of an eye affected with a malformation. [1846.] Camb. Phil. Soc. Trans. VIII., 1849, pp. 361–362.

—— **83.** Supplement to a paper "On the intensity of Light in the neighbourhood of a Caustic." [1848.] Camb. Phil. Soc. Trans. VIII., 1849, pp. 595–600.

—— **84.** On a difficulty in the problem of sound. Phil. Mag. XXXIV., 1849, pp. 401–405.

—— **85.** On the method of observing and recording Transits, lately introduced in America; and on some other connected subjects. Astron. Soc. Month. Not. X., 1849–50, pp. 26–34.

—— **86.** On the weights to be given to the separate results, and to the final results for Terrestrial Longitudes determined by the observations of transits of the moon and fixed stars. Astron. Soc. Month. Not. X., 1849–50, pp. 188–193; Astron. Soc. Mem. XIX., 1851, pp. 213–230.

—— **87.** On a question of Probabilities which occurs in the use of a fixed collimator for the verification of the constancy of position of an azimuth circle. Brit. Assoc. Rep. 1850 (*pt.* 2), pp. 1–2.

Airy, *George Biddell.* **88.** Results of observations made by the Rev. F. FALLOWS at the Cape of Good Hope, in the years 1829–31. Edinb. New Phil. Journ. XLIX., 1850, pp. 148–150.

—— **89.** On a problem of geodesy. Phil. Mag. XXXVI., 1850, pp. 96–99.

—— **90.** On the determination of the probable stability of an azimuthal circle by observations of stars, and of a permanent collimator. Astron. Soc. Month. Not. XI., 1850–51, pp. 140–147.

—— **91.** On the Vibration of a free Pendulum in an oval differing little from a straight line. Astron. Soc. Month. Not. XI., 1850–51, pp. 159-160; Astron. Soc. Mem. XX., 1851, pp. 121–130.

—— **92.** Elements of Victoria. Astr. Nachr. XXXI., 1851, col. 305–308.

—— **93.** Supplement to a paper "On the Regulation of the Clock-work for effecting uniform Movements of Equatoreals." [1850.] Astron. Soc. Mem. XX., 1851, pp. 115–120; Astron. Soc. Month. Not. XI., 1850–51, pp. 17–18.

—— **94.** On the relation of the direction of the Wind to the age of the Moon, as inferred from observations made at the Royal Observatory, Greenwich, from November 1840 to December 1847. Phil. Trans. 1851, pp. 411–412.

—— **95.** On the total Solar Eclipse of 1851 July 28. Roy. Inst. Proc. I., 1851–1854, pp. 62–68; Edinb. New Phil. Journ. LI., 1851, pp. 76–85.

—— **96.** On the results of recent calculations on the Eclipse of Thales and eclipses connected with it. Roy. Inst. Proc. I., 1851–1854, pp. 243–250.

—— **97.** On the determination of the longitude of the Observatory of Cambridge by means of galvanic signals. Astron. Soc. Month. Not. XIII., 1852–1853, pp. 248–252.

—— **98.** On the eclipses of Agathocles, Thales, and Xerxes. Phil. Trans. 1853, pp. 179–200.

—— **99.** On the difference of longitude between the Observatories of Brussels and Greenwich, as determined by galvanic signals. Astron. Soc. Month. Not. XIV., 1853–1854, pp. 246–249; Astron. Soc. Mem. XXIV., 1856, pp. 1–28.

—— **100.** Note respecting the recent Pendulum experiments in the Harton colliery. Astron. Soc. Month. Not. XV., 1854–1855, p. 46; Phil. Trans. 1856, pp. 297–356.

—— **101.** On the Pendulum experiments lately made in the Harton Colliery for ascertaining the mean density of the earth. Roy. Inst. Proc. II., 1854–1858, pp. 17–22; Annal. de Chimie, XLIII., 1855, pp. 381–383.

—— **102.** [Observations of daily temperatures referred to the meridian of the Sun's body.] Astr. Nachr. XXXIX., 1855, col. 337–340.

Airy, *George Biddell.* **103.** Correction of the compass in iron ships. (*Repr.*) Franklin, Inst. Journ. XXX., 1855, pp. 53–58, 118–120, 192–198, 317–325.

—— **104.** On the computation of the effect of the Attraction of mountain Masses, as disturbing the apparent astronomical latitude of stations in Geodetic Surveys. Phil. Trans. 1855, pp. 101–104; Astron. Soc. Month. Not. XVI., 1855–1856, pp. 42–43.

—— **105.** Remarks upon certain cases of Personal Equation which appear to have hitherto escaped notice, accompanied with a Table of results. Astron. Soc. Month. Not. XVI., 1855–1856, pp. 6–7.

—— **106.** Note on the occultation of stars by Saturn. Astron. Soc. Month. Not. XVI., 1855–1856, pp. 25–26.

—— **107.** On the occultations of the star Antares (α Scorpii) in the year 1856. Astron. Soc. Month. Not. XVI., 1855–1856, pp. 56–57.

—— **108.** On Professor Peirce's theory on the rejection of discordant observations. Gould, Astron. Journ. IV., 1856, pp. 137–138.

—— **109.** Discussion of the observed Deviations of the Compass in several ships, wood-built and iron-built; with a general table for facilitating the examination of Compass deviations. [1855.] Phil. Trans. 1856, pp. 53–100.

—— **110.** Account of Pendulum Experiments undertaken in the Harton Colliery for the purpose of determining the mean density of the Earth. Supplement to "Account of Pendulum Experiments in Harton Colliery," being an account of experiments undertaken to determine the correction for the temperature of the Pendulum. Phil. Trans. 1856, pp. 297–342, 343–356; Poggend. Annal. XCVII., 1856, pp. 599–605; Silliman, Journ. XXI., 1836, pp. 359–604; Bibl. Univ. Archives, XXXV., 1857, pp. 15–29.

—— **111.** The occultation of Jupiter on the 2nd of January, as observed at Greenwich. Astron. Soc. Month. Not. XVII., 1856–1857, pp. 71–72.

—— **112.** On a variable star. Astron. Soc. Month. Not. XVII., 1856–1857, p. 169.

—— **113.** On the means which will be available for correcting the measure of the sun's distance in the next twenty-five years. Astron. Soc. Month. Not. XVII., 1856–1857, pp. 208–222; Bibl. Univ. Archives, XXXV., 1857, pp. 266–279; Smithsonian Reports, 1860, pp. 284–297.

—— **114.** On ancient eclipses. Astron. Soc. Month. Not. XVII., 1856–57, pp. 233–235; Astron. Soc. Mem. XXVI., 1858, pp. 131–152.

—— **115.** Account of the construction of the new national Standard of Length and of its principal copies. Phil. Trans. 1857, pp. 621–702.

Airy, *George Biddell.* **116.** On the Eclipse of Agathocles, the Eclipse at Larissa, and the Eclipse of Thales. [1857.] Astron. Soc. Mem. XXVI., 1858, pp. 131–152; Astron. Soc. Month. Not. XVII., 1856–1857, pp. 243–244, 255.

—— **117.** On the mechanical conditions of the deposit of a submarine cable. Phil. Mag. XVI., 1858, pp. 1–18; Annal. Télégraph. III., 1860, pp. 473–496.

—— **118.** On Oltmann's calculation of the Eclipse of Thales. Astron. Soc. Mem. XXVII., 1859, pp. 31–38.

—— **119.** Note on the variable star numbered 83 in the Greenwich Catalogue of 1,576 stars for 1850, whose variability was discovered by Mr. Hind. Astron. Soc. Month. Not. XIX., 1859, pp. 53–54.

—— **120.** On the movement of the Solar System in space. Astron. Soc. Month. Not. XIX., 1859, pp. 174–179; Astron. Soc. Mem. XXVIII., 1860, pp. 143–172.

—— **121.** On the apparent projection of stars upon the Moon's disk in Occultations. Astron. Soc. Month. Not. XIX., 1859, pp. 208–212; Astron. Soc. Mem. XXVIII., 1860, pp. 173–186.

—— **122.** Observations of the Occultation of Saturn by the Moon, made at the Royal Observatory, Greenwich, 1859, May 8th. Astron. Soc. Month. Not. XIX., 1859, pp. 239–244.

—— **123.** On the present state and history of the question respecting the Acceleration of the Moon's motion. Brit. Assoc. Rep. 1859 (*pt.* 2), pp. 29–30.

—— **124.** Remarks on Mr. Cayley's trigonometrical theorem, and on Prof. Challis's proof that equations have as many roots, &c. Phil. Mag. XVII., 1859, pp. 176–177.

—— **125.** Approximate reductions of the places of several of the small planets obtained from meridional observations. Astr. Nachr. LII., 1860, col. 193–194.

—— **126.** Comparison of Burckhardt's and Hansen's Lunar Tables, with the Greenwich Observations from 1847–1858. Astron. Soc. Month. Not. XX., 1860, pp. 321–327.

—— **127.** On the connexion between the mode of building Iron Ships, and the ultimate correction of their compasses. Naval Architects, Trans. I., 1860, pp. 105–109.

—— **128.** Corrections of the Elements of the Moon's Orbit deduced from the Lunar Observations made at the Royal Observatory of Greenwich from 1750 to 1851. Being an extension of a preceding Memoir, entitled "Corrections of the elements of the Moon's orbit, deduced from the lunar observations made at the Royal Observatory of Greenwich from 1750 to 1830." [1859.] Astron. Soc. Mem. XXIX., 1861, pp. 1–24.

Airy, *George Biddell.* **129.** Results of meridional observations of small Planets and occultations of Stars by the Moon, observed at the Royal Observatory, Greenwich, from June to October 1860. Astron. Soc. Month. Not. XXI., 1861, pp. 27–32.

—— **130.** Results of observations of the Solar Eclipse of 1860, July 18, made at the Royal Observatory, Greenwich, for determination of the errors of the tabular elements of the Eclipse. Astron. Soc. Month. Not. XXI., 1861, pp. 153–157.

—— **131.** Suggestion of a new astronomical instrument for which the name "Orbit Sweeper" is proposed. Astron. Soc. Month. Not. XXI., 1861, pp. 158–163.

—— **132.** On spontaneous terrestrial Galvanic Currents. Brit. Assoc. Rep. 1861 (*pt.* 2), pp. 35–36.

—— **133.** On the laws of the principal inequalities, Solar and Lunar, of terrestrial Magnetic Force in the horizontal plane, from observations at the Royal Observatory, Greenwich, extending from 1848 to 1857. Brit. Assoc. Rep. 1861 (*pt.* 2), pp. 36–37.

—— **134.** On a supposed failure of the Calculus of Variations. Phil. Mag. XXII., 1861, pp. 12–14.

—— **135.** Explanation of a Projection by balance of errors for Maps applying to a very large extent of the earth's surface, and comparison of this projection with other projections. Phil. Mag. XXII., 1861, pp. 409–421.

—— **136.** On a result deduced by M. D'Abbadie from observations of the total Solar Eclipse of 1860, July 18. Astron. Soc. Month. Not. XXII., 1862, pp. 3–6.

—— **137.** On the circularity of the Sun's disk. Astron. Soc. Month. Not. XXII., 1862, pp. 79–82; Phil. Mag. XXII., 1861, pp. 532–536.

—— **138.** On the strains in the interior of Beams. Brit. Assoc. Rep. 1862, pp. 82–86; Phil. Mag. XXIII., 1862, pp. 25–28; Phil. Trans. 1863, pp. 49–80.

—— **139.** On the direction of the joints in the faces of Oblique Arches. Phil. Mag. XXIII., 1862, pp. 25–28.

—— **140.** Report on Steam-boiler explosions. Brit. Assoc. Rep. 1863, pp. 686–688.

—— **141.** On the difference in the magnetic properties of hot-rolled and cold-rolled malleable Iron, as regards the power of receiving and retaining induced Magnetism of sub-permanent character. Phil. Trans. 1862, pp. 273–288.

—— **142.** On the diurnal inequalities of Terrestrial Magnetism, as deduced from observations made at the Royal Observatory, Greenwich, from 1841 to 1847. Phil. Trans. 1863, pp. 309–316.

Airy, *George Biddell.* **143.** First analysis of one hundred and seventy-seven storms, registered by the Magnetic Instruments in the Royal Observatory, Greenwich, from 1841 to 1857. Phil. Trans. 1863, pp. 617–648.

Airy, *G. B.*, and *Thomas* **Catton.** Reduction of the observations of eclipses of Jupiter's Satellites; occultations of stars by the Moon, and other astronomical phenomena, made by the Rev. Thomas Catton. [1853.] Astron. Soc. Mem. XXII., 1854, pp. 1–32.

Airy, *G. B.*, and *J. F.* **Encke.** On a new method of computing the perturbations of planets (with Notes by the Astronomer Royal). Naut. Alm. 1856, *App.* 1–33.

Airy, *G. B.*, **Herschel,** and **Smyth.** Report on the fluid-lens telescope constructed for the Royal Society on Mr. Barlow's principles. Roy. Soc. Proc. III., 1833, pp. 245–253.

Airy *G. B.*, et **Le Verrier.** Nouvelle détermination de la différence de longitude entre les Observatoires de Paris et Greenwich. Paris, Comptes Rendus, XXXIX., 1854, pp. 552–566.

Aitken, *William.* On the effects of twelve weeks' residence in Bulgaria (during the months of June, July, and August 1854), on the subsequent health of the British troops in the Crimea. Med. Chir. Soc. Trans. XL., 1857, pp. 179–200.

Aracri, *Gregorio.* Altra relazione della pioggia di cenere avvenuta in Calabria ulteriore. Napoli, Atti Soc. Pontan. I., 1810, pp. 167–170.

Aradas, *Andrea.* Prospetto della storia della Zoologia di Sicilia, del secolo XIX., movendo da quello del chiarissimo Sig^r Bar. Andrea Bivona. Catania, Atti Acc. Gioen. I., 1844, pp. 365–398 ; II., 163–199 ; V., 1848, pp. 55–90, 269–287 ; VI., 17–37 ; VII., 83–105.

—— **2.** Cenno di due generi Malacologici non riportati finora come Siciliani, e descrizione di una nuova conchiglia fossile di Sicilia. Catania, Atti Acc. Gioen. II., 1845, pp. 435–441.

—— **3.** Descrizione di varie specie nuove di conchiglie viventi e fossili della Sicilia. Catania, Atti Acc. Gioen. III., 1846, pp. 157–184.

—— **4.** Continuazione della descrizione di varie specie nuove Malacologiche della Sicilia. Catania, Atti Acc. Gioen. III., 1846, pp. 233–248.

—— **5.** Osservazioni ed aggiunte alla Fauna dei Molluschi della Sicilia del chiarissimo Sig. Rodolfo Amando Philippi : parte I. Catania, Atti Acc. Gioen. III., 1846, pp. 411–429.

—— **6.** Descrizione delle conchiglie fossili di Gravitelli presso Messina. Catania, Atti Acc. Gioen. IV., 1847, pp. 57–88.

—— **7.** Memoria III. che contiene la descrizione di alcuni Molluschi nudi della Sicilia. Catania, Atti Acc. Gioen. IV., 1847, pp. 107–122.

Aradas, *Andrea.* **8.** Monografia degli Echinidi viventi e fossili di Sicilia.—Parte 1^a, famiglia 1^a : Spatanghi. [1849.] Catania, Atti Acc. Gioen. VI., 1850, pp. 53–96, 189–216 ; VII., 229–247 ; VIII., pp. 149–178, 371–394 ; X., 215–227.

—— **9.** Monografia del genere Coronula e descrizione di alcune altre nuove specie di Conchiglie Siciliane. [1853.] Catania, Atti Acc. Gioen. IX., 1854, pp. 57–72.

—— **10.** Prospetto di una nuova Fauna dei Molluschi, Cirropèdi, Echinodermi ed altri Zoofiti viventi e fossili della Sicilia, con una nuova distribuzione geografica di questi animali. Catania, Atti Acc. Gioen. XI., 1855, pp. 77–87.

—— **11.** Osservazioni di Zoologia Siciliana.—Memoria 1^a, che contiene la descrizione di alcune Conchiglie fossili di Pachino. [1858.] Catania, Atti Acc. Gioen. XV., 1860, pp. 285–300.

Arago, *Dominique François Jean.* Mémoire sur une modification remarquable qu'éprouvent les rayons lumineux dans leur passage à travers certains corps diaphanes d'optique. Paris, Mém. de l'Inst. 1811 (*pte.* 1.), pp. 93–134 ; Paris, Soc. Philom. Bull. II., 1811, pp. 371–375, 387–389 ; Gilbert, Annal. XL., 1812, pp. 145–161.

—— **2.** Note sur un phénomène remarquable qui s'observe dans la diffraction de la lumière. Annal. de Chimie, I., 1816, pp. 199–202.

—— **3.** Remarques sur l'influence mutuelle de deux faisceaux lumineux qui se croisent sous un très-petit angle. Annal. de Chimie, I., 1816, pp. 332–334.

—— **4.** Remarques sur les Cercles Répétiteurs. Conn. des Temps, 1816, pp. 345–358.

—— **5.** Sur la diffraction. Paris, Soc. Philom. Bull. 1816, pp. 56–57.

—— **6.** Sur les couleurs des lames minces. Arcueil, Mém. de Phys. III., 1817, pp. 323–370.

—— **7.** Sur la prétendue détérioration du climat de l'Europe. Annal. de Chimie, IX., 1818, pp. 292–303.

—— **8.** Nouveaux détails sur les phénomènes que présentent maintenant les mers polaires. Annal. de Chimie, VIII., 1818, pp. 328–336.

—— **9.** Sur les variations diurnes de l'aiguille aimantée. Annal. de Chimie, X., 1819, pp. 119–123.

—— **10.** Sur les neiges rouges. Annal. de Chimie, XII., 1819, pp. 72–88.

—— **11.** Quelques nouveaux détails sur le passage de la comète découverte dans le mois de Juillet 1819, devant le disque du soleil. Annal. de Chimie, XIII., 1820, pp. 104–110.

—— **12.** Sur la température de l'intérieur du globe. Annal. de Chimie, XIII., 1820, pp. 183–190 ; Schweigger, Journ. XXIX., 1820, pp. 377–380.

Arago, *Dominique François Jean.* **13.** Expériences relatives à l'aimantation du fer et de l'acier par l'action du courant voltaïque. Annal. de Chimie, XV., 1820, pp. 93–103 ; Gilbert, Annal. LXVI., 1820, pp. 311–324.

—— **14.** Sur les variations annuelles de l'aiguille aimantée. Annal. de Chimie, XVI., 1821, pp. 54–67.

—— **15.** Examen des remarques de M. Biot [sur la couleur des lames minces]. Annal. de Chimie, XVII., 1821, pp. 258–273.

—— **16.** Sur une matière gélatineuse tombée de l'atmosphère. Annal. de Chimie, XIX., 1821, p. 67.

—— **17.** Sur le tremblement de terre du 19 Févr. 1822. Annal. de Chimie, XIX., 1821, pp. 106–110.

—— **18.** Résultats des expériences faites, par ordre du Bureau des Longitudes, pour la détermination de la vitesse du son dans l'atmosphère. Conn. des Temps, 1822, pp. 361–371 ; Annal. de Chimie, XX., 1822, pp. 210–223 ; Quart. Journ. Sci. XIV., 1823, p. 433 ; Froriep, Notizen, III., 1823, col. 257–260.

—— **19.** Remarques relatives aux résultats que M. Daniell a publiés sur le rayonnement de la chaleur dans l'atmosphère. Annal. de Chimie, XXVI., 1824, pp. 375–386 ; Quart. Journ. Sci. XVIII., 1825, pp. 384–385.

—— **20.** An account of the volcanos at present in activity. (*Transl.*) Thomson, Ann. Phil. VII., 1824, pp. 201–214.

—— **21.** L'action que les corps aimantés et ceux qui ne le sont pas exercent les uns sur les autres. Annal. de Chimie, XXVIII., 1825, p. 325 ; Quart. Journ. Sci. XIX., 1825, pp. 336–337.

—— **22.** Nouvelles remarques sur le rayonnement de la chaleur dans l'atmosphère, en réponse à M. J. F. Daniell. Annal. de Chimie, XXIX., 1825, pp. 63–75.

—— **23.** Polarisation de la lumière d'un halo. Annal. de Chimie, XXIX., 1825, p. 377 ; Quart. Journ. Sci. XX., 1826, pp. 167–168.

—— **24.** Influence des Aurores Boréales sur l'aiguille aimantée. Annal. de Chimie, XXX., 1825, pp. 423–427; Mag. f. Naturvid. VII., 1826, pp. 112–121.

—— **25.** Extrait du Rapport sur le Voyage de Découvertes, exécuté sous le commandement de M. Duperrey. Ann. Sci. Nat. VI., 1825, pp. 206–221.

—— **26.** Sur la pluie. Paris, Bureau d. Long. Ann. 1825, pp. 152–155.

—— **27.** Sur l'état thermométrique du globe. Paris, Bureau d. Long. Ann. 1825, pp. 155–164; Froriep, Notizen, IX., 1825, col. 225–233.

—— **28.** Température moyenne du pôle nord. Paris, Bureau d. Long. Ann. 1825, pp. 186–189.

Arago, *Dominique François Jean.* **29.** Sur la forme singulière de la Comète de 1823. Paris, Bureau d. Long. Ann. 1825, pp. 190–191.

—— **30.** Sur la découverte d'une nouvelle action magnétique. Paris, Soc. Philom. Bull. 1825, pp. 5–6; Quart. Journ. Sci. XIX., 1825, p. 147; Edinb. Journ. Sci. V., 1826, pp. 328–330; Froriep, Notizen, X., 1825, col. 257–259 ; Mag. f. Naturvid. VI., 1825, pp. 239–243.

—— **31.** Note concernant les phénomènes magnétiques auxquels le mouvement donne naissance. Annal. de Chimie, XXXII., 1826, pp. 213–223; Quart. Journ. Sci. XXII., 1827, pp. 193–196, 405; Poggend. Annal. VII., 1826, pp. 385–393.

—— **32.** Note sur de nouvelles actions magnétiques dues au mouvement de rotation. Paris, Soc. Philom. N. Bull. 1826, pp. 85–86 ; Froriep, Notizen, XIII., 1826, col. 145–146; XV., 113–115.

—— **33.** Sur les changements du zero dans les Thermomètres. Annal. de Chimie, XXXIII., 1827, pp. 422–425 ; Quart. Journ. Sci. I., 1827, pp. 475–476.

—— **34.** Sur les dépressions de l'horizon de la mer. Conn. des Temps, 1827, pp. 316–323.

—— **35.** Sur les opérations géodésiques exécutées in Italie par les Ingénieurs-géographes Français. Conn. des Temps, 1827, pp. 385–391.

—— **36.** Sur les observations de pendule faites pendant le premier voyage du Capitaine Parry. Conn. des Temps, 1827, pp. 392–394.

—— **37.** Sur la Lune Rousse. Eure, Journ. d'Agric. IV., 1827, pp. 139–142 ; Paris, Bureau d. Long. Ann., 1827, pp. 162–165 ; Quart. Journ. Sci. II., 1827, p. 222 ; Belg. Soc. Centr. Agric. Journ. II., 1855, pp. 187–189.

—— **38.** De la rosée. Paris, Bureau d. Long. Ann. 1827, pp. 165–198.

—— **39.** Sur le nouveau système d'éclairage des phares adopté en France. Examen d'une Réclamation que le Dr. Brewster vient de faire à ce sujet. Annal. de Chimie, XXXVII, 1828, pp. 392–409.

—— **40.** Sur les influences magnétiques exercées par les Aurores Boréales, et sur la prétendue découverte que M. Brewster annonce avoir faite à ce sujet. Annal. de Chimie, XXXIX., 1828, pp. 369–390 ; Poggend. Annal. XII., 1828, pp. 320–327 ; Quart. Journ. Sci. I., 1827, p. 229.

—— **41.** Sur des Arcs-en-ciel extraordinaires. Annal. de Chimie, XXXIX., 1828, p. 430; Poggend. Annal. XV., 1829, pp. 537–538.

—— **42.** Rapport fait à l'Acad. des Sci. sur le voyage [de la Coquille] de découvertes, exécuté dans les années 1822–1825, sous le commandement de M. Duperrey. Conn. des Temps, 1828, pp. 240–272.

Arago, *Dominique François Jean.* **43.** Sur les étoiles multiples. Conn. des Temps, 1828, pp. 297–310 ; Paris, Bureau d. Long. Ann. 1834, pp. 241–310 ; Edinb. New Phil. Journ. XVII., 1834, pp. 1–42.

—— **44.** Sur le rayonnement nocturne. Paris, Bureau d. Long. Ann. 1828, pp. 145–152.

—— **45.** Sur les brouillards qui se forment après le coucher du soleil, quand le tems est calme et serein, au bord des lacs et des rivières. Paris, Bureau d. Long. Ann. 1828, pp. 168–172.

—— **46.** Comment la neige empêche la gelée de descendre profondément dans la terre qu'elle recouvre. Paris, Bureau d. Long. Ann. 1828, pp. 172–174.

—— **47.** De la congélation des rivières. Paris, Bureau d. Long. Ann. 1828, pp. 174–176.

Arndt, *C. F.* **2.** Geometrische Untersuchungen über Potenzlinie, Potenzcentrum, und Potenzkreis, Polarität, Aehnlichkeitspunkte, und Aehnlichkeitsaxen. Grunert, Archiv, V., 1844, pp. 113–151.

Arndt, *Friedrich.* Beweis eines arithmetischen Lehrsatzes. Grunert, Archiv, III., 1843, pp. 210–213.

—— **2.** Novi alicujus theorematis arithmetici commentatio analytica. Grunert, Archiv, III., 1843, pp. 256–258.

—— **3.** Entwickelung der höheren Integrale von log. $x.\ dx$, nebst einer Anwendung auf die Summirung einer Reihe. Grunert, Archiv, IV., 1844, pp. 436–440.

—— **4.** Entwickelung der Functionen $\frac{\cos nx}{\cos x^n}$ und $\frac{\sin nx}{\cos x^n}$ in Reihen, die nach den Potenzen von tang. x aufsteigen, mit Hülfe des Maclaurinschen Theorems. Grunert, Archiv, IV., 1844, pp. 441–445.

—— **5.** Eine neue analytische Gleichung, und deren Anwendung auf die Bestimmung eines vielfachen Integrals und die Summirung einer Reihe. Grunert, Archiv, V., 1844, pp. 443–447.

—— **6.** Allgemeines Kriterium für die Fälle, in welchen die Logarithmen rationale Brüche sind, nebst einer Methode, die letztern aufzufinden. Grunert, Archiv, VI., 1845, pp. 57–62.

—— **7.** Allgemeiner Beweis der bekannten Ausdrücke für sin $(\alpha \pm \beta)$ und cos $(\alpha \pm \beta)$. Grunert, Archiv, VI., 1845, pp. 95–101.

—— **8.** Ueber bestimmte Integrale und Summirung einiger Reihen. Grunert, Archiv, VI., 1845, pp. 187–194.

—— **9.** Bemerkung zu einer Stelle im Archiv, Theil V. s. 220. Grunert, Archiv, VI., 1845, pp. 333–334; VIII., p. 111.

—— **10.** Disquisitiones de congruentiis omnium graduum et residuis ordinis cujuscunque. Grunert, Archiv, VI., 1845, pp. 380–399.

—— **11.** Ueber bestimmte Integrale. Grunert, Archiv, VI., 1845, pp. 434–439.

—— **12.** Ueber die Summirung der beiden Reihen

$$(a)\ \gamma_0 - n_1\gamma_1 + n_2\gamma_2 - \text{etc.} + (-1)^n \gamma_n$$
$$(b)\ \gamma_0 + n_1\gamma_1 + n_2\gamma_2 + \text{etc.} + \gamma_n.$$

in welchen die Grössen γ willkührlich und die Coefficienten Binomialcoefficienten des ganzen Exponenten n sind, mittels höherer Differenzen und Summen. Crelle, Journ. XXXI., 1846, pp. 235–246.

—— **13.** Nova solutio problematis determinandi multitudinem numerorum, qui ad numerum aliquem sint primi eoque minores. Crelle, Journ. XXXI., 1846, pp. 246–248.

Arndt, *Friedrich.* **14.** Entwickelung der Summe der n-ten Potenzen der naturlichen Zahlen nach den Potenzen des Index mittelst des Taylorschen Lehrsatzes. Crelle, Journ. XXXI., 1846, pp. 249–252.

—— **15.** Ueber die Bernouillische Methode summirbare Reihen zu finden. Crelle, Journ. XXXI., 1846, pp. 253–258.

—— **16.** Nova methodus determinandi multitudinem radicum congruentiæ

$$x^t \equiv 1 \text{ (mod. } M).$$

aliaque ad hanc materiam spectantia. Crelle, Journ. XXXI., 1846, pp. 259–268.

—— **17.** Demonstratio duorum theorematum Gaussianis his generaliorum :—

1. Productum ex omnibus radicibus primitivis moduli imparis p unitate sec. p congruum est, excepto casu in quo $p=3$.

2. Summa omnium radicum primitivarum moduli primi imparis p est $\equiv 0$, quando $p-1$ per quadratum aliquod divisibilis est; quando vero per nullum quadratum divisibilis, summa est $\equiv \pm 1$, prout multitudo factorum ipsius $p-1$ primorum est *par* aut *impar*. Crelle, Journ. XXXI., 1846, pp. 326–328.

—— **18.** Demonstratio nova theorematis Wilsoniani a summo Gauss hoc modo generalius enunciati :—"Productum omnium numerorum ad numerum quemcunque M primorum eoque inferiorum unitati negativæ aut positivæ sec. M congruum est ; et quidem negative sumenda est unitas, quando M potestas numeri primi imparis vel ejus duplum, vel denique 4, positive autem in omnibus casibus reliquis." Crelle, Journ. XXXI., 1846, pp. 329–332.

—— **19.** Disquisitiones de residuis cujusvis ordinis. Crelle, Journ. XXXI., 1846, pp. 333–342.

—— **20.** Bemerkungen über die Verwandlung der irrationalen Quadratwurzel in einen Kettenbruch. Crelle, Journ. XXXI., 1846, pp. 343–358.

—— **21.** Analytische Behandlung einiger die Linien zweiten Grades betreffenden Gegenstände. Grunert, Archiv, VIII., 1846, pp. 342 352.

—— **22.** Bemerkungen zu den im Archiv, Theil. VIII., s. 213–214, von Herrn Dr. Dienger aufgestellten Theoremen I. . . . V. Grunert, Archiv, VIII., 1846, pp. 383–386.

—— **23.** Ein neues Theorem von den Linien zweiten Grades :—"Die Quadratsumme der reciproken Werthe zweier auf einander senkrechten Durchmesser bei einem Kegelschnitt (Ellipse und Hyperbel) ist constant, nämlich bei der Ellipse der Quadratsumme, bei der Hyperbel der Quadratdifferenz der reciproken Werthe der Axen gleich." Grunert, Archiv, VIII., 1846, pp. 395–399.

Arndt, *Friedrich.* **24.** Bemerkungen zu einer gewissen Methode, die Gleichung eines durch vier Puncte gehenden Kegelschnitts auszudrücken. Crelle, Journ. XXXV., 1847, pp. 83–92.

—— **25.** Bemerkungen über die Kurve der Krümmungsmittelpunkte. Grunert, Archiv, IX., 1847, pp. 68–72.

—— **26.** Beweis eines Theorems von den Kegelschnitten. Grunert, Archiv, IX., 1847, pp. 72–74.

—— **27.** Ueber einige bestimmte Integrale. Grunert, Archiv, X., 1847, pp. 225–232.

—— **28.** Ueber einige bestimmte Integrale, welche sich auf die beiden Integrale $\int_{\infty}^{p} \frac{e^{-x}\,\delta x}{x}$ $\int_{\infty}^{p} \frac{\cos x}{x}\,\delta x$. zuruck führen lassen. Grunert, Archiv, X., 1847, pp. 233–240.

—— **29.** Ueber eine gewisse Klasse bestimmter Integrale, bei welchen die Function unter dem Integralzeichen für einen Werth der Veränderlichen zwischen den Integrationsgrenzen unendlich wird. Grunert, Archiv, X., 1847, pp. 240–246.

—— **30.** Ueber die Integrale $\int_{0}^{\infty} \frac{e^{-bx}\,\delta x}{x^2-a^2}$ und $\int_{0}^{\infty} \frac{xe^{-bx}\,\delta x}{x^2-a^2}$. Grunert, Archiv, X., 1847, pp. 247–250.

—— **31.** Ueber einen von Gauss gefundenen Ausdruck der Gammafunction. Grunert, Archiv, X., 1847, pp. 250–253.

—— **32.** Zwei Entwickelung des bestimmten Integrals $\int_{0}^{1} \left(\frac{x^{a-1}}{1-x} - \frac{nx^{na-1}}{1-x^n}\right) \delta x$. Grunert, Archiv, X., 1847, pp. 253–259.

—— **33.** Entwickelung bestimmter Integrale. Grunert, Archiv, XI., 1848, pp. 70–88.

—— **34.** Untersuchungen über die Theoreme von Cotes und Moivre. Grunert, Archiv, XI., 1848, pp. 181–196.

—— **35.** Ueber die numerische Bestimmung der Constante des Integrallogarithmus. Grunert, Archiv, XI., 1848, pp. 315–328.

—— **36.** Untersuchungen über einige unbestimmte Gleichungen zweiten Grades, und über die Verwandlung der Quadratwurzel aus einem Bruche in einen Kettenbruch. Grunert, Archiv, XII., 1849, pp. 211–276.

—— **37.** Beitrag zur Theorie der quadratischen Formen. Grunert, Archiv, XIII., 1849, pp. 105–112.

—— **38.** Démonstration des formules de M. Gauss dans la Trigonométrie sphérique. Grunert, Archiv, XIII., 1849, pp. 159–162.

—— **39.** Mémoire sur la théorie des formes quadratiques. Grunert, Archiv, XIII., 1849, pp. 410–418.

Arndt, *Friedrich.* **40.** Beiträge zur Theorie der quadratischen Formen. Grunert, Archiv, XV., 1850, pp. 429–478.

—— **41.** Versuch einer Theorie der homogenen Funktionen des dritten Grades mit zwei Variabeln. Grunert, Archiv, XVII., 1851, pp. 1–53.

—— **42.** Ein Satz über binare Formen von beliebigen Grade und Anwendung desselben auf biquadratische Formen. Grunert, Archiv, XVII., 1851, pp. 409–420.

—— **43.** Untersuchung der biquadratischen Formen. Grunert, Archiv, XVIII., 1852, pp. 111–119.

—— **44.** Ueber eine Aufgabe in der Kreistheilung. Grunert, Archiv, XVIII., 1852, pp. 461–474.

—— **45.** Untersuchungen über die Anzahl der kubischen Klassen, welche zu einer determinirenden quadratischen Klasse gehören. Grunert, Archiv, XIX., 1852, pp. 408–418.

—— **46.** Bemerkungen zur Convergenz der unendlichen Reihen. Grunert, Archiv, XX., 1853, pp. 43–58.

—— **47.** Neues Theorem über den Grenzübergang in unendlichen Reihen. Grunert, Archiv, XX., 1853, pp. 461–465.

—— **48.** Ueber die Convergenz der unendlichen Produkte nebst einigen Theoremen über die Convergenz gewisser unendlicher Reihen. Grunert, Archiv, XXI., 1853, pp. 78–90.

—— **49.** Ueber Convergenz und Stetigkeit der Potenzreihen. Grunert, Archiv, XXV., 1855, pp. 211–218.

—— **50.** Zur Theorie der binären kubischen Formen. Crelle, Journ. LIII., 1857, pp. 309–321.

—— **51.** Tabellarische Berechnung der reducirten binären kubischen Formen und Klassification derselben für alle successiven negativen Determinanten $(-D)$ von $D = 3$ bis $D = 2000$. [1851.] Grunert, Archiv, XXXI, 1858, pp. 335–448.

—— **52.** Auflösung einer Aufgabe in der Composition der quadratischen Formen. Crelle, Journ. LVI., 1859, pp. 64–71.

—— **53.** Ueber die Anzahl der Genera der quadratischen Formen. Crelle, Journ. LVI., 1859, pp. 72–78.

—— **54.** Bemerkung zu den Formeln von Dirichlet durch welche die Klassenzahl bei positiver Determinante ausgedrückt wird. Crelle, Journ. LVI., 1859, p. 100.

—— **55.** Einfacher Beweis fur die Irreductibilität einer Gleichung in der Kreistheilung. Crelle, Journ. LVI., 1859, pp. 178–181.

Arndt, *J. A.* Ueber die Verwandlung eines gewöhnlichen Bruches in einen Decimalbruch. Grunert, Archiv, I., 1841, p. 101.

—— **30.** La Caille's Catalogue of 398 principal Stars; together with a Comparison of the Places of such as are visible in this Latitude with those given by Bradley; and a Reference to every Observation of every Star. Astron. Soc. Mem. V., 1833, pp. 93–124; Astron. Soc. Month. Not. II., 1831–33, pp. 33–34.

—— **31.** On the proper motion of the Fixed Stars; with a list of those which are known, or supposed, to be affected by such a motion. Astron. Soc. Mem. V., 1833, pp. 147–170; Astron. Soc. Month. Not. II., 1831–33, pp. 47–48.

—— **32.** Report on the Pendulum Experiments made by the late Captain Henry Foster, R.N., in his scientific Voyage in the Years 1828–1831, with a view to determine the Figure of the Earth. Astron. Soc. Mem. VII., 1834, pp. 1–378; Astron. Soc. Month. Not. III., 1833–36, pp. 1–3.

—— **33.** Some particulars relative to the life and writings of the late Mr. Flamsteed, never yet published. Astron. Soc. Month. Not. III., 1833–36, pp. 4–11.

—— **34.** Some account of the transit of Mercury over the sun, observed by Mr. Abraham Sharp in the year 1707. Astron. Soc. Month. Not. III., 1833–36, pp. 105–107.

—— **35.** Report on the Standard Scale of the Royal Astronomical Society:—1. A Short History of the Standard Measures of this Country. 2. Description of the New Standard Scale and Apparatus. 3. Description of the different Standard Measures compared. 4. Method of conducting the Experiments. 5. Verification of the Society's New Standard Scale. 6. On the personal Equation of the Imperial Standard Yard. 7. On the Results of the several Comparisons. Astron. Soc. Mem. IX., 1836, pp. 35–184; Astron. Soc. Month. Not. III., 1833–36, pp. 179–183.

Baily, *Francis.* **36.** Some account of the Astronomical Observations made by Dr. HALLEY at the Royal Observatory of Greenwich. Astron. Soc. Mem. VIII., 1835, pp. 169–190; Astron. Soc. Month. Not. III., 1833–36, pp. 63–65.

—— **37.** Report on the comparative measurement of the Aberdeen Standard Scale. Brit. Assoc. Rep. 1835, pp. 91–92.

—— **38.** Occultation of Mars by the Moon on 18 February, 1837. Astron. Soc. Month. Not. IV., 1836–39, pp. 65–66.

—— **39.** On the non-existence of the star 42 Virginis. Astron. Soc. Month. Not. IV., 1836–39, pp. 85–87.

—— **40.** On the repetition of the CAVENDISH experiment for determining the mean density of the Earth. Astron. Soc. Month. Not. IV., 1836–39, pp. 96–97.

—— **41.** An account of some experiments on two new invariable pendulums. Astron. Soc. Month. Not. IV., 1836–39, pp. 141–143.

—— **42.** On PTOLEMY's catalogue of stars. Astron. Soc. Month. Not. IV., 1836–39, pp. 197–201.

—— **43.** Description of a new Barometer recently fixed up in the apartments of the Royal Society; with remarks on the mode hitherto pursued at various periods, and an account of that which is now adopted, for correcting the observed height of the Mercury in the Society's barometers. Phil. Trans. 1837, pp. 431–442.

—— **44.** On a remarkable phenomenon that occurs in Total and Annular Eclipses of the Sun. Astron. Soc. Mem. X., 1838, pp. 1–42; Astron. Soc. Month. Not. IV., 1836–39, pp. 15–19; Bibl. Univ. X., 1837, pp. 383–387.

—— **45.** An account of some experiments with the torsion Rod, for determining the mean Density of the Earth. [1842.] Astron. Soc. Mem. XIV., 1843; Astron. Soc. Month. Not. V., 1839–43, pp. 188–196, 197–206; Annal. de Chimie, V., 1842, pp. 338–353; Bibl. Univ. XLIII., 1843, pp. 177–181; Phil. Mag. XXI., 1842, pp. 111–121; Poggend. Annal. LVII. 1842, pp. 453–467.

—— **46.** On a revision of the boundaries of the Constellations, as usually drawn on Celestial Maps and Globes. Astron. Soc. Month. Not. V., 1839–43, pp. 279–286.

—— **47.** An account of some experiments made in London and at two Stations on the River Euphrates, with the two Pendulums belonging to this Society, and with one of KATER's Invariable Pendulums. [1840.] Astron. Soc. Mem. XII., 1842, pp. 61–82; Astron. Soc. Month. Not. V., 1839–43, p. 58.

Baily, *Francis.* **48.** An account of some experiments made in London and at the Cape of Good Hope, with one of KATER's Invariable Pendulums. [1840.] Astron. Soc. Mem. XII., 1842, pp. 83–102; Astron. Soc. Month. Not. V., 1839–43, pp. 63–64.

—— **49.** The Catalogues of PTOLEMY, ULUGH BEIGH, TYCHO BRAHÉ, HALLEY, and HEVELIUS, deduced from the best authorities; with various notes and corrections, and a Preface to each Catalogue. Astron. Soc. Mem. XIII., 1843, pp. 1–248.

—— **50.** Some remarks on the Total Eclipse of the Sun, on July 8th, 1842. Astron. Soc. Mem. XV., 1846, pp. 1–8; Astron. Soc. Month. Not. V., 1839–43, pp. 208–214.

Baily, *J.* On the isthmus between the Lake of Granada and the Pacific. Geogr. Soc. Journ. XIV., 1844, pp. 127–129.

Baily, *William H.* Description of some Cretaceous Fossils from South Africa. Geol. Soc. Journ. XI., 1855, pp. 454–465.

—— **2.** On Fossils from the Crimea. Brit. Assoc. Rep. 1856 (*pt.* 2), pp. 60–63; Nat. Hist. Review, VI., 1859 (*Proc.*), pp. 191–198.

—— **3.** On a Crustacean from the coal-measures, with some remarks on the genus Limulus. Dublin, Journ. Geol. Soc. VIII., 1857–60, pp. 89–91; Nat. Hist. Review, V., 1858 (*Proc.*), pp. 168–171.

—— **4.** Notice of Upper Silurian fossils from Ballycar South, county of Clare. Dublin, Journ Geol. Soc. VIII., 1857–60, pp. 109–110; Nat. Hist. Review, VI., 1859 (*Proc.*), pp. 72–73.

—— **5.** On fossil localities near Drogheda. Dublin, Journ. Geol. Soc. VIII., 1857–60, pp. 120–125.

—— **6.** On the occurrence of detached plates of the shell of a new species of Chiton in the carboniferous limestone at Lisbane, county of Limerick. Dublin, Journ. Geol. Soc. VIII., 1857–60, pp. 167–171; Nat. Hist. Review, VI., 1859 (*Proc.*), pp. 330–334.

—— **7.** On Corynepteris, a new generic form of fossil Fern; with observations on the associated plants from the coal-measures of Glin, county of Limerick. Dublin, Journ. Geol. Soc. VIII., 1857–60, pp. 237–241; Brit. Assoc. Rep. 1857 (*pt.* 2), pp. 63–64; Nat. Hist. Review, VII., 1860 (*Proc.*), pp. 258–262.

—— **8.** On the fructification of Cyclopteris Hibernica, *Forbes*, from the Upper Devonian or Lower Carboniferous strata at Kiltorkan Hill, county Kilkenny. Brit. Assoc. Rep. 1858 (*pt.* 2), pp. 75–76.

—— **9.** On two new species of Crustacea (Bellinurus, *Kœnig*), from the coal measures in Queen's County, Ireland; and some Remarks on forms allied to them. Brit. Assoc. Rep. 1858 (*pt.* 2), pp. 76–77; Ann. Nat. Hist. XI., 1863, pp. 107–114.

Baily, *William H.* **10.** On carboniferous limestone fossils from Limerick Co. Brit. Assoc. Rep. 1857 (*pt.* 2), pp. 62–63.

—— **11.** Description of fossil Invertebrata from the Crimea. Geol. Soc. Journ. XIV., 1858, pp. 133–163; Dublin Soc. Journ. II., 1858–59, pp. 233–240.

—— **12.** On Sphenopteris Hookeri, a new Fossil Fern from the Upper Old Red Sandstone formation at Kiltorkan Hill, in the county of Kilkenny; with some observations upon the Fish remains and other associated fossils from the same locality. Brit. Assoc. Rep. 1859 (*pt.* 2), pp. 98–99.

—— **13.** On a new species of Pentacrinite from the Oxford Clay, Weymouth, Dorsetshire. Dublin, Zool. Bot. Assoc. Proc. II., 1860, pp. 19–23; Ann. Nat. Hist. VI., 1860, pp. 25–28; Nat. Hist. Review, VII., 1860 (*Proc.*), pp. 418–421.

—— **14.** On fossil Chitonidæ and their distribution in geological time. Dublin, Zool. Bot. Assoc. Proc. II., 1860, pp. 40–47.

—— **15.** On a new species of Solarium from the Upper Greensand, near Dorchester. Dublin, Zool. Bot. Assoc. Proc. II., 1860, pp. 66–67; Ann. Nat. Hist. VI., 1860, p. 28; Nat. Hist. Review, VII., 1860 (*Proc.*), p. 444.

—— **16.** On the occurrence of some characteristic Graptolites and other Fossils, indicating certain divisions of the Lower Silurian Rocks in the counties of Meath, Tipperary, and Clare. Dublin, Journ. Geol. Soc. IX. (1860–62), pp. 300–306.

Baily, *William H.*, and *A.* **Carte.** Description of a new species of Plesiosaurus, from the Lias, near Whitby, Yorkshire. Dublin Soc. Journ. IV., 1863, pp. 161–169.

Bain, *Alex.* On the Earth, as a conductor and permanent generator of Voltaic Electricity. Walker, Electr. Mag. I., 1845, pp. 50–52.

Baines, *Samuel.* On some of the differences in the deposition of Coal. W. Yorks. Geol. Soc. Proc. IV., 1859, pp. 77–88.

Baines, *Thomas.* On the Disease of the Potato. Liverpool, Lit. Phil. Soc. Proc. I., 1844–45 (*pt.* 2), pp. 2–9.

Baines, *Thomas.* The Limpopo, its origin, course, and tributaries. Geogr. Soc. Journ. XXIV., 1854, pp. 288–290.

—— **2.** Additional notes on the North Australian Expedition under Mr. A. C. Gregory. Geogr. Soc. Proc. II., 1858, pp. 3–16.

Baird, ——. An account of the effects of thirty tons of Quicksilver escaping, by the rotting of leathern bags, into the bilge water on board the "Triumph," man-of-war. Nicholson, Journ. XXVII., 1810, pp. 132–134; Gilbert, Annal. XL., 1812, pp. 347–348.

Baird, *Andrew.* Remarks on the mode of formation of certain curiously shaped stones found in the bed of a small stream near Melrose, and popularly known in the neighbourhood by the name of "Fairy Stones." Berwick. Nat. Club, 1834, pp. 73–77.

—— **2.** Notice of an ancient Sea-Beach near Dunglass. Berwick. Nat. Club, 1834, pp. 152–154.

Baird, *John.* Short account of the rocks in the neighbourhood of St. John's, Newfoundland. Edinb. Mem. Wern. Soc. IV., 1821–22, pp. 151–156; Tilloch, Phil. Mag. LX., 1822, pp. 206–210.

—— **2.** Geological remarks on the Rocks of Gibraltar and the adjacent country. Edinb. Phil. Journ. VII., 1822, pp. 75–80.

Baird, *Spencer F.* Revision of the North American Tailed-Batrachia, with descriptions of new genera and species. Philad. Acad. Nat. Sci. Journ. I., 1847–50, pp. 281–294.

—— **2.** On the bone caves of Pennsylvania. Amer. Assoc. Proc. 1849, pp. 352–355.

—— **3.** Descriptions of four new species of North American Salamanders, and one new species of Scink. Silliman, Journ. IX., 1850, pp. 137–139.

—— **4.** Description of a new species of Sylvicola. N. York Lyceum, Ann. V., 1852, pp. 217–218.

—— **5.** Descriptions of new genera and species of North American Frogs. Philad. Acad. Nat. Sci. Proc. VII., 1854–55, pp. 59–62.

Baird, *Spencer F.* **6.** Descriptions of new Birds collected between Albuquerque, N.M., and San Francisco, California, during the winter of 1853–54, by Dr. C. B. R. Kennerly and H. B. Möllhausen. Philad. Acad. Nat. Sci. Proc. VII., 1854–55, pp. 118–120.

—— **7.** Characteristics of some new species of Mammalia, collected by Major W. H. Emory. Philad. Acad. Nat. Sci. Proc. VII., 1854–55, pp. 331–333.

—— **8.** Report on the fishes observed on the coasts of New Jersey and Long Island during the summer of 1854. Smithson. Reports, 1855, pp. 321–353.

—— **9.** Description of a new Sparrow [Ammodromus Samuelis], collected in California. Boston, Proc. Nat. Hist. Soc. VI., 1856–59, pp. 379–380.

—— **10.** Description of a Phyllostome Bat from California, in the Museum of the Smithsonian Institution. Philad. Acad. Nat. Sci. Proc. 1858, pp. 116–117.

—— **11.** Description of new genera and species of North American Lizards. Philad. Acad. Nat. Sci. Proc. 1858, pp. 253–256.

—— **12.** Notes on a collection of Birds made by Mr. John Xantus at Cape St. Lucas, Lower California. Philad. Acad. Nat. Sci. Proc. 1859, pp. 299–306.

—— **13.** Catalogue of North American Birds, chiefly in the museum of the Smithsonian Institution. [1859.] Smithson. Miscell. Coll. II., 1862.

Baird, *Spencer F.*, and *W. M.* **Baird.** List of Birds found in the vicinity of Carlisle, Cumberland County, Penn., about Lat. 40° 12′ N., Lon. 77° 11′ W. Silliman, Journ. XLVI., 1844, pp. 261–273.

—— —— **2.** Descriptions of two species, supposed to be new, of the genus Tyrannula, *Swainson*, found in Cumberland County, Penn. Philad. Acad. Nat. Sci. Proc. I., 1841–43, pp. 283–286; Silliman, Journ. XLVI., 1844, pp. 273–276.

Baird, *Spencer F.*, and *Charles* **Girard.** Characteristics of some new Reptiles in the Museum of the Smithsonian Institution. Philad. Acad. Nat. Sci. Proc. VI., 1852–53, pp. 68–70, 125–129, 173.

—— —— **2.** Descriptions of new species of Reptiles, collected by the U.S. Exploring Expedition under the command of Capt. Charles Wilkes, U.S.N. Philad. Acad. Nat. Sci. Proc. VI., 1852–53, pp. 174–177.

—— —— **3.** List of Reptiles collected in California by Dr. John L. Le Conte, with description of new Species. Philad. Acad. Nat. Sci. Proc. VI., 1852–53, pp. 300–302.

Baird, *Spencer F.*, and *Charles* **Girard. 4.** Descriptions of some new Fishes from the River Zuni. Philad. Acad. Nat. Sci. Proc. VI., 1852–53, pp. 368–369.

—— —— **5.** Descriptions of Rana pretiosa and Bufo Columbiensis. Philad. Acad. Nat. Sci. Proc. VI., 1852–53, pp. 378–379.

—— —— **6.** Descriptions of new species of Fishes collected by Mr. John H. Clark. Philad. Acad. Nat. Sci. Proc. VI., 1852–53, pp. 387–390.

—— —— **7.** Descriptions of new species of Fishes collected in Arkansas. Philad. Acad. Nat. Sci. Proc. VI., 1852–53, pp. 390–392.

—— —— **8.** Descriptions of new species of Fishes collected in Texas, New Mexico, and Sonora, by Mr. John H. Clark, and in Texas by Capt. Stewart Van Vliet. Philad. Acad. Nat. Sci. Proc. VII., 1854–55, pp. 24–29.

—— —— **9.** Notice of a new genus of Cyprinidæ (Cochlognathus). Philad. Acad. Nat. Sci. Proc. VII., 1854–55, p. 158.

—— —— **10.** Catalogue of North American Reptiles in the museum of the Smithsonian Institution. [1853.] Smithson. Miscell. Coll. II., 1862.

Baird, *William.* Descriptive notice of a specimen of Lemur tardigradus, *Lin.*, Màkis, *Cuv.*, kept alive for some time at Edinburgh. Mag. Nat. Hist. I., 1829, pp. 208–216.

—— **2.** Table of a series of observations of Solar Radiation. Edinb. Journ. Nat. and Geogr. Sci. I., 1830, pp. 173–176.

—— **3.** On the Luminousness of the Sea. Mag. Nat. Hist. III., 1830, pp. 308–321; IV., 500–505.

—— **4.** Remarks upon the Gordius aquaticus or Hair-Worm. [1833.] Berwick. Nat. Club, 1834, pp. 23–26.

—— **5.** On the Aurora Borealis. Berwick. Nat. Club, 1834, pp. 46–50.

—— **6.** List of Entomostraca found in Berwickshire. Berwick. Nat. Club, 1834, pp. 95–97.

—— **7.** Remarks on the Sea Tree. Berwick. Nat. Club, 1834, pp. 115–119.

—— **8.** Remarks on the Aurora Borealis, as it occurred at Berwick on the evenings of Tuesday 17th and Wednesday 18th November, 1835. Berwick. Nat. Club, 1834, pp. 127–131.

—— **9.** The Natural History of the British Entomostraca. Jardine, Mag. Zool. and Bot. I., 1837, pp. 35–41, 309–333, 514–526; II., 132–144, 400–412; Ann. Nat. Hist. I., 1838, pp. 245–256; XI., 1843, pp. 81–95.

—— **10.** Description of several new species of Entomostraca. Zool. Soc. Proc. *pt.* XVIII., 1842, pp. 254–257.

Baird, *William.* **11.** Note on the luminous appearance of the sea, with descriptions of some of the Entomostracous insects by which it is occasioned. Newman, Zoologist, I., 1843, pp. 55–61.

—— **12.** Notes on British Entomostraca. Newman, Zoologist, I., 1843, pp. 193–197.

—— **13.** Description of some new Genera and Species of British Entomostraca. Ann. Nat. Hist. XVII., 1846, pp. 410–416.

—— **14.** On the genera Nebalia (*Leach*), Chirocephalus (*Prevost*), and Branchipus (*Schæffer*). Brit. Assoc. Rep. 1847 (*pt.* 2), pp. 74–75.

—— **15.** Note on the genus Cypridina, *M. Edwards;* with a description of two new species. Ann. Nat. Hist. I., 1848, pp. 21–25.

—— **16.** Arrangement of the British Entomostraca, with a List of Species, particularly noticing those which have as yet been discovered within the bounds of the Club. Berwick. Nat. Club, 1849, pp. 145–158.

—— **17.** Additions to the list of Entomostraca found within the limits of the Berwickshire Naturalists' Club, with a Description of the Caligus Strömii. Berwick. Nat. Club, 1849, pp. 259–260; Ann. Nat. Hist. I., 1848, pp. 396–397.

—— **18.** Monograph of the family Limnadiadæ, a family of Entomostracous Crustacea. Zool. Soc. Proc. *pt.* XVII., 1849, pp. 84–90.

—— **19.** Description of a new Crustacean. Zool. Soc. Proc. *pt.* XVIII., 1850, p. 102.

—— **20.** Description of several new species of Entomostraca. Zool. Soc. Proc. XVIII., 1850, pp. 254–257; Ann. Nat. Hist. X., 1852, pp. 56–69.

—— **21.** Monograph of the family Apodidæ, a family of Crustaceans belonging to the division Entomostraca; with a description of a new species of Apus, and two species of Ostracoda belonging to the genus Cypris. Zool. Soc. Proc. *pt.* XX., 1852, pp. 1–8.

—— **22.** Monograph of the family Branchipodidæ, a family of Crustaceans, belonging to the division Entomostraca, with a description of a new genus and species of the family, and two new species belonging to the family Limnadiadæ. Zool. Soc. Proc. *pt.* XX., 1852, pp. 18–31.

—— **23.** Descriptions of some new species of Entozoa from the collection of the British Museum. Zool. Soc. Proc. *pt.* XXI., 1853, pp. 18–25.

—— **24.** Description of a new species of Cypris. Zool. Soc. Proc. *pt.* XXII., 1854, p. 6.

—— **25.** Notice of the capture of Sericomyia borealis on one of the Cheviot Hills, in August 1850. Berwick. Nat. Club, III., 1857, pp. 68–70.

—— **26.** Some remarks upon Entozoa or Intestinal Worms. Berwick. Nat. Club, III., 1857, pp. 142–153.

Baird, *William.* **27.** Notes on the Food of some Freshwater Fishes, more particularly of the Vendace and Trout. Edinb. New Phil. Journ. VI., 1857, pp. 17–24.

—— **28.** Description of two new species of Entozoa. Zool. Soc. Proc. *pt.* XXVI., 1858, pp. 224–225.

—— **29.** Description of several species of Entomostracous Crustacea from Jerusalem. Ann. Nat. Hist. IV., 1859, pp. 280–283.

—— **30.** Description of a new species of Tænia. Zool. Soc. Proc. *pt.* XXVII., 1859, p. 111; Ann. Nat. Hist. IV., 1859, p. 240.

—— **31.** Description of a rare Entozoon from the stomach of the Dugong. Zool. Soc. Proc. *pt.* XXVII., 1859, pp. 148–149.

—— **32.** Description of some new recent Entomostraca from Nagpoor, collected by the Rev. S. Hislop. Zool. Soc. Proc. *pt.* XXVII., 1859, pp. 231–234.

—— **33.** Description of a new species of Entozoon, Sclerostoma sipunculiforme, from the intestines of the elephant. Zool. Soc. Proc. *pt.* XXVII., 1859, pp. 425–427.

—— **34.** Description of a new species of Estheria from Nagpoor, Central India. Zool. Soc. Proc. *pt.* XXVIII., 1860, p. 188.

—— **35.** Note upon the Genus Cypridina, *Milne-Edwards,* with a description of some new species. Zool. Soc. Proc. *pt.* XXVIII., 1860, pp. 199–202.

—— **36.** Description of a new Entomostracous Crustacean, belonging to the order Phyllopoda, from South Australia. Zool. Soc. Proc. *pt.* XXVIII., 1860, pp. 392–393; Ann. Nat. Hist. VII., 1861, pp. 149–150.

—— **37.** Description of two new species of Entomostracous Crustaceans from India. Zool. Soc. Proc. *pt.* XXVIII., 1860, pp. 445–446; Ann. Nat. Hist. VII., 1861, pp. 324–325.

—— **38.** Description of some new species of Intestinal Worms (Entozoa) in the collection of the British Museum. Zool. Soc. Proc. *pt.* XXVIII., 1860, pp. 446–448; Ann. Nat. Hist. VII., 1861, pp. 228–230.

—— **39.** Description of a new species of Branchipus (B. eximius), from the Pool of Gihon in Jerusalem. Ann. Nat. Hist. VIII., 1861, pp. 209–210.

—— **40.** Note on the occurrence of Filaria sanguinea in the body of the Galaxias scriba, a freshwater fish from Australia. Ann. Nat. Hist. VIII., 1861, pp. 269–270.

—— **41.** Note on the Lernæa cyclopterina, occurring in the gills of the Cyclopterinus spinosus, a fish from Greenland. Ann. Nat. Hist. VIII., 1861, p. 496.

Baird, *William*. **42.** Notice of the occurrence of Sclerostoma equinum ? in the testicle of the horse. Ann. Nat. Hist. VIII., 1861, pp. 502–503.

—— **43.** Description of some new species of Entomostracous Crustacea. Ann. Nat. Hist. X., 1862, pp. 1–6.

—— **44.** Description of two new species of Cestoid Worms belonging to the Genus Tænia. Zool. Soc. Proc., 1862, pp. 20–21.

—— **45.** Description of some new species of Entozoa. Zool. Soc. Proc. 1862, pp. 113–115.

—— **46.** Description of several new species of Phyllopodous Crustaceans, belonging to the genera Estheria and Limnetis. Zool. Soc. Proc. 1862, pp. 147–149.

—— **47.** Descriptions of some new species of shells, collected at Vancouver Island and in British Columbia by J. K. Lord. Zool. Soc. Proc. 1863, pp. 66–70.

—— **48.** Description of two species of shells collected by Dr. Lyall at Vancouver Island. Zool. Soc. Proc. 1863, p. 71.

—— **49.** Description of several new species of Worms belonging to the Annelida errantia and sedentaria or tubicola of Milne-Edwards. Zool. Soc. Proc. 1863, pp. 106–110.

—— **50.** On a new species of British Annelides belonging to the family Chætopteridæ. Linn. Soc. Trans. XXIV., 1864, pp. 477–481.

—— **51.** Description of a new species of Annelide belonging to the family Amphinomidæ. Linn. Soc. Trans. XXIV., 1864, pp. 449–450.

Baker, ——. Memoir on the northern frontier of Greece. Geogr. Soc. Journ. VII., 1837, pp. 81–94.

—— —— **2.** Analyse du lait des principaux types de vache, chèvre, brebis, bufflesse. Annal. Hygiène Publ. VII., 1857, pp. 271–303.

Becquerel, *Antoine César.* Note sur une couche de Lignite renfermant du Succin et des cristaux d'une substance qui paroît analogue au Mellite, trouvée récemment à Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 235–240.

—— **2.** Note sur les Cristaux trouvés dans le Lignite d'Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 308–310.

—— **3.** Note sur les variétés de forme de Chaux carbonatée, observées dans le calcaire de Clamecy. Journ. de Phys. LXXXIX., 1819, pp. 462–467; Paris, Mém. de l'Inst. XIII., 1835, pp. 31–37.

—— **4.** Sur le développement de l'électricité dans les corps par la pression et la dilatation. Paris, Soc. Philom. Bull. 1820, pp. 149–155.

—— **5.** Sur le développement de l'électricité par la pression. Annal. de Chimie, XXII., 1823, pp. 5–34; Quart. Journ. Sci. XV., 1823, p. 368; Tilloch, Phil. Mag. LXII., 1823, pp. 204–211, 263–274.

—— **6.** Sur les fils très-fins de platine et d'acier; et sur la distribution du magnétisme libre dans ces derniers. Annal. de Chimie, XXII., 1823, pp. 113–137; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 374–379; Paris, Mém. de l'Inst. XI., 1832, pp. 13–32.

—— **7.** De l'argile plastique d'Auteuil. et des substances qui l'accompagnent. Annal. de Chimie, XXII., 1823, pp. 348–358; Paris, Mém. de l'Inst. XI., 1832, pp. 1–11.

—— **8.** Du développement de l'électricité par le contact de deux portions d'un même métal, dans un état suffisamment inégal de température; des piles voltaïques construites avec des fils d'un même métal et même avec un seul fil, et de quelques effets électriques qui naissent dans les combinaisons chimiques. Annal. de Chimie, XXIII., 1823, pp. 135–155; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 448–472.

—— **9.** Des effets électriques qui se développent pendant diverses actions chimiques. Annal. de Chimie, XXIII., 1823, pp. 244–258; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 387–407.

—— **10.** Nouveaux résultats électro-chimiques. Annal. de Chimie, XXIII., 1823, pp. 259–260.

Becquerel, *Antoine César.* **11.** De l'état de l'électricité développée pendant les actions chimiques, et de la mesure de ces dernières au moyen des effets électriques qui en résultent. Annal. de Chimie, XXIV., 1823, pp. 192–206.

—— **12.** D'un système de galvanomètres propres à rendre sensibles de très-faibles quantités d'électricité ; et des courants électriques qui ont lieu dans les actions capillaires et dans les dissolutions. Annal. de Chimie, XXIV., 1823, pp. 337–355 ; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 408–430.

—— **13.** Développements relatifs aux effets électriques produites dans les actions chimiques, et de la distribution de l'électricité dans la pile voltaïque, en tenant compte des actions électromotrices des liquides conducteurs sur les métaux. Paris, Soc. Philom. Bull. 1823, pp. 72–73.

—— **14.** Des actions magnétiques ou actions analogues, produites dans tous les corps par l'influence de courants électriques très-énergiques. Annal. de Chimie, XXV., 1824, pp. 269–278 ; Paris, Bull. Soc. Philom. 1824, pp. 22–23 ; Quart. Journ. Sci. XVII., 1824, pp. 372–373 ; Schweigger, Journ. XLII. (= *Jahrb.* XII.), 1824, pp. 439–449.

—— **15.** Des actions électro-motrices produites par le contact des métaux et des liquides, et d'un procédé pour reconnaître, à l'aide des effets électro-magnétiques, les changements qu'éprouvent certaines dissolutions au contact de l'air. Annal. de Chimie, XXV., 1824, pp. 405–415 ; Paris, Bull. Soc. Philom. 1824, pp. 37–39 ; Poggend. Annal. II., 1824, pp. 169–179 ; Quart. Journ. Sci. XVII., 1824, pp. 373–375, 379–380 ; Schweigger, Journ. XLIII. (= *Jahrb.* XIII.), 1825, pp. 71–85 ; Thomson, Ann. Phil. VIII., 1824, pp. 42–45.

—— **16.** Développements relatifs aux effets électriques observés dans les actions chimiques ; et de la distribution de l'électricité dans la pile de Volta, en tenant compte des actions électromotrices des liquides sur les métaux. Annal. de Chimie, XXVI., 1824, pp. 176–188 ; Poggend. Annal. II., 1824, pp. 180–190 ; Quart. Journ. Sci. XVIII., 1825, pp. 171–172 ; Schweigger, Journ. XLIV. (= *Jahrb.* XIV.), 1825, pp. 153–176.

—— **17.** Des actions électro-motrices de l'eau et des liquides en général sur les métaux, et des effets électriques qui ont lieu, 1° dans le contact de certaines flammes et des métaux ; 2do dans la combustion. Annal. de Chimie, XXVII., 1824, pp. 5–18 ; Paris, Bull. Soc. Philom. 1824, pp. 85–86 ; Poggend. Annal. II., 1824, pp. 191–205 ; Quart. Journ. Sci. XVIII., 1825, pp. 383–384 ; Tilloch, Phil. Mag. LXIV., 1824, pp. 401–409.

Becquerel, *Antoine César.* **18.** Sur les effets électro-dynamiques produits pendant la décomposition de l'eau oxigénée par le contact de divers corps, et sur d'autres phénomènes électro-chimiques. Paris, Soc. Philom. Bull. 1824, pp. 129–133 ; Annal. de Chimie, XXVIII., 1825, pp. 19–36 ; Quart. Journ. Sci. XVII., 1824, pp. 135–138 ; 1825, pp. 169–174, 382–383 ; Trommsdorff, N. Journ. Pharm. XI., 1825, pp. 236–263.

—— **19.** Du pouvoir conducteur des métaux pour l'électricité, et de l'intensité de la force électrodynamique en un point quelconque d'un fil métallique qui joint les deux extrémités d'une pile. Paris, Soc. Philom. Bull. 1824, pp. 179–182 ; Annal. de Chimie, XXXII., 1826, pp. 420–430 ; Quart. Journ. Sci. XXII., 1827, pp. 374–379.

—— **20.** Recherches sur les effets électriques de contact produits dans les changemens de température, et application qu'on peut en faire à la détermination des hautes températures. Annal. de Chimie, XXXI., 1826, pp. 371–392 ; Baumgartner, Zeitschr. I., 1826, pp. 430–450 ; Edinb. Journ. Sci. V., 1826, pp. 305–316, 316–319 ; Froriep, Notizen, XIV., 1826, col. 33–36 ; Paris, N. Bull. Soc. Philom. 1826, pp. 37–39 ; Poggend. Annal. IX., 1827, pp. 345–359.

—— **21.** Des décompositions chimiques opérées avec des forces électriques à très-petite tension. [1826.] Annal. de Chimie, XXXIV., 1827, pp. 152–163 ; Paris, Mém. de l'Inst. XI., 1832, pp. 33–43 ; Poggend. Annal. XI., 1827, pp. 457–465.

—— **22.** De l'électricité dégagée dans les actions chimiques, et de l'emploi de très-faibles courants électriques pour provoquer la combinaison d'un grand nombre de corps. Annal. de Chimie, XXXV., 1827, pp. 113–140 ; Brugnatelli, Giorn. X., 1827, pp. 345–353 ; Quart. Journ. Sci. II., 1827, pp. 462–464.

—— **23.** De quelques phénomènes électriques produits par la pression et le clivage des cristaux. Annal. de Chimie, XXXVI., 1827, pp. 265–271 ; Poggend. Annal. XII., 1828, pp. 147–152 ; Quart. Journ. Sci. I., 1828, pp. 478–480.

—— **24.** Sur les actions magnétiques excitées dans tous les corps par l'influence d'aimans très-énergiques. Annal. de Chimie, XXXVI., 1827, pp. 337–349 ; Paris, Mém. de l'Inst. XI., 1832, pp. 45–57 ; Poggend. Annal. XII., 1828, pp. 622–624 ; Quart. Journ. Sci. I., 1828, pp. 218–219.

—— **25.** Sur l'électricité acquise par les fils de métal plongés dans les flammes. Annal. de Chimie, XXXVI., 1827, pp. 328–331 ; Poggend. Annal. XI., 1827, pp. 437–441.

—— **26.** Magnetismus des Wismuths und des Antimons. (*Transl.*) Poggend. Annal. X., 1827, pp. 292–294 ; Quart. Journ. Sci. II., 1827, p. 202.

Becquerel, *Antoine César.* **27.** Sur les propriétés électriques de la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 5–15; Edinb. Journ. Sci. X., 1829, pp. 50–56.

—— **28.** Des effets de la chaleur dans les corps mauvais conducteurs de l'électricité et dans la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 355–369 ; Quart. Journ. Sci. II., 1828, pp. 201–202.

—— **29.** Du dégagement de l'électricité qui résulte du frottement de deux métaux. Annal. de Chimie, XXXVIII., 1828, pp. 113–122 ; Poggend. Annal. XIII., 1828, pp. 619–627.

—— **30.** Mémoire sur l'électro-chimie et l'emploi de l'électricité pour opérer des combinaisons. Annal. de Chimie, XLI., 1829, pp. 5–45 ; Ann. Sci. Nat. XVII., 1829, pp. 92–97 ; Paris, Mém. de l'Inst. IX., 1830, pp. 551–590 ; Poggend. Annal. XVIII., 1830, pp. 143–151.

—— **31.** Du pouvoir thermo-électrique des métaux. Annal. de Chimie, XLI., 1829, pp. 353–373 ; Paris, Mém. de l'Inst. X., 1831, pp. 237–258 ; Poggend. Annal. XVI., 1829, pp. 306–310 ; XVII., pp. 535–553 ; Schweigger, Journ. (= *Jahrb.* XXVII.), 1829, pp. 302–321.

—— **32.** Rapport sur un mémoire de M. Donné concernant l'influence que les phénomènes atmosphériques exercent sur la force des piles sèches. Annal. de Chimie, XLII., 1829, pp. 71–76 ; Poggend. Annal. XVII., 1829, pp. 183–184.

—— **33.** Mémoire sur les sulfures, iodures, bromures, etc. métalliques. Annal. de Chimie, XLII., 1829, pp. 225–235 ; Paris, Mém. de l'Inst. X., 1831, pp. 259–270 ; Quart. Journ. Sci. II., 1829, p. 409 ; I., 1830, pp. 205–208 ; Schweigger, Journ. LVIII. (= *Jahrb.* XXVIII.), 1830, pp. 439–452.

—— **34.** Mémoire sur le rôle que jouent les phénomènes électriques dans plusieurs combinaisons chimiques. Journ. Chimie Méd. V., 1829, pp. 209–212 ; Froriep, Notizen, XXIV., 1829, col. 276–278 ; XXVIII., col. 278–282 ; Schweigger, Journ. LV. (= *Jahrb.* XXV.), 1829, pp. 438–442.

—— **35.** Mémoire sur de nouveaux effets électro-chimiques propres à produire des combinaisons, et sur leur application à la cristallisation du soufre et d'autres substances. Annal. de Chimie, XLIII., 1830, pp. 131–146 ; Paris, Mém. de l'Inst. X., 1831, pp. 271–285 ; Silliman, Journ. XVII., 1830, pp. 382–384.

—— **36.** Sur un procédé électro-chimique, pour retirer le manganèse et le plomb des dissolutions dans lesquelles ils se trouvent. Annal. de Chimie, XLIII., 1830, pp. 380–386 ; Paris, Mém. de l'Inst. X., 1831, pp. 286–292.

—— **37.** Résumé des observations faites sur l'Électro-chimie. Annal. des Mines, VII., 1830, pp. 393–422.

Becquerel, *Antoine César.* **38.** Notiz über die Natur der Ueberzüge auf Antiken. (*Transl.*) Schweigger, Journ. LVIII. (= *Jahrb.* XXVIII.), 1830, pp. 452–454.

—— **39.** Considérations générales sur les changemens qui s'opèrent dans l'état électrique des corps, par l'action de la chaleur, du contact, du frottement et des diverses actions chimiques, et sur les modifications qui en résultent quelquefois dans l'arrangement de leur parties constituantes. Annal. de Chimie, XLVI., 1831, pp. 265–294, 337–366 ; XLVII., pp. 113–147 ; XLIX., pp. 131–141 ; Paris, Mém. de l'Inst. XI., 1832, pp. 317–367 ; XII., 1833, pp. 333–366 ; XIII., 1835, pp. 177–188 ; Froriep, Notizen, XLI., 1834, col. 65–67 ; Roy. Inst. Journ. II., 1831, pp. 396–397.

—— **40.** Du carbonate de chaux cristallisé, et de l'action simultanée des matières sucrées ou mucilagineuses sur quelques oxides métalliques, par l'intermédiaire des alcalis et des terres. Annal. de Chimie, XLVII., 1831, pp. 5–20.

—— **41.** Considérations générales sur les décompositions électro-chimiques et la réduction de l'oxide de fer, de la zircone, et de la magnésie, à l'aide de forces électriques peu énergiques. Annal. de Chimie, XLVIII., 1831, pp. 337–353 ; Paris, Mém. de l'Inst. XII., 1833, pp. 581–597.

—— **42.** Sur les courants électriques produits soit par d'autres courants, soit par des aimants. Annal. de Chimie, XLVIII.,1831, pp. 403–405.

—— **43.** De la cristallisation de quelques oxides métalliques. Annal. de Chimie, LI., 1832, pp. 101–107 ; Schweigger, Journ. LXVI. (= *N. Jahrb.* VI.), 1832, pp. 401–406 ; Trommsdorff, N. Journ. d. Pharm. XXVI., 1833 (*St.* 2), pp. 235–240.

—— **44.** Premier mémoire sur l'application des forces électro-chimiques à la physiologie végétale. Annal. de Chimie, LII., 1833, pp. 240–260 ; Guillemin, Archiv. Bot. I., 1833, pp. 385–401 ; Journ. de Pharm. XIX., 1833, pp. 560–561 ; Liebig, Annal. VIII., 1833, pp. 92–109 ; Froriep, Notizen, XXXIX., 1834. col. 113–119, 129–132.

—— **45.** Du sulfure de plomb cristallisé. Annal. de Chimie, LIII., 1833, pp. 105–108 ; Journ. de Pharm. XX., 1834, pp. 27–28 ; Poggend. Annal. XXXI., 1834, pp, 46–48.

—— **46.** Recherches sur les altérations qui ont lieu à la surface du sol ou dans l'intérieur du globe. Annal. de Chimie, LIV., 1833, pp. 143–155.

—— **47.** Rapport fait à l'Académie des Sciences sur un Mémoire de M. Fournet, qui a pour titre : "Des divers accidents et des formations successives qui ont produit l'état actuel des filons des environs de Pont-Gibaud." Annal. de Chimie, LIV., 1833, pp. 155–163.

Becquerel, *Antoine César.* **48.** Expériences sur le développement de l'électricité par la pression : lois de ce développement. Paris, Mém. de l'Inst. XII., 1833, pp. 551–580.

—— **49.** Deuxième mémoire sur la décomposition des roches, et les doubles décompositions dans les actions lentes. Annal. de Chimie, LVI., 1834, pp. 97–107 ; Erdm. Journ. Prak. Chem. II., 1834, pp. 93–97.

—— **50.** Des effets électriques produits dans le contact de certaines substances minérales et de l'eau ; de la formation du carbonate hydraté de cuivre cristallisé au moyen des forces électriques. Annal. de Chimie, LX., 1835, pp. 164–174.

—— **51.** Des propriétés électriques particulières que les substances minérales conductrices acquièrent quand elles sont en contact avec l'eau. Paris, Comptes Rendus, I., 1835, pp. 17–19 ; Bibl. Univ. I., 1836, pp. 155–160 ; L'Institut, III., 1835, pp. 251–252.

—— **52.** Sur les moyens de produire à l'aide de forces électriques très-faibles de la Malachite semblable à celle que l'on trouve dans la nature. Paris, Comptes Rendus, I., 1835, p. 19 ; Taylor, Scientif. Mem. I., 1837, pp. 414–442.

—— **53.** Appareil électro-chimique destiné à opérer des décompositions, comme la pile de Volta. Paris, Comptes Rendus, I., 1835, pp. 455–457 ; Bibl. Univ. LX., 1835, pp. 215–218 ; Froriep, Notizen, XLVI., 1835, col. 289–291 ; Poggend. Annal. XXXVII., 1836, pp. 429–432 ; Sturgeon, Ann. Electr. I., 1836–37, pp. 398–404.

—— **54.** Des variétés de forme de chaux carbonatée, observées dans le calcaire de Clamecy. Paris, Mém. de l'Inst. XIII., 1835, pp. 31–37.

—— **55.** Notice sur les applications des forces électriques aux phénomènes géologiques et physiologiques naturels. Bibl. Univ. I., 1836, pp. 1–15, 197–210.

—— **56.** Note sur un courant électrique qui possède la faculté de produire des décompositions chimiques, et non celle d'échauffer les corps. Paris, Comptes Rendus, II., 1836, pp. 14–17 ; Bibl. Univ. LX., 1835, pp. 218–220.

—— **57.** Expériences sur la torpille. Paris, Comptes Rendus, III., 1836, pp. 135–136.

—— **58.** Précis de nos connaissances sur la phosphorescence. Bibl. Univ. VIII., 1837, pp. 134–155.

—— **59.** Des relations de la physique avec la chimie et les sciences naturelles. Bibl. Univ. IX., 1837, pp. 145–159 ; Edinb. New. Phil. Journ. XXIII., 1837, pp. 315–326 ; Froriep, Notizen, III., 1837, col. 1–8.

—— **60.** Des réactions chimiques produites dans le contact des métaux oxidables, de l'eau distillée, et des composés insolubles. Paris, Comptes Rendus, IV., 1837, pp. 824–834 ; Sturgeon, Ann. Electr. II., 1838, pp. 30–38.

Becquerel, *Antoine César.* **61.** Description et usage de la balance électro-magnétique et de la pile à courants constants. Paris, Comptes Rendus, IV., 1837, pp. 35–41 ; Annal. de Chimie, LXVI., 1837, pp. 84–93 ; Phil. Mag. X., 1837, pp. 358–364 ; Poggend. Annal. XLII., 1837, pp. 307–314.

—— **62.** Influence de l'électricité sur la circulation du Chara. Paris, Comptes Rendus, V., 1837, pp. 784–788.

—— **63.** Réflexions sur le traitement électrochimique des minerais d'argent, de cuivre et de plomb. Bibl. Univ. XVI., 1838, pp. 143–152 ; Poggend. Annal. XLV., 1838, pp. 285–286.

—— **64.** Développemens relatifs aux décompositions chimiques opérées avec les appareils hydro-électriques simples. Paris, Comptes Rendus, VI., 1838, pp. 125–129 ; Bibl. Univ. XIV., 1838, pp. 129–133 ; Froriep, Notizen, VI., 1838, col. 17–21 ; Poggend. Annal. XLIV., 1838, pp. 537–541.

—— **65.** Examen du conglomérat formé autour d'une ancre trouvée dans la Seine. Paris, Comptes Rendus, VI., 1838, pp. 213–217.

—— **66.** Nouvelles recherches sur le dégagement de la chaleur dans le frottement. Paris, Comptes Rendus, VII., 1838, pp. 363–368 ; Annal. de Chimie, LXX., 1839, pp. 324–333 ; Bibl. Univ. XVI., 1838, pp. 367–374 ; XXIII., 1839, pp. 392–406 ; Paris, Mém. de l'Inst. XVII., 1840, pp. 181–199 ; Sturgeon, Ann. Electr. III., 1838–39, pp. 452–458.

—— **67.** Sur la propriété qu'a la lumière de rendre des corps phosphorescents. Paris, Comptes Rendus, VIII., 1839, p. 183.

—— **68.** De quelques propriétés nouvelles relatives au pouvoir phosphorescent de la lumière électrique. Paris, Comptes Rendus, VIII., 1839, pp. 216–223 ; Bibl. Univ. XIX., 1839, pp. 415–422 ; Poggend. Annal. XLIX., 1840, pp. 543–548.

—— **69.** Nouvelles recherches sur les effets électriques de contact. Paris, Comptes Rendus, VIII., 1839, pp. 424–432.

—— **70.** Observations sur les moyens à employer pour évaluer la température des végétaux. Paris, Comptes Rendus, VIII., 1839, pp. 939–941 ; Sturgeon, Ann. Electr. IV., 1839–40, pp. 212–213.

—— **71.** De la force chimique du courant, considérée dans ses rapports avec les affinités, et de la mesure de ces dernières. Paris, Comptes Rendus, X., 1840, pp. 671–675 ; Sturgeon, Ann. Electr. VI., 1841, pp. 411–415.

—— **72.** Considérations générales sur les applications des sciences physico-chimiques aux sciences naturelles, aux arts et à l'industrie. Paris, Comptes Rendus, XI., 1840, pp. 75–86 ; Bibl. Univ. XXIX., 1840, pp. 386–400 ; Froriep, Notizen, XV., 1840, col. 241–250 ; Sturgeon, Ann. Electr. V., 1840, pp. 249–252.

Becquerel, *Antoine César.* **73.** Observations sur la présence de sables aurifères dans le gisement de la galène de St. Santin Cantalés, et sur le gisement des sables aurifères en général. Paris, Comptes Rendus, XI., 1840, pp. 129–134 ; Bibl. Univ. XXIX., 1840, pp. 419–424.

—— **74.** Mémoire sur le rayonnement chimique qui accompagne la lumière solaire et la lumière électrique. Paris, Comptes Rendus, XI., 1840, pp. 702–703.

—— **75.** Mémoire sur le rayonnement chimique qui accompagne la lumière, et sur les effets électriques qui en resultent. Paris, Comptes Rendus, XIII., 1841, pp. 198–202 ; Bibl. Univ. XXXV., 1841, pp. 136–159.

—— **76.** Des propriétés électro-chimiques des corps simples et de leur application aux arts. Paris, Comptes Rendus, XIV., 1842, pp. 121–147 ; Archives de l'Électr. II., 1842, pp. 151–186 ; London, Electr. Soc. Proc. 1843, pp. 424–431.

—— **77.** Observations sur la pile voltaïque présentée par M. Reiset. Annal. de Chimie, VII., 1843, pp. 358–362 ; Walker, Electr. Mag. I., 1845, pp. 25–28.

—— **78.** Mémoire sur l'application électro-chimique des oxydes et des métaux sur des métaux. Paris, Comptes Rendus, XVII., 1843, pp. 1–16, 53–55 ; Annal. de Chimie, VIII., 1843, pp. 402–425 ; Archives de l'Électr. III., 1843, pp. 345–365, 366–368 ; Erdm. Journ. Prak. Chem. XXXIII., 1844, pp. 65–79 ; Journ. de Pharm. V., 1844, pp. 338–351 ; Sturgeon, Annal. Electr. X., 1843, pp. 151–157 ; Walker, Electr. Mag. I., 1845, pp. 85–100.

—— **79.** Deuxième mémoire sur la coloration des métaux. Paris, Comptes Rendus, XVIII., 1844, pp. 197–218 ; Archives de l'Électr. IV., 1844, pp. 74–102 ; Walker, Electr. Mag. I., 1845, pp. 251–272.

—— **80.** Mémoire sur la précipitation des métaux par d'autres métaux. Paris, Comptes Rendus, XVIII., 1844, pp. 449–472, 554–558 ; Archives de l'Électr. IV., 1844, pp. 520–551, 552–556.

—— **81.** Des courants électriques terrestres et de leur influence sur les phénomènes de décomposition et de recomposition dans les terrains qu'ils parcourent. Paris, Comptes Rendus, XIX., 1844, pp. 1052–1069 ; Archives de l'Électr. IV., 1844, pp. 557–579.

—— **82.** Sur les applications de l'électro-chimie à l'étude des phénomènes de décomposition et recomposition terrestres. Paris, Comptes Rendus, XX., 1845, pp. 1509–1536 ; Archives de l'Électr. V., 1845, pp. 233–269.

Becquerel, *Antoine César.* **83.** De la polarité produite par les décharges électriques, et de son emploi pour la détermination de la quantité d'électricité ordinaire associée aux parties constituantes des corps, dans les combinaisons. Paris, Comptes Rendus, XXII., 1846, pp. 381–404.

—— **84.** Nouvelles applications de l'électro-chimie à la décomposition de substances minérales. Paris, Comptes Rendus, XXII., 1846, pp. 781–788 ; Bibl. Univ. Archives, II., 1846, pp 32–42 ; Erdm. Journ. Prak. Chem. XL., 1847, pp. 449–457.

—— **85.** De la décomposition des sels neutres, à base de potasse et de soude. Paris, Comptes Rendus, XXII., 1846, pp. 1065–1068 ; Erdm. Journ. Prak. Chem. XXXVIII., 1846, pp. 309–312.

—— **86.** Sur les circuits électro-chimiques simples formés de liquides. Paris, Comptes Rendus, XXIV., 1847, pp. 505–516.

—— **87.** De l'action du sel sur la végétation et de son emploi en agriculture. Paris, Comptes Rendus, XXV., 1847, pp. 513–517 ; Froriep, Notizen, V., 1848, col. 101–103.

—— **88.** Considérations générales sur la théorie électro-chimique. Paris, Comptes Rendus, XXVIII., 1849, pp. 658–663 ; Annal. de Chimie, XXVII., 1849, pp. 5–41 ; Erdm. Journ. Prak. Chem. XLVIII., 1849, pp. 193–221.

—— **89.** Note relative au développement de l'électricité dans l'acte de la contraction musculaire. Paris, Comptes Rendus, XXVIII., 1849, pp. 663–664 ; Phil. Mag. XXXV., 1849, pp. 53–54.

—— **90.** Mémoire sur l'amélioration de la Sologne. Paris, Comptes Rendus, XXIX., 1849, pp. 461–470.

—— **91.** Communication relative aux expériences de M. Schönbein sur l'ozone. Paris, Comptes Rendus, XXX., 1850, pp. 13–16.

—— **92.** Recherches sur les causes qui dégagent de l'électricité dans les végétaux, et sur les courants végéto-terrestres. [1850.] Annal. de Chimie, XXXI., 1851, pp. 40–67 ; Journ. de Pharm. XIX., 1851, pp. 212–215 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 36–66 ; Silliman, Journ. XII., 1851, pp. 83–97.

—— **93.** Mémoire sur les effets électriques produits dans les tubercules, les racines et les fruits, lors de l'introduction d'aiguilles galvanométriques en platine. Paris, Comptes Rendus, XXXII., 1851, pp. 657–663 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 301–337.

—— **94.** Mémoire sur la réproduction de plusieurs composés minéraux. Paris, Comptes Rendus, XXXIV., 1852, pp. 29–33 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 367–377 ; Edinb. New Phil. Journ. LII., 1852, pp. 330–333 ; Erdm. Journ. Prak. Chem. LV., 1852, pp. 337–342.

Becquerel, *Antoine César.* **95.** Nouveaux développements relatifs aux effets chimiques produits au contact des solides et des liquides. Paris, Comptes Rendus, XXXIV., 1852, pp. 573-578 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 379-397 ; Erdm. Journ. Prak. Chem. LVI., 1852, pp. 471-477.

Becquerel, *Antoine César.* Note sur une couche de Lignite renfermant du Succin et des cristaux d'une substance qui paroît analogue au Mellite, trouvée récemment à Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 235–240.

—— **2.** Note sur les Cristaux trouvés dans le Lignite d'Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 308–310.

—— **3.** Note sur les variétés de forme de Chaux carbonatée, observées dans le calcaire de Clamecy. Journ. de Phys. LXXXIX., 1819, pp. 462–467; Paris, Mém. de l'Inst. XIII., 1835, pp. 31–37.

—— **4.** Sur le développement de l'électricité dans les corps par la pression et la dilatation. Paris, Soc. Philom. Bull. 1820, pp. 149–155.

—— **5.** Sur le développement de l'électricité par la pression. Annal. de Chimie, XXII., 1823, pp. 5–34; Quart. Journ. Sci. XV., 1823, p. 368; Tilloch, Phil. Mag. LXII., 1823, pp. 204–211, 263–274.

—— **6.** Sur les fils très-fins de platine et d'acier; et sur la distribution du magnétisme libre dans ces derniers. Annal. de Chimie, XXII., 1823, pp. 113–137; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 374–379; Paris, Mém. de l'Inst. XI., 1832, pp. 13–32.

—— **7.** De l'argile plastique d'Auteuil, et des substances qui l'accompagnent. Annal. de Chimie, XXII., 1823, pp. 348–358; Paris, Mém. de l'Inst. XI., 1832, pp. 1–11.

—— **8.** Du développement de l'électricité par le contact de deux portions d'un même métal, dans un état suffisamment inégal de température; des piles voltaïques construites avec des fils d'un même métal et même avec un seul fil, et de quelques effets électriques qui naissent dans les combinaisons chimiques. Annal. de Chimie, XXIII., 1823, pp. 135–155; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 448–472.

—— **9.** Des effets électriques qui se développent pendant diverses actions chimiques. Annal. de Chimie, XXIII., 1823, pp. 244–258; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 387–407.

—— **10.** Nouveaux résultats électro-chimiques. Annal. de Chimie, XXIII., 1823, pp. 259–260.

Becquerel, *Antoine César.* **11.** De l'état de l'électricité développée pendant les actions chimiques, et de la mesure de ces dernières au moyen des effets électriques qui en résultent. Annal. de Chimie, XXIV., 1823, pp. 192–206.

—— **12.** D'un système de galvanomètres propres à rendre sensibles de très-faibles quantités d'électricité ; et des courants électriques qui ont lieu dans les actions capillaires et dans les dissolutions. Annal. de Chimie, XXIV., 1823, pp. 337–355 ; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 408–430.

—— **13.** Développements relatifs aux effets électriques produites dans les actions chimiques, et de la distribution de l'électricité dans la pile voltaïque, en tenant compte des actions électromotrices des liquides conducteurs sur les métaux. Paris, Soc. Philom. Bull. 1823, pp. 72–73.

—— **14.** Des actions magnétiques ou actions analogues, produites dans tous les corps par l'influence de courants électriques très-énergiques. Annal. de Chimie, XXV., 1824, pp. 269–278 ; Paris, Bull. Soc. Philom. 1824, pp. 22–23 ; Quart. Journ. Sci. XVII., 1824, pp. 372–373 ; Schweigger, Journ. XLII. (= *Jahrb.* XII.), 1824, pp. 439–449.

—— **15.** Des actions électro-motrices produites par le contact des métaux et des liquides, et d'un procédé pour reconnaître, à l'aide des effets électro-magnétiques, les changements qu'éprouvent certaines dissolutions au contact de l'air. Annal. de Chimie, XXV., 1824, pp. 405–415 ; Paris, Bull. Soc. Philom. 1824, pp. 37–39 ; Poggend. Annal. II., 1824, pp. 169-179 ; Quart. Journ. Sci. XVII., 1824, pp. 373–375, 379–380 ; Schweigger, Journ. XLIII. (= *Jahrb.* XIII.), 1825, pp. 71–85 ; Thomson, Ann. Phil. VIII., 1824, pp. 42–45.

—— **16.** Développements relatifs aux effets électriques observés dans les actions chimiques ; et de la distribution de l'électricité dans la pile de Volta, en tenant compte des actions électromotrices des liquides sur les métaux. Annal. de Chimie, XXVI., 1824, pp. 176–188 ; Poggend. Annal. II., 1824, pp. 180–190 ; Quart. Journ. Sci. XVIII., 1825, pp. 171–172 ; Schweigger, Journ. XLIV. (= *Jahrb.* XIV.), 1825, pp. 153–176.

—— **17.** Des actions électro-motrices de l'eau et des liquides en général sur les métaux, et des effets électriques qui ont lieu, 1° dans le contact de certaines flammes et des métaux ; 2do dans la combustion. Annal. de Chimie, XXVII., 1824, pp. 5–18 ; Paris, Bull. Soc. Philom. 1824, pp. 85–86 ; Poggend. Annal. II., 1824, pp. 191–205 ; Quart. Journ. Sci. XVIII., 1825, pp. 383–384 ; Tilloch, Phil. Mag. LXIV., 1824, pp. 401–409.

Becquerel, *Antoine César.* **18.** Sur les effets électro-dynamiques produits pendant la décomposition de l'eau oxigénée par le contact de divers corps, et sur d'autres phénomènes électro-chimiques. Paris, Soc. Philom. Bull. 1824, pp. 129–133 ; Annal. de Chimie, XXVIII., 1825, pp. 19–36 ; Quart. Journ. Sci. XVII., 1824, pp. 135–138 ; 1825, pp. 169–174, 382–383 ; Trommsdorff, N. Journ. Pharm. XI., 1825, pp. 236–263.

—— **19.** Du pouvoir conducteur des métaux pour l'électricité, et de l'intensité de la force électrodynamique en un point quelconque d'un fil métallique qui joint les deux extrémités d'une pile. Paris, Soc. Philom. Bull. 1824, pp. 179–182 ; Annal. de Chimie, XXXII., 1826, pp. 420–430 ; Quart. Journ. Sci. XXII., 1827, pp. 374–379.

—— **20.** Recherches sur les effets électriques de contact produits dans les changemens de température, et application qu'on peut en faire à la détermination des hautes températures. Annal. de Chimie, XXXI., 1826, pp. 371–392 ; Baumgartner, Zeitschr. I., 1826, pp. 430–450 ; Edinb. Journ. Sci. V., 1826, pp. 305–316, 316–319 ; Froriep, Notizen, XIV., 1826, col. 33–36 ; Paris, N. Bull. Soc. Philom. 1826, pp. 37–39 ; Poggend. Annal. IX., 1827, pp. 345–359.

—— **21.** Des décompositions chimiques opérées avec des forces électriques à très-petite tension. [1826.] Annal. de Chimie, XXXIV., 1827, pp. 152–163 ; Paris, Mém. de l'Inst. XI., 1832, pp. 33–43 ; Poggend. Annal. XI., 1827, pp. 457–465.

—— **22.** De l'électricité dégagée dans les actions chimiques, et de l'emploi de très-faibles courants électriques pour provoquer la combinaison d'un grand nombre de corps. Annal. de Chimie, XXXV., 1827, pp. 113–140 ; Brugnatelli, Giorn. X., 1827, pp. 345–353 ; Quart. Journ. Sci. II., 1827, pp. 462–464.

—— **23.** De quelques phénomènes électriques produits par la pression et le clivage des cristaux. Annal. de Chimie, XXXVI., 1827, pp. 265–271 ; Poggend. Annal. XII., 1828, pp. 147–152 ; Quart. Journ. Sci. I., 1828, pp. 478–480.

—— **24.** Sur les actions magnétiques excitées dans tous les corps par l'influence d'aimans très-énergiques. Annal. de Chimie, XXXVI., 1827, pp. 337–349 ; Paris, Mém. de l'Inst. XI., 1832, pp. 45–57 ; Poggend. Annal. XII., 1828, pp. 622-624 ; Quart. Journ. Sci. I., 1828, pp. 218–219.

—— **25.** Sur l'électricité acquise par les fils de métal plongés dans les flammes. Annal. de Chimie, XXXVI., 1827, pp. 328–331 ; Poggend. Annal. XI., 1827, pp. 437–441.

—— **26.** Magnetismus des Wismuths und des Antimons. (*Transl.*) Poggend. Annal. X., 1827, pp. 292–294 ; Quart. Journ. Sci. II., 1827, p. 202.

Becquerel, *Antoine César.* **27.** Sur les propriétés électriques de la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 5–15; Edinb. Journ. Sci. X., 1829, pp. 50–56.

—— **28.** Des effets de la chaleur dans les corps mauvais conducteurs de l'électricité et dans la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 355–369 ; Quart. Journ. Sci. II., 1828, pp. 201–202.

—— **29.** Du dégagement de l'électricité qui résulte du frottement de deux métaux. Annal. de Chimie, XXXVIII., 1828, pp. 113–122 ; Poggend. Annal. XIII., 1828, pp. 619–627.

—— **30.** Mémoire sur l'électro-chimie et l'emploi de l'électricité pour opérer des combinaisons. Annal. de Chimie, XLI., 1829, pp. 5–45 ; Ann. Sci. Nat. XVII., 1829, pp. 92–97 ; Paris, Mém. de l'Inst. IX., 1830, pp. 551–590 ; Poggend. Annal. XVIII., 1830, pp. 143–151.

—— **31.** Du pouvoir thermo-électrique des métaux. Annal. de Chimie, XLI., 1829, pp. 353–373 ; Paris, Mém. de l'Inst. X., 1831, pp. 237–258 ; Poggend. Annal. XVI., 1829, pp. 306–310 ; XVII., pp. 535–553 ; Schweigger, Journ. (= *Jahrb.* XXVII.), 1829, pp. 302–321.

—— **32.** Rapport sur un mémoire de M. Donné concernant l'influence que les phénomènes atmosphériques exercent sur la force des piles sèches. Annal. de Chimie, XLII., 1829, pp. 71–76 ; Poggend. Annal. XVII., 1829, pp. 183–184.

—— **33.** Mémoire sur les sulfures, iodures, bromures, etc. métalliques. Annal. de Chimie, XLII., 1829, pp. 225–235 ; Paris, Mém. de l'Inst. X., 1831, pp. 259–270 ; Quart. Journ. Sci. II., 1829, p. 409 ; I., 1830, pp. 205–208 ; Schweigger, Journ. LVIII. (= *Jahrb.* XXVIII.), 1830, pp. 439–452.

—— **34.** Mémoire sur le rôle que jouent les phénomènes électriques dans plusieurs combinaisons chimiques. Journ. Chimie Méd. V., 1829, pp. 209–212 ; Froriep, Notizen, XXIV., 1829, col. 276–278 ; XXVIII., col. 278–282 ; Schweigger, Journ. LV. (= *Jahrb.* XXV.), 1829, pp. 438–442.

—— **35.** Mémoire sur de nouveaux effets électro-chimiques propres à produire des combinaisons, et sur leur application à la cristallisation du soufre et d'autres substances. Annal. de Chimie, XLIII., 1830, pp. 131–146 ; Paris, Mém. de l'Inst. X., 1831, pp. 271–285 ; Silliman, Journ. XVII., 1830, pp. 382–384.

—— **36.** Sur un procédé électro-chimique, pour retirer le manganèse et le plomb des dissolutions dans lesquelles ils se trouvent. Annal. de Chimie, XLIII., 1830, pp. 380–386 ; Paris, Mém. de l'Inst. X., 1831, pp. 286–292.

—— **37.** Résumé des observations faites sur l'Électro-chimie. Annal. des Mines, VII., 1830, pp. 393–422.

Becquerel, *Antoine César.* **38.** Notiz über die Natur der Ueberzüge auf Antiken. (*Transl.*) Schweigger, Journ. LVIII. (= *Jahrb.* XXVIII.), 1830, pp. 452–454.

—— **39.** Considérations générales sur les changemens qui s'opèrent dans l'état électrique des corps, par l'action de la chaleur, du contact, du frottement et des diverses actions chimiques, et sur les modifications qui en résultent quelquefois dans l'arrangement de leur parties constituantes. Annal. de Chimie, XLVI., 1831, pp. 265–294, 337–366 ; XLVII., pp. 113–147 ; XLIX., pp. 131–141 ; Paris, Mém. de l'Inst. XI., 1832, pp. 317–367 ; XII., 1833, pp. 333–366 ; XIII., 1835, pp. 177–188 ; Froriep, Notizen, XLI., 1834, col. 65–67 ; Roy. Inst. Journ. II., 1831, pp. 396–397.

—— **40.** Du carbonate de chaux cristallisé, et de l'action simultanée des matières sucrées ou mucilagineuses sur quelques oxides métalliques, par l'intermédiaire des alcalis et des terres. Annal. de Chimie, XLVII., 1831, pp. 5–20.

—— **41.** Considérations générales sur les décompositions électro-chimiques et la réduction de l'oxide de fer, de la zircone, et de la magnésie, à l'aide de forces électriques peu énergiques. Annal. de Chimie, XLVIII., 1831, pp. 337–353 ; Paris, Mém. de l'Inst. XII., 1833, pp. 581–597.

—— **42.** Sur les courants électriques produits soit par d'autres courants, soit par des aimants. Annal. de Chimie, XLVIII.,1831, pp. 403–405.

—— **43.** De la cristallisation de quelques oxides métalliques. Annal. de Chimie, LI., 1832, pp. 101–107 ; Schweigger, Journ. LXVI. (= *N. Jahrb.* VI.), 1832, pp. 401–406 ; Trommsdorff, N. Journ. d. Pharm. XXVI., 1833 (*St.* 2), pp. 235–240.

—— **44.** Premier mémoire sur l'application des forces électro-chimiques à la physiologie végétale. Annal. de Chimie, LII., 1833, pp. 240–260 ; Guillemin, Archiv. Bot. I., 1833, pp. 385–401 ; Journ. de Pharm. XIX., 1833, pp. 560–561 ; Liebig, Annal. VIII., 1833, pp. 92–109 ; Froriep, Notizen, XXXIX., 1834. col. 113–119, 129–132.

—— **45.** Du sulfure de plomb cristallisé. Annal. de Chimie, LIII., 1833, pp. 105–108 ; Journ. de Pharm. XX., 1834, pp. 27–28 ; Poggend. Annal. XXXI., 1834, pp, 46–48.

—— **46.** Recherches sur les altérations qui ont lieu à la surface du sol ou dans l'intérieur du globe. Annal. de Chimie, LIV., 1833, pp. 143–155.

Becquerel, *Antoine César.* Note sur une couche de Lignite renfermant du Succin et des cristaux d'une substance qui paroît analogue au Mellite, trouvée récemment à Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 235–240.

—— **2.** Note sur les Cristaux trouvés dans le Lignite d'Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 308–310.

—— **3.** Note sur les variétés de forme de Chaux carbonatée, observées dans le calcaire de Clamecy. Journ. de Phys. LXXXIX., 1819, pp. 462–467; Paris, Mém. de l'Inst. XIII., 1835, pp. 31–37.

—— **4.** Sur le développement de l'électricité dans les corps par la pression et la dilatation. Paris, Soc. Philom. Bull. 1820, pp. 149–155.

—— **5.** Sur le développement de l'électricité par la pression. Annal. de Chimie, XXII., 1823, pp. 5–34; Quart. Journ. Sci. XV., 1823, p. 368; Tilloch, Phil. Mag. LXII., 1823, pp. 204–211, 263–274.

—— **6.** Sur les fils très-fins de platine et d'acier; et sur la distribution du magnétisme libre dans ces derniers. Annal. de Chimie, XXII., 1823, pp. 113–137; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 374–379; Paris, Mém. de l'Inst. XI., 1832, pp. 13–32.

—— **7.** De l'argile plastique d'Auteuil, et des substances qui l'accompagnent. Annal. de Chimie, XXII., 1823, pp. 348–358; Paris, Mém. de l'Inst. XI., 1832, pp. 1–11.

—— **8.** Du développement de l'électricité par le contact de deux portions d'un même métal, dans un état suffisamment inégal de température; des piles voltaïques construites avec des fils d'un même métal et même avec un seul fil, et de quelques effets électriques qui naissent dans les combinaisons chimiques. Annal. de Chimie, XXIII., 1823, pp. 135–155; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 448–472.

—— **9.** Des effets électriques qui se développent pendant diverses actions chimiques. Annal. de Chimie, XXIII., 1823, pp. 244–258; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 387–407.

—— **10.** Nouveaux résultats électro-chimiques. Annal. de Chimie, XXIII., 1823, pp. 259–260.

Becquerel, *Antoine César.* **11.** De l'état de l'électricité développée pendant les actions chimiques, et de la mesure de ces dernières au moyen des effets électriques qui en résultent. Annal. de Chimie, XXIV., 1823, pp. 192–206.

—— **12.** D'un système de galvanomètres propres à rendre sensibles de très-faibles quantités d'électricité ; et des courants électriques qui ont lieu dans les actions capillaires et dans les dissolutions. Annal. de Chimie, XXIV., 1823, pp. 337–355 ; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 408–430.

—— **13.** Développements relatifs aux effets électriques produites dans les actions chimiques, et de la distribution de l'électricité dans la pile voltaïque, en tenant compte des actions électromotrices des liquides conducteurs sur les métaux. Paris, Soc. Philom. Bull. 1823, pp. 72–73.

—— **14.** Des actions magnétiques ou actions analogues, produites dans tous les corps par l'influence de courants électriques très-énergiques. Annal. de Chimie, XXV., 1824, pp. 269–278 ; Paris, Bull. Soc. Philom. 1824, pp. 22–23 ; Quart. Journ. Sci. XVII., 1824, pp. 372–373 ; Schweigger, Journ. XLII. (= *Jahrb.* XII.), 1824, pp. 439–449.

—— **15.** Des actions électro-motrices produites par le contact des métaux et des liquides, et d'un procédé pour reconnaître, à l'aide des effets électro-magnétiques, les changements qu'éprouvent certaines dissolutions au contact de l'air. Annal. de Chimie, XXV., 1824, pp. 405–415 ; Paris, Bull. Soc. Philom. 1824, pp. 37–39 ; Poggend. Annal. II., 1824, pp. 169–179 ; Quart. Journ. Sci. XVII., 1824, pp. 373–375, 379–380 ; Schweigger, Journ. XLIII. (= *Jahrb.* XIII.), 1825, pp. 71–85 ; Thomson, Ann. Phil. VIII., 1824, pp. 42–45.

—— **16.** Développements relatifs aux effets électriques observés dans les actions chimiques ; et de la distribution de l'électricité dans la pile de Volta, en tenant compte des actions électromotrices des liquides sur les métaux. Annal. de Chimie, XXVI., 1824, pp. 176–188 ; Poggend. Annal. II., 1824, pp. 180–190 ; Quart. Journ. Sci. XVIII., 1825, pp. 171–172 ; Schweigger, Journ. XLIV. (= *Jahrb.* XIV.), 1825, pp. 153–176.

—— **17.** Des actions électro-motrices de l'eau et des liquides en général sur les métaux, et des effets électriques qui ont lieu, 1° dans le contact de certaines flammes et des métaux ; 2do dans la combustion. Annal. de Chimie, XXVII., 1824, pp. 5–18 ; Paris, Bull. Soc. Philom. 1824, pp. 85–86 ; Poggend. Annal. II., 1824, pp. 191–205 ; Quart. Journ. Sci. XVIII., 1825, pp. 383–384 ; Tilloch, Phil. Mag. LXIV., 1824, pp. 401–409.

Becquerel, *Antoine César.* **18.** Sur les effets électro-dynamiques produits pendant la décomposition de l'eau oxigénée par le contact de divers corps, et sur d'autres phénomènes électro-chimiques. Paris, Soc. Philom. Bull. 1824, pp. 129–133 ; Annal. de Chimie, XXVIII., 1825, pp. 19–36 ; Quart. Journ. Sci. XVII., 1824, pp. 135–138 ; 1825, pp. 169–174, 382–383 ; Trommsdorff, N. Journ. Pharm. XI., 1825, pp. 236–263.

—— **19.** Du pouvoir conducteur des métaux pour l'électricité, et de l'intensité de la force électrodynamique en un point quelconque d'un fil métallique qui joint les deux extrémités d'une pile. Paris, Soc. Philom. Bull. 1824, pp. 179–182 ; Annal. de Chimie, XXXII., 1826, pp. 420–430 ; Quart. Journ. Sci. XXII., 1827, pp. 374–379.

—— **20.** Recherches sur les effets électriques de contact produits dans les changemens de température, et application qu'on peut en faire à la détermination des hautes températures. Annal. de Chimie, XXXI., 1826, pp. 371–392 ; Baumgartner, Zeitschr. I., 1826, pp. 430–450 ; Edinb. Journ. Sci. V., 1826, pp. 305–316, 316–319 ; Froriep, Notizen, XIV., 1826, col. 33–36 ; Paris, N. Bull. Soc. Philom. 1826, pp. 37–39 ; Poggend. Annal. IX., 1827, pp. 345–359.

—— **21.** Des décompositions chimiques opérées avec des forces électriques à très-petite tension. [1826.] Annal. de Chimie, XXXIV., 1827, pp. 152–163 ; Paris, Mém. de l'Inst. XI., 1832, pp. 33–43 ; Poggend. Annal. XI., 1827, pp. 457–465.

—— **22.** De l'électricité dégagée dans les actions chimiques, et de l'emploi de très-faibles courants électriques pour provoquer la combinaison d'un grand nombre de corps. Annal. de Chimie, XXXV., 1827, pp. 113–140 ; Brugnatelli, Giorn. X., 1827, pp. 345–353 ; Quart. Journ. Sci. II., 1827, pp. 462–464.

—— **23.** De quelques phénomènes électriques produits par la pression et le clivage des cristaux. Annal. de Chimie, XXXVI., 1827, pp. 265–271 ; Poggend. Annal. XII., 1828, pp. 147–152 ; Quart. Journ. Sci. I., 1828, pp. 478–480.

—— **24.** Sur les actions magnétiques excitées dans tous les corps par l'influence d'aimans très-énergiques. Annal. de Chimie, XXXVI., 1827, pp. 337–349 ; Paris, Mém. de l'Inst. XI., 1832, pp. 45–57 ; Poggend. Annal. XII., 1828, pp. 622–624 ; Quart. Journ. Sci. I., 1828, pp. 218–219.

—— **25.** Sur l'électricité acquise par les fils de métal plongés dans les flammes. Annal. de Chimie, XXXVI., 1827, pp. 328–331 ; Poggend. Annal. XI., 1827, pp. 437–441.

—— **26.** Magnetismus des Wismuths und des Antimons. (*Transl.*) Poggend. Annal. X., 1827, pp. 292–294 ; Quart. Journ. Sci. II., 1827, p. 202.

Becquerel, *Antoine César.* **27.** Sur les propriétés électriques de la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 5–15; Edinb. Journ. Sci. X., 1829, pp. 50–56.

—— **28.** Des effets de la chaleur dans les corps mauvais conducteurs de l'électricité et dans la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 355–369 ; Quart. Journ. Sci. II., 1828, pp. 201–202.

—— **29.** Du dégagement de l'électricité qui résulte du frottement de deux métaux. Annal. de Chimie, XXXVIII., 1828, pp. 113–122 ; Poggend. Annal. XIII., 1828, pp. 619–627.

—— **30.** Mémoire sur l'électro-chimie et l'emploi de l'électricité pour opérer des combinaisons. Annal. de Chimie, XLI., 1829, pp. 5–45 ; Ann. Sci. Nat. XVII., 1829, pp. 92–97 ; Paris, Mém. de l'Inst. IX., 1830, pp. 551–590 ; Poggend. Annal. XVIII., 1830, pp. 143–151.

—— **31.** Du pouvoir thermo-électrique des métaux. Annal. de Chimie, XLI., 1829, pp. 353–373 ; Paris, Mém. de l'Inst. X., 1831, pp. 237–258 ; Poggend. Annal. XVI., 1829, pp. 306–310 ; XVII., pp. 535–553 ; Schweigger, Journ. (= *Jahrb.* XXVII.), 1829, pp. 302–321.

—— **32.** Rapport sur un mémoire de M. Donné concernant l'influence que les phénomènes atmosphériques exercent sur la force des piles sèches. Annal. de Chimie, XLII., 1829, pp. 71–76 ; Poggend. Annal. XVII., 1829, pp. 183–184.

—— **33.** Mémoire sur les sulfures, iodures, bromures, etc. métalliques. Annal. de Chimie, XLII., 1829, pp. 225–235 ; Paris, Mém. de l'Inst. X., 1831, pp. 259–270 ; Quart. Journ. Sci. II., 1829, p. 409 ; I., 1830, pp. 205–208 ; Schweigger, Journ. LVIII. (= *Jahrb.* XXVIII.), 1830, pp. 439–452.

—— **34.** Mémoire sur le rôle que jouent les phénomènes électriques dans plusieurs combinaisons chimiques. Journ. Chimie Méd. V., 1829, pp. 209–212 ; Froriep, Notizen, XXIV., 1829, col. 276–278 ; XXVIII., col. 278–282 ; Schweigger, Journ. LV. (= *Jahrb.* XXV.), 1829, pp. 438–442.

—— **35.** Mémoire sur de nouveaux effets électro-chimiques propres à produire des combinaisons, et sur leur application à la cristallisation du soufre et d'autres substances. Annal. de Chimie, XLIII., 1830, pp. 131–146 ; Paris, Mém. de l'Inst. X., 1831, pp. 271–285 ; Silliman, Journ. XVII., 1830, pp. 382–384.

—— **36.** Sur un procédé électro-chimique, pour retirer le manganèse et le plomb des dissolutions dans lesquelles ils se trouvent. Annal. de Chimie, XLIII., 1830, pp. 380–386 ; Paris, Mém. de l'Inst. X., 1831, pp. 286–292.

—— **37.** Résumé des observations faites sur l'Électro-chimie. Annal. des Mines, VII., 1830, pp. 393–422.

Becquerel, *Antoine César.* **38.** Notiz über die Natur der Ueberzüge auf Antiken. (*Transl.*) Schweigger, Journ. LVIII. (= *Jahrb.* XXVIII.), 1830, pp. 452–454.

—— **39.** Considérations générales sur les changemens qui s'opèrent dans l'état électrique des corps, par l'action de la chaleur, du contact, du frottement et des diverses actions chimiques, et sur les modifications qui en résultent quelquefois dans l'arrangement de leur parties constituantes. Annal. de Chimie, XLVI., 1831, pp. 265–294, 337–366 ; XLVII., pp. 113–147 ; XLIX., pp. 131–141 ; Paris, Mém. de l'Inst. XI., 1832, pp. 317–367 ; XII., 1833, pp. 333–366 ; XIII., 1835, pp. 177–188 ; Froriep, Notizen, XLI., 1834, col. 65–67 ; Roy. Inst. Journ. II., 1831, pp. 396–397.

—— **40.** Du carbonate de chaux cristallisé, et de l'action simultanée des matières sucrées ou mucilagineuses sur quelques oxides métalliques, par l'intermédiaire des alcalis et des terres. Annal. de Chimie, XLVII., 1831, pp. 5–20.

—— **41.** Considérations générales sur les décompositions électro-chimiques et la réduction de l'oxide de fer, de la zircone, et de la magnésie, à l'aide de forces électriques peu énergiques. Annal. de Chimie, XLVIII., 1831, pp. 337–353 ; Paris, Mém. de l'Inst. XII., 1833, pp. 581–597.

—— **42.** Sur les courants électriques produits soit par d'autres courants, soit par des aimants. Annal. de Chimie, XLVIII.,1831, pp. 403–405.

—— **43.** De la cristallisation de quelques oxides métalliques. Annal. de Chimie, LI., 1832, pp. 101–107 ; Schweigger, Journ. LXVI. (= *N. Jahrb.* VI.), 1832, pp. 401–406 ; Trommsdorff, N. Journ. d. Pharm. XXVI., 1833 (*St.* 2), pp. 235–240.

—— **44.** Premier mémoire sur l'application des forces électro-chimiques à la physiologie végétale. Annal. de Chimie, LII., 1833, pp. 240–260 ; Guillemin, Archiv. Bot. I., 1833, pp. 385–401 ; Journ. de Pharm. XIX., 1833, pp. 560–561 ; Liebig, Annal. VIII., 1833, pp. 92–109 ; Froriep, Notizen, XXXIX., 1834. col. 113–119, 129–132.

—— **45.** Du sulfure de plomb cristallisé. Annal. de Chimie, LIII., 1833, pp. 105–108 ; Journ. de Pharm. XX., 1834, pp. 27–28 ; Poggend. Annal. XXXI., 1834, pp, 46–48.

—— **46.** Recherches sur les altérations qui ont lieu à la surface du sol ou dans l'intérieur du globe. Annal. de Chimie, LIV., 1833, pp. 143–155.

—— **47.** Rapport fait à l'Académie des Sciences sur un Mémoire de M. Fournet, qui a pour titre : "Des divers accidents et des formations successives qui ont produit l'état actuel des filons des environs de Pont-Gibaud." Annal. de Chimie, LIV., 1833, pp. 155–163.

Becquerel, *Antoine César.* **48.** Expériences sur le développement de l'électricité par la pression : lois de ce développement. Paris, Mém. de l'Inst. XII., 1833, pp. 551–580.

—— **49.** Deuxième mémoire sur la décomposition des roches, et les doubles décompositions dans les actions lentes. Annal. de Chimie, LVI., 1834, pp. 97–107 ; Erdm. Journ. Prak. Chem. II., 1834, pp. 93–97.

—— **50.** Des effets électriques produits dans le contact de certaines substances minérales et de l'eau ; de la formation du carbonate hydraté de cuivre cristallisé au moyen des forces électriques. Annal. de Chimie, LX., 1835, pp. 164–174.

—— **51.** Des propriétés électriques particulières que les substances minérales conductrices acquièrent quand elles sont en contact avec l'eau. Paris, Comptes Rendus, I., 1835, pp. 17–19 ; Bibl. Univ. I., 1836, pp. 155–160 ; L'Institut, III., 1835, pp. 251–252.

—— **52.** Sur les moyens de produire à l'aide de forces électriques très-faibles de la Malachite semblable à celle que l'on trouve dans la nature. Paris, Comptes Rendus, I., 1835, p. 19 ; Taylor, Scientif. Mem. I., 1837, pp. 414–442.

—— **53.** Appareil électro-chimique destiné à opérer des décompositions, comme la pile de Volta. Paris, Comptes Rendus, I., 1835, pp. 455–457 ; Bibl. Univ. LX., 1835, pp. 215–218 ; Froriep, Notizen, XLVI., 1835, col. 289–291 ; Poggend. Annal. XXXVII., 1836, pp. 429–432 ; Sturgeon, Ann. Electr. I., 1836–37, pp. 398–404.

—— **54.** Des variétés de forme de chaux carbonatée, observées dans le calcaire de Clamecy. Paris, Mém. de l'Inst. XIII., 1835, pp. 31–37.

—— **55.** Notice sur les applications des forces électriques aux phénomènes géologiques et physiologiques naturels. Bibl. Univ. I., 1836, pp. 1–15, 197–210.

—— **56.** Note sur un courant électrique qui possède la faculté de produire des décompositions chimiques, et non celle d'échauffer les corps. Paris, Comptes Rendus, II., 1836, pp. 14–17 ; Bibl. Univ. LX., 1835, pp. 218–220.

—— **57.** Expériences sur la torpille. Paris, Comptes Rendus, III., 1836, pp. 135–136.

—— **58.** Précis de nos connaissances sur la phosphorescence. Bibl. Univ. VIII., 1837, pp. 134–155.

—— **59.** Des relations de la physique avec la chimie et les sciences naturelles. Bibl. Univ. IX., 1837, pp. 145–159 ; Edinb. New. Phil. Journ. XXIII., 1837, pp. 315–326 ; Froriep, Notizen, III., 1837, col. 1–8.

—— **60.** Des réactions chimiques produites dans le contact des métaux oxidables, de l'eau distillée, et des composés insolubles. Paris, Comptes Rendus, IV., 1837, pp. 824–834 ; Sturgeon, Ann. Electr. II., 1838, pp. 30–38.

Becquerel, *Antoine César.* **61.** Description et usage de la balance électro-magnétique et de la pile à courants constants. Paris, Comptes Rendus, IV., 1837, pp. 35–41 ; Annal. de Chimie, LXVI., 1837, pp. 84–93 ; Phil. Mag. X., 1837, pp. 358–364 ; Poggend. Annal. XLII., 1837, pp. 307–314.

—— **62.** Influence de l'électricité sur la circulation du Chara. Paris, Comptes Rendus, V., 1837, pp. 784–788.

—— **63.** Réflexions sur le traitement électrochimique des minerais d'argent, de cuivre et de plomb. Bibl. Univ. XVI., 1838, pp. 143–152 ; Poggend. Annal. XLV., 1838, pp. 285–286.

—— **64.** Développemens relatifs aux décompositions chimiques opérées avec les appareils hydro-électriques simples. Paris, Comptes Rendus, VI., 1838, pp. 125–129 ; Bibl. Univ. XIV., 1838, pp. 129–133 ; Froriep, Notizen, VI., 1838, col. 17–21 ; Poggend. Annal. XLIV., 1838, pp. 537–541.

—— **65.** Examen du conglomérat formé autour d'une ancre trouvée dans la Seine. Paris, Comptes Rendus, VI., 1838, pp. 213–217.

—— **66.** Nouvelles recherches sur le dégagement de la chaleur dans le frottement. Paris, Comptes Rendus, VII., 1838, pp. 363–368 ; Annal. de Chimie, LXX., 1839, pp. 324–333 ; Bibl. Univ. XVI., 1838, pp. 367–374 ; XXIII., 1839, pp. 392–406 ; Paris, Mém. de l'Inst. XVII., 1840, pp. 181–199 ; Sturgeon, Ann. Electr. III., 1838–39, pp. 452–458.

—— **67.** Sur la propriété qu'a la lumière de rendre des corps phosphorescents. Paris, Comptes Rendus, VIII., 1839, p. 183.

—— **68.** De quelques propriétés nouvelles relatives au pouvoir phosphorescent de la lumière électrique. Paris, Comptes Rendus, VIII., 1839, pp. 216–223 ; Bibl. Univ. XIX., 1839, pp. 415–422 ; Poggend. Annal. XLIX., 1840, pp. 543–548.

—— **69.** Nouvelles recherches sur les effets électriques de contact. Paris, Comptes Rendus, VIII., 1839, pp. 424–432.

—— **70.** Observations sur les moyens à employer pour évaluer la température des végétaux. Paris, Comptes Rendus, VIII., 1839, pp. 939–941 ; Sturgeon, Ann. Electr. IV., 1839–40, pp. 212–213.

—— **71.** De la force chimique du courant, considérée dans ses rapports avec les affinités, et de la mesure de ces dernières. Paris, Comptes Rendus, X., 1840, pp. 671–675 ; Sturgeon, Ann. Electr. VI., 1841, pp. 411–415.

—— **72.** Considérations générales sur les applications des sciences physico-chimiques aux sciences naturelles, aux arts et à l'industrie. Paris, Comptes Rendus, XI., 1840, pp. 75–86 ; Bibl. Univ. XXIX., 1840, pp. 386–400 ; Froriep, Notizen, XV., 1840, col. 241–250 ; Sturgeon, Ann. Electr. V., 1840, pp. 249–252.

Becquerel, *Antoine César.* **73.** Observations sur la présence de sables aurifères dans le gisement de la galène de St. Santin Cantalés, et sur le gisement des sables aurifères en général. Paris, Comptes Rendus, XI., 1840, pp. 129–134 ; Bibl. Univ. XXIX., 1840, pp. 419–424.

—— **74.** Mémoire sur le rayonnement chimique qui accompagne la lumière solaire et la lumière électrique. Paris, Comptes Rendus, XI., 1840, pp. 702–703.

—— **75.** Mémoire sur le rayonnement chimique qui accompagne la lumière, et sur les effets électriques qui en resultent. Paris, Comptes Rendus, XIII., 1841, pp. 198–202 ; Bibl. Univ. XXXV., 1841, pp. 136–159.

—— **76.** Des propriétés électro-chimiques des corps simples et de leur application aux arts. Paris, Comptes Rendus, XIV., 1842, pp. 121–147 ; Archives de l'Électr. II., 1842, pp. 151–186 ; London, Electr. Soc. Proc. 1843, pp. 424–431.

—— **77.** Observations sur la pile voltaïque présentée par M. Reiset. Annal. de Chimie, VII., 1843, pp. 358–362 ; Walker, Electr. Mag. I., 1845, pp. 25–28.

—— **78.** Mémoire sur l'application électrochimique des oxydes et des métaux sur des métaux. Paris, Comptes Rendus, XVII., 1843, pp. 1–16, 53–55 ; Annal. de Chimie, VIII., 1843, pp. 402–425 ; Archives de l'Électr. III., 1843, pp. 345–365, 366–368 ; Erdm. Journ. Prak. Chem. XXXIII., 1844, pp. 65–79 ; Journ. de Pharm. V., 1844, pp. 338–351 ; Sturgeon, Annal. Electr. X., 1843, pp. 151–157 ; Walker, Electr. Mag. I., 1845, pp. 85–100.

—— **79.** Deuxième mémoire sur la coloration des métaux. Paris, Comptes Rendus, XVIII., 1844, pp. 197–218 ; Archives de l'Électr. IV., 1844, pp. 74–102 ; Walker, Electr. Mag. I., 1845, pp. 251–272.

—— **80.** Mémoire sur la précipitation des métaux par d'autres métaux. Paris, Comptes Rendus, XVIII., 1844, pp. 449–472, 554–558 ; Archives de l'Électr. IV., 1844, pp. 520–551, 552–556.

—— **81.** Des courants électriques terrestres et de leur influence sur les phénomènes de décomposition et de recomposition dans les terrains qu'ils parcourent. Paris, Comptes Rendus, XIX., 1844, pp. 1052–1069 ; Archives de l'Électr. IV., 1844, pp. 557–579.

—— **82.** Sur les applications de l'électro-chimie à l'étude des phénomènes de décomposition et recomposition terrestres. Paris, Comptes Rendus, XX., 1845, pp. 1509–1536 ; Archives de l'Électr. V., 1845, pp. 233–269.

Becquerel, *Antoine César.* **83.** De la polarité produite par les décharges électriques, et de son emploi pour la détermination de la quantité d'électricité ordinaire associée aux parties constituantes des corps, dans les combinaisons. Paris, Comptes Rendus, XXII., 1846, pp. 381–404.

—— **84.** Nouvelles applications de l'électrochimie à la décomposition de substances minérales. Paris, Comptes Rendus, XXII., 1846, pp. 781–788 ; Bibl. Univ. Archives, II., 1846, pp 32–42 ; Erdm. Journ. Prak. Chem. XL., 1847, pp. 449–457.

—— **85.** De la décomposition des sels neutres, à base de potasse et de soude. Paris, Comptes Rendus, XXII., 1846, pp. 1065–1068 ; Erdm. Journ. Prak. Chem. XXXVIII., 1846, pp. 309–312.

—— **86.** Sur les circuits électro-chimiques simples formés de liquides. Paris, Comptes Rendus, XXIV., 1847, pp. 505–516.

—— **87.** De l'action du sel sur la végétation et de son emploi en agriculture. Paris, Comptes Rendus, XXV., 1847, pp. 513–517 ; Froriep, Notizen, V., 1848, col. 101–103.

—— **88.** Considérations générales sur la théorie électro-chimique. Paris, Comptes Rendus, XXVIII., 1849, pp. 658–663 ; Annal. de Chimie, XXVII., 1849, pp. 5–41 ; Erdm. Journ. Prak. Chem. XLVIII., 1849, pp. 193–221.

—— **89.** Note relative au développement de l'électricité dans l'acte de la contraction musculaire. Paris, Comptes Rendus, XXVIII., 1849, pp. 663–664 ; Phil. Mag. XXXV., 1849, pp. 53–54.

—— **90.** Mémoire sur l'amélioration de la Sologne. Paris, Comptes Rendus, XXIX., 1849, pp. 461–470.

—— **91.** Communication relative aux expériences de M. Schönbein sur l'ozone. Paris, Comptes Rendus, XXX., 1850, pp. 13–16.

—— **92.** Recherches sur les causes qui dégagent de l'électricité dans les végétaux, et sur les courants végéto-terrestres. [1850.] Annal. de Chimie, XXXI., 1851, pp. 40–67 ; Journ. de Pharm. XIX., 1851, pp. 212–215 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 36–66 ; Silliman, Journ. XII., 1851, pp. 83–97.

—— **93.** Mémoire sur les effets électriques produits dans les tubercules, les racines et les fruits, lors de l'introduction d'aiguilles galvanométriques en platine. Paris, Comptes Rendus, XXXII., 1851, pp. 657–663 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 301–337.

—— **94.** Mémoire sur la réproduction de plusieurs composés minéraux. Paris, Comptes Rendus, XXXIV., 1852, pp. 29–33 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 367–377 ; Edinb. New Phil. Journ. LII., 1852, pp. 330–333 ; Erdm. Journ. Prak. Chem. LV., 1852, pp. 337–342.

Becquerel, *Antoine César.* **95.** Nouveaux développements relatifs aux effets chimiques produits au contact des solides et des liquides. Paris, Comptes Rendus, XXXIV., 1852, pp. 573-578 ; Paris, Mém. de l'Inst. XXIII., 1853, pp. 379 -397 ; Erdm. Journ. Prak. Chem. LVI., 1852, pp. 471-477.

—— **96.** Note sur des composés chimiques, produits au contact des solides et des liquides, en vertu d'actions lentes. Paris, Comptes Rendus, XXXVI., 1853, pp. 209-213 ; Erdm. Journ. Prak. Chem. LIX., 1853, pp. 7-11.

—— **97.** Description de deux appareils dépolarisateurs destinés à donner des courants électriques constants. Paris, Comptes Rendus, XXXVIII., 1854, pp. 238-241.

—— **98.** Nouvelles recherches sur les principes qui régissent le dégagement de l'électricité dans les actions chimiques. Paris, Comptes Rendus, XXXVIII., 1854, pp. 757-761 ; Annal. de Chimie, XLII., 1854, pp. 385-418.

—— **99.** Note sur la production des courants pyro-électriques. Paris, Comptes Rendus, XXXVIII., 1854, pp. 905-910,

—— **100.** Traitement électro-chimique des minerais d'argent, de plomb, et de cuivre. Paris, Comptes Rendus, XXXVIII., 1854, pp. 1095-1101 ; Erdm. Journ. Prak. Chem. LXII., 1854, pp. 369-376.

—— **101.** Mémoire sur les effets électriques produits au contact des terres et des eaux douces. Paris, Comptes Rendus, XLI., 1855, pp. 733-735 ; Cantu, Cronaca, II., 1856, pp. 71-75.

—— **102.** Recherches sur l'électricité de l'air et de la terre, et sur les effets chimiques produits en vertu d'actions lentes avec ou sans le concours des forces électriques. Paris, Comptes Rendus, XLIII., 1856, pp. 1101-1108 ; Paris, Mém. de l'Inst. XXVII., 1856, pp. 153-294.

—— **103.** Considérations générales sur le mode d'intervention des phénomènes météorologiques dans l'acclimatation des végétaux et des animaux. Paris, Acclim. Soc. Bull. V., 1858, pp. 361-375.

—— **104.** Mémoire sur la mesure des températures au-dessous du sol et dans l'air à diverses hauteurs, au moyen d'appareils thermo-électriques. Paris, Comptes Rendus, XLVI., 1858, pp. 1183-1186.

—— **105.** Emploi des courants électriques pour la mesure des températures. Paris, Comptes Rendus, XLVII., 1858, pp. 173-175.

—— **106.** Du thermomètre électrique et de son emploi pour la détermination de la température de l'air, de celle de la terre et des végétaux. Paris, Comptes Rendus, XLVII., 1858, pp. 717-721.

—— **107.** Troisième mémoire sur la température des végétaux. Paris, Comptes Rendus, XLVIII., 1859, pp. 764-768 ; L., 1860, pp. 136-141.

Becquerel, *Antoine César.* **108.** Quatrième mémoire sur la température des végétaux dans les différentes saisons. Paris, Comptes Rendus, XLIX., 1859, pp. 532-536.

—— **109.** Quatrième mémoire sur la physique des végétaux. Paris, Comptes Rendus, L., 1860, pp. 331-335.

—— **110.** De la température des végétaux et du sol dans le nord de l'Amérique septentrionale. Paris, Comptes Rendus, L., 1860, pp. 507-510.

—— **111.** Observations sur l'emploi des composés insolubles dans les piles voltaïques. Paris, Comptes Rendus, L., 1860, pp. 660-662.

—— **112.** Mémoire sur la température de l'air au nord près du sol, à une certaine distance au-dessus et au sommet des arbres. Paris, Comptes Rendus, L., 1860, pp. 967-973.

—— **113.** Recherches sur la température de l'air au-dessus des arbres et à une certaine distance. Paris, Comptes Rendus, LI., 1860, pp. 837-843.

—— **114.** Mémoire sur la température de l'air, au nord, observée avec le thermomètre ordinaire, et sur celle de l'air libre, loin et près des arbres, observée avec le thermomètre électrique. Paris, Comptes Rendus, LII., 1861, pp. 993-998.

—— **115.** Mémoire sur la coloration électro-chimique et le dépôt du peroxyde de fer sur les lames de fer et d'acier. Paris, Comptes Rendus, LII., 1861, pp. 1053-1056 ; Chemical News, IV., 1861, pp. 5-6.

—— **116.** Sur les courants dits telluriques. Paris, Comptes Rendus, LII., 1861, p. 1093.

—— **117.** Psychromètrie électrique. Paris, Comptes Rendus, LII., 1861, pp. 1281-1283.

—— **118.** Mémoire sur la production électrique de la silice et de l'alumine hydratées. Paris, Comptes Rendus, LIII., 1861, pp. 1196-1202.

—— **119.** Mémoire sur la température moyenne d'un lieu. Paris, Comptes Rendus, LIV., 1862, pp. 301-313.

—— **120.** Second mémoire sur la température moyenne de l'air à diverses hauteurs. Paris, Comptes Rendus, LIV., 1862, pp. 993-995, 1239-1241.

—— **121.** Nouvelles recherches sur la température de l'air et sur celle des couches superficielles de la terre. Paris, Comptes Rendus, LV., 1862, pp. 897-901.

Becquerel, *Antoine César,* et *A. M.* **Ampère.** Note sur une expérience relative à la nature du courant électrique.. Annal. de Chimie, XXVII., 1824, pp. 29-32.

—— —— **2.** Expériences sur les courants électriques produits par l'influence d'un autre courant. Annal. de Chimie, XLVIII., 1831, pp. 405-412 ; Poggend. Annal. XXIV., 1832, pp. 612-621.

Becquerel, *Antoine César,* et *Edmond* **Becquerel.** Réduction électro-chimique du cobalt, du nickel, de l'or, de l'argent et du platine. Paris, Comptes Rendus, LV., 1862, pp. 18–20; Chemical News, VI., 1862, pp. 126–127; Liebig, Annal. CXXIV., 1862, pp. 311–315.

Becquerel, *Antoine César, Edmond* **Becquerel,** et **Biot.** Mémoire sur la phosphorescence produite par la lumière électrique. Paris, Mus. Hist. Nat. Archives, I., 1839, pp. 215–242.

Becquerel, *Antoine César,* et **Biot.** Sur la nature de la radiation émanée de l'étincelle électrique, qui excite la phosphorescence à distance. Paris, Comptes Rendus, VIII., 1839, pp. 223–229; Genève, Bibl. Univ. XIX., 1839, pp. 422–428; Poggend. Annal. XLIX., 1840, pp. 549–556.

Becquerel, *Antoine César,* et **Breschet.** Premier mémoire sur la chaleur animale. Annal. de Chimie, LIX., 1835, pp. 113–136; Ann. Sci. Nat. III. (*Zool.*), 1835, pp. 257–273; IV., pp. 243–246; Bibl. Univ. LIX., 1835, pp. 235–258; Froriep, Notizen, XLVII., 1836, col. 1–9, 22–24.

—— —— **2.** Seconde mémoire sur la chaleur animale. Expériences sur différens cas pathologiques. Paris, Comptes Rendus, I., 1835, pp. 28–30.

—— —— **3.** Recherches expérimentales physico-physiologiques sur la température des tissus et des liquides animaux. Paris, Comptes Rendus, III., 1836, pp. 771–781; Ann. Sci. Nat. VII. (*Zool.*), 1837, pp. 94–101; Froriep, Notizen, I., 1837, col. 289–297.

—— —— **4.** Procédé électro-chimique pour déterminer la température de la terre et des lacs à diverses profondeurs. Bibl. Univ. VII., 1837, pp. 173–177.

—— —— **5.** Nouvelles observations sur la mesure de la température des tissus organiques du corps de l'homme et des animaux au moyen des effets thermo-électriques. Paris, Comptes Rendus, VI., 1838, pp. 429–437; Ann. Sci. Nat. IX. (*Zool.*), 1838, pp. 271–280; Bibl. Univ. XIV., 1838, pp. 356–366; Froriep, Notizen, VI., 1838, col. 305–312; Sturgeon, Ann. Electr. II., 1838., pp. 467–474.

Beaufoy, *Henry.* Journal kept during an Aerial voyage. Thomson, Ann. Phil. IV., 1814, pp. 282–291.

Beaufoy, *Mark.* Description of a Compass for accurate observations on the magnetic variation. Thomson, Ann. Phil. II., 1813, pp. 96–98.

—— **2.** Magnetical observations at Hackney Wick. Thomson, Ann. Phil. II., 1813, pp. 301–302.

—— **3.** Experiments on the stability of vessels containing a Well on board. Thomson, Ann. Phil. II., 1813, pp. 355–356.

—— **4.** Some account of a set of experiments made at Greenland Dock, in the years 1793–1798. Thomson, Ann. Phil. III., 1814, pp. 42–50.

—— **5.** Description of an instrument to measure and register the rise and fall of the Tide throughout the whole Flow and Ebb. Thomson, Ann. Phil. VI., 1815, pp. 273–281.

—— **6.** On the Stability of Vessels. Thomson, Ann. Phil. VII., 1816, pp. 184–204.

—— **7.** Experiments on the Resistance of Air, and on air as a moving power. Thomson, Ann. Phil. VIII., 1816, pp. 94–108.

—— **8.** A plan for an invariable Standard of Measure, under the same parallel of Latitude. Thomson, Ann. Phil. VIII., 1816, pp. 211–213.

—— **9.** Narrative of a journey from the village of Chamouni, in Switzerland, to the summit of Mont Blanc, undertaken on 8 Aug. 1787. Thomson, Ann. Phil. IX., 1817, pp. 97–103.

Beaufoy, *Mark.* **10.** Experiments on the strength of different kinds of wood for ascertaining the law of the resistance, or how much more weight wood will sustain when the breadth and thickness are augmented. Thomson, Ann. Phil. IX., 1817, pp. 274–305.

—— **11.** Suggestions and remarks on naval subjects: on rigging, on steering, on the form of the rudder, on anchors; with observations on the height of masts and upper sails, on the dry rot, and on the felling and preservation of timber. Thomson, Ann. Phil. X., 1817, pp. 6–10.

—— **12.** Suggestions for building experimental vessels for the improvement of the Navy, with remarks on the present mode of construction, and some experiments on the comparative resistance of water on differently shaped solids. Thomson, Ann. Phil. X., 1817, pp. 256–264.

—— **13.** On the North-West passage and the insular form of Greenland. Thomson, Ann. Phil. X., 1817, pp. 424–428.

—— **14.** Some account of the appearance and effects of a singular Storm seen at Bushey Heath, Sunday, 26 April 1818. Thomson, Ann. Phil. XI., 1818, pp. 442–445.

—— **15.** Observations on the Spiral as a motive power to impel Ships through the water, with remarks when applied to measure the velocity of water and wind. Thomson, Ann. Phil. XII., 1818, pp. 246–249.

—— **16.** Observations on the Magnetic Needle. Thomson, Ann. Phil. XIII., 1819, pp. 394–396; Annal. de Chimie, XI., 1819, pp. 332–335.

—— **17.** On the construction of Sails. Thomson, Ann. Phil. XIV., 1819, pp. 185–189.

—— **18.** On the going of a Clock with a wooden Pendulum. Thomson, Ann. Phil. XV., 1820, pp. 176–177; III., 1822, pp. 406–407; XI., 1826, pp. 161–163; Edinb. Phil. Journ. IV., 1821, pp. 355–357.

—— **19.** On the retrograde Variation of the Compass. Thomson, Ann. Phil. XV., 1820, pp. 338–340; Edinb. Phil. Journ. III., 1820, pp. 179–181.

—— **20.** Observations on the late Solar Eclipse. Thomson, Ann. Phil. XVI., 1820, pp. 277–278.

—— **21.** Description of a new Wind Gauge, or apparatus for determining the effective pressure of the Wind upon a given Surface. Thomson, Ann. Phil. II., 1821, pp. 431–433.

—— **22.** On a new Anemometer. Thomson, Ann. Phil. III., 1822, pp. 10–11.

—— **23.** Experiments and observations on the resistance of water, with remarks on the apparatus. Thomson, Ann. Phil. III., 1822, pp. 276–288.

Beaufoy, *Mark.* **24.** Experiments and calculations for comparing the force of a Body in motion with Dead weight. Thomson, Ann. Phil. IV., 1822, pp. 165–171.

—— **25.** Experiments on the Stability of floating bodies. Thomson, Ann. Phil. VII., 1824, pp. 81–89.

—— **26.** An account of some observations made during a late Aerial Excursion. Thomson, Ann. Phil. VIII., 1824, pp. 209–212; Froriep, Notizen, IX., 1825, col. 1–6.

—— **27.** Remarks on the construction of Vessels. Thomson, Ann. Phil. VIII., 1824, pp. 264-266.

—— **28.** On Naval improvement. Thomson, Ann. Phil. X., 1825, pp. 161–164.

—— **29.** Observations made at Bushey Heath (North Latitude 51° 37′ 44″.3; West Longitude, in time, from Greenwich, 0^h 1^m 20^s.93), from May 17, 1816, to December 7, 1824. Astron. Soc. Mem. II., 1826, pp. 129–135.

—— **30.** Astronomical Observations made at Bushey Heath (North Latitude 51° 37′ 44″.3; West Longitude, in Time, from Greenwich, 0^h 1^m 20^s.93), in the Years 1825 and 1826; comprehending: 1. Transits of the Moon and Moon-culminating Stars. 2. Occultations of Stars by the Moon. 3. Lunar Eclipses. 4. Eclipses of Jupiter's Satellites. [1826–27.] Astron. Soc. Mem. III., 1829, pp. 69–75.

Beaujeu, —— *de.* Ueber die Fabrikation des Runkelrübenzukers mit Hülfe der Apparate mit ununterbrochener Circulation. Dingler, Polytechn. Journ. LV., 1835, pp. 286–307, 367–392.

Beaulavon, ——. Notice sur un ciment romain trouvé à St.-Paul de Courthonne (Calvados). Eure, Recueil d. Trav. II., 1842, pp. 180–183.

—— **2.** Sur un procédé galvanoplastique. Eure, Recueil d. Trav. II., 1842, pp. 184–185.

Beaumont, *Élie de.* *See* Élie de Beaumont.

Beaumont, ——. Des Engrais, et de la manière de les composer. Bayeux, Mém. II., 1844, pp. 169–184.

Beaumont, *Albanis.* Description topographique et minéralogique de la Vallée de Sixt. Paris, Bull. Soc. Encour. VII., 1809, pp. 97–103.

Beaumont, *H.* Essais d'Agriculture dans le Kamtchatka. Genève, Soc. Géogr. Mém. I., 1860, pp. 117–131.

Beaumont, *J. T. Barber.* On the origin of the vegetation of our Coal-fields and Wealdens. Mining Review, V., 1839, pp. 161–162; Geol. Soc. Proc. III. 1839, p. 152; Phil. Mag. XVII., 1839, pp. 67–68.

Beaumont, *W.* Beobachtungen über den Magensaft und die Verdauung. (*Transl.*) Froriep, Notizen, XLII., 1834, col. 179–181.

Beaumont, *W.* **2.** Ueber die Verdauung. (*Transl.*) Froriep, Notizen, XLIII., 1835, col. 257–266, 273–281; VIII., 1838, col. 53–55.

Beaunier, ——. Mémoire sur la situation de la mine de cuivre de Stolzembourg. Journ. des Mines, XVI., 1804, pp. 137–156.

—— **2.** Notice sur les travaux relatifs aux houillères du département de la Sarre. Journ. des Mines, XXVI., 1809, pp. 55–58.

—— **3.** Mémoire sur la topographie extérieure et souterraine du territoire houiller de St.-Étienne et de Rive-de-Gier, département de la Loire. Annal. des Mines, I., 1816, pp. 1–176.

Beaunier et **Cordier.** Rapport à la Conférence des Mines sur les manganèses oxydés, susceptibles d'être employés dans les procédés des arts. Journ. des Mines, X., 1800, pp. 763–788.

Beaunier et **Gallois.** Expériences faites à la fonderie de Poullaouen, dans le but d'apprécier la température de quelques fourneaux, aux époques principales des opérations qui s'y exécutent. Journ. des Mines, XII., 1801, pp. 272–276.

—— —— **2.** Expériences faites sur les trompes de la fonderie de Poullaouen. Journ. des Mines, XVI., 1804, pp. 37–48; Nicholson, Journ. XII., 1805, pp. 48–56; Gilbert, Annal. XXVIII., 1808, pp. 377–396; Karsten, Archiv f. Bergbau, VI., 1823, pp. 161–170.

Becquerel, *Antoine César.* Note sur une couche de Lignite renfermant du Succin et des cristaux d'une substance qui paroît analogue au Mellite, trouvée récemment à Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 235–240.

—— **2.** Note sur les Cristaux trouvés dans le Lignite d'Auteuil. Journ. de Phys. LXXXIX., 1819, pp. 308–310.

—— **3.** Note sur les variétés de forme de Chaux carbonatée, observées dans le calcaire de Clamecy. Journ. de Phys. LXXXIX., 1819, pp. 462–467; Paris, Mém. de l'Inst. XIII., 1835, pp. 31–37.

—— **4.** Sur le développement de l'électricité dans les corps par la pression et la dilatation. Paris, Soc. Philom. Bull. 1820, pp. 149–155.

—— **5.** Sur le développement de l'électricité par la pression. Annal. de Chimie, XXII., 1823, pp. 5–34; Quart. Journ. Sci. XV., 1823, p. 368; Tilloch, Phil. Mag. LXII., 1823, pp. 204–211, 263–274.

—— **6.** Sur les fils très-fins de platine et d'acier; et sur la distribution du magnétisme libre dans ces derniers. Annal. de Chimie, XXII., 1823, pp. 113–137; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 374–379; Paris, Mém. de l'Inst. XI., 1832, pp. 13–32.

—— **7.** De l'argile plastique d'Auteuil. et des substances qui l'accompagnent. Annal. de Chimie, XXII., 1823, pp. 348–358; Paris, Mém. de l'Inst. XI., 1832, pp. 1–11.

—— **8.** Du développement de l'électricité par le contact de deux portions d'un même métal, dans un état suffisamment inégal de température; des piles voltaïques construites avec des fils d'un même métal et même avec un seul fil, et de quelques effets électriques qui naissent dans les combinaisons chimiques. Annal. de Chimie, XXIII., 1823, pp. 135–155; Schweigger, Journ. XXXIX. (= *Jahrb.* IX.), 1823, pp. 448–472.

—— **9.** Des effets électriques qui se développent pendant diverses actions chimiques. Annal. de Chimie, XXIII., 1823, pp. 244–258; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 387–407.

—— **10.** Nouveaux résultats électro-chimiques. Annal. de Chimie, XXIII., 1823, pp. 259–260.

Becquerel, *Antoine César.* **11.** De l'état de l'électricité développée pendant les actions chimiques, et de la mesure de ces dernières au moyen des effets électriques qui en résultent. Annal. de Chimie, XXIV., 1823, pp. 192–206.

—— **12.** D'un système de galvanomètres propres à rendre sensibles de très-faibles quantités d'électricité ; et des courants électriques qui ont lieu dans les actions capillaires et dans les dissolutions. Annal. de Chimie, XXIV., 1823, pp. 337–355 ; Schweigger, Journ. XL. (= *Jahrb.* X.), 1824, pp. 408–430.

—— **13.** Développements relatifs aux effets électriques produites dans les actions chimiques, et de la distribution de l'électricité dans la pile voltaïque, en tenant compte des actions électromotrices des liquides conducteurs sur les métaux. Paris, Soc. Philom. Bull. 1823, pp. 72–73.

—— **14.** Des actions magnétiques ou actions analogues, produites dans tous les corps par l'influence de courants électriques très-énergiques. Annal. de Chimie, XXV., 1824, pp. 269–278 ; Paris, Bull. Soc. Philom. 1824, pp. 22–23 ; Quart. Journ. Sci. XVII., 1824, pp. 372–373 ; Schweigger, Journ. XLII. (= *Jahrb.* XII.), 1824, pp. 439–449.

—— **15.** Des actions électro-motrices produites par le contact des métaux et des liquides, et d'un procédé pour reconnaître, à l'aide des effets électro-magnétiques, les changements qu'éprouvent certaines dissolutions au contact de l'air. Annal. de Chimie, XXV., 1824, pp. 405–415 ; Paris, Bull. Soc. Philom. 1824, pp. 37–39 ; Poggend. Annal. II., 1824, pp. 169–179 ; Quart. Journ. Sci. XVII., 1824, pp. 373–375, 379–380 ; Schweigger, Journ. XLIII. (= *Jahrb.* XIII.), 1825, pp. 71–85 ; Thomson, Ann. Phil. VIII., 1824, pp. 42–45.

—— **16.** Développements relatifs aux effets électriques observés dans les actions chimiques ; et de la distribution de l'électricité dans la pile de Volta, en tenant compte des actions électromotrices des liquides sur les métaux. Annal. de Chimie, XXVI., 1824, pp. 176–188 ; Poggend. Annal. II., 1824, pp. 180–190 ; Quart. Journ. Sci. XVIII., 1825, pp. 171–172 ; Schweigger, Journ. XLIV. (= *Jahrb.* XIV.), 1825, pp. 153–176.

—— **17.** Des actions électro-motrices de l'eau et des liquides en général sur les métaux, et des effets électriques qui ont lieu, 1° dans le contact de certaines flammes et des métaux ; 2do dans la combustion. Annal. de Chimie, XXVII., 1824, pp. 5–18 ; Paris, Bull. Soc. Philom. 1824, pp. 85–86 ; Poggend. Annal. II., 1824, pp. 191–205 ; Quart. Journ. Sci. XVIII., 1825, pp. 383–384 ; Tilloch, Phil. Mag. LXIV., 1824, pp. 401–409.

Becquerel, *Antoine César.* **18.** Sur les effets électro-dynamiques produits pendant la décomposition de l'eau oxigénée par le contact de divers corps, et sur d'autres phénomènes électro-chimiques. Paris, Soc. Philom. Bull. 1824, pp. 129–133 ; Annal. de Chimie, XXVIII., 1825, pp. 19–36 ; Quart. Journ. Sci. XVII., 1824, pp. 135–138 ; 1825, pp. 169–174, 382–383 ; Trommsdorff, N. Journ. Pharm. XI., 1825, pp. 236–263.

—— **19.** Du pouvoir conducteur des métaux pour l'électricité, et de l'intensité de la force électrodynamique en un point quelconque d'un fil métallique qui joint les deux extrémités d'une pile. Paris, Soc. Philom. Bull. 1824, pp. 179–182 ; Annal. de Chimie, XXXII., 1826, pp. 420–430 ; Quart. Journ. Sci. XXII., 1827, pp. 374–379.

—— **20.** Recherches sur les effets électriques de contact produits dans les changemens de température, et application qu'on peut en faire à la détermination des hautes températures. Annal. de Chimie, XXXI., 1826, pp. 371–392 ; Baumgartner, Zeitschr. I., 1826, pp. 430–450 ; Edinb. Journ. Sci. V., 1826, pp. 305–316, 316–319 ; Froriep, Notizen, XIV., 1826, col. 33–36 ; Paris, N. Bull. Soc. Philom. 1826, pp. 37–39 ; Poggend. Annal. IX., 1827, pp. 345–359.

—— **21.** Des décompositions chimiques opérées avec des forces électriques à très-petite tension. [1826.] Annal. de Chimie, XXXIV., 1827, pp. 152–163 ; Paris, Mém. de l'Inst. XI., 1832, pp. 33–43 ; Poggend. Annal. XI., 1827, pp. 457–465.

—— **22.** De l'électricité dégagée dans les actions chimiques, et de l'emploi de très-faibles courants électriques pour provoquer la combinaison d'un grand nombre de corps. Annal. de Chimie, XXXV., 1827, pp. 113–140 ; Brugnatelli, Giorn. X., 1827, pp. 345–353 ; Quart. Journ. Sci. II., 1827, pp. 462–464.

—— **23.** De quelques phénomènes électriques produits par la pression et le clivage des cristaux. Annal. de Chimie, XXXVI., 1827, pp. 265–271 ; Poggend. Annal. XII., 1828, pp. 147–152 ; Quart. Journ. Sci. I., 1828, pp. 478–480.

—— **24.** Sur les actions magnétiques excitées dans tous les corps par l'influence d'aimans très-énergiques. Annal. de Chimie, XXXVI., 1827, pp. 337–349 ; Paris, Mém. de l'Inst. XI., 1832, pp. 45–57 ; Poggend. Annal. XII., 1828, pp. 622–624 ; Quart. Journ. Sci. I., 1828, pp. 218–219.

—— **25.** Sur l'électricité acquise par les fils de métal plongés dans les flammes. Annal. de Chimie, XXXVI., 1827, pp. 328–331 ; Poggend. Annal. XI., 1827, pp. 437–441.

—— **26.** Magnetismus des Wismuths und des Antimons. (*Transl.*) Poggend. Annal. X., 1827, pp. 292–294 ; Quart. Journ. Sci. II., 1827, p. 202.

Becquerel, *Antoine César.* **27.** Sur les propriétés électriques de la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 5–15; Edinb. Journ. Sci. X., 1829, pp. 50–56.

—— **28.** Des effets de la chaleur dans les corps mauvais conducteurs de l'électricité et dans la Tourmaline. Annal. de Chimie, XXXVII., 1828, pp. 355–369 ; Quart. Journ. Sci. II., 1828, pp. 201–202.

—— **29.** Du dégagement de l'électricité qui résulte du frottement de deux métaux. Annal. de Chimie, XXXVIII., 1828, pp. 113–122 ; Poggend. Annal. XIII., 1828, pp. 619–627.

—— **30.** Mémoire sur l'électro-chimie et l'emploi de l'électricité pour opérer des combinaisons. Annal. de Chimie, XLI., 1829, pp. 5–45 ; Ann. Sci. Nat. XVII., 1829, pp. 92–97 ; Paris, Mém. de l'Inst. IX., 1830, pp. 551–590 ; Poggend. Annal. XVIII., 1830, pp. 143–151.
